Religious Nationalism Confronts The Secular State:

The New Cold War? Mark Juergensmeyer, 2023-04-28 Will the religious confrontations with secular authorities around the world lead to a new Cold War Mark Juergensmeyer paints a provocative picture of the new religious revolutionaries altering the political landscape in the Middle East South Asia Central Asia and Eastern Europe Impassioned Muslim leaders in Egypt Palestine and Algeria political rabbis in Israel militant Sikhs in India and triumphant Catholic clergy in Eastern Europe are all players in Juergensmeyer's study of the explosive growth of religious movements that decisively reject Western ideas of secular nationalism Juergensmeyer revises our notions of religious revolutions Instead of viewing religious nationalists as wild eyed anti American fanatics he reveals them as modern activists pursuing a legitimate form of politics He explores the positive role religion can play in the political life of modern nations even while acknowledging some religious nationalists proclivity to violence and disregard of Western notions of human rights Finally he situates the growth of religious nationalism in the context of the political malaise of the modern West Noting that the synthesis of traditional religion and secular nationalism yields a religious version of the modern nation state Juergensmeyer claims that such a political entity could conceivably embrace democratic values and human rights Will the religious confrontations with secular authorities around the world lead to a new Cold War Mark Juergensmeyer paints a provocative picture of the new religious revolutionaries altering the political landscape in the Middle East South Asia Centr *Religious Nationalism Confronts the Secular State* Mark Juergensmeyer, 1994 **Global Rebellion** Mark Juergensmeyer, 2008-05-16 A new religious activism has seized the imaginations of political rebels around the world In providing a road map through this complex terrain the author bases his discussion on interviews with militant activists and case studies of rebellious movements

time of radically divided societies and intolerant even violent forms of nationalism A challenge to the critiques of humanism that seek to identify it solely as the legacy of the West as anti religious discourse or relegate it to the domain of power constellations Pluralizing Humanism highlights the rich plurality of humanist discourses and the need for their mutual engagements It points to humanist ideals as constitutive of politics that can guide our human power because they are irreducible to it As such this book will appeal to social scientists social theorists religious studies scholars and ethicists with interests in religion secularism social movements and humanist thought and practice **Secular States and Religious**

First Published in 2015 Daily newspaper headlines talk radio and cable television broadcasts and Internet news web sites continuously highlight the relationship between religion and violence These media contain stories about such diverse incidents as suicide attacks by Islamic fundamentalists in Afghanistan Iraq Israel Pakistan and elsewhere and assassinations of doctors who perform abortions by white American Christian true believers in the United States How does one make sense of the role of religion in violence and of perpetrators of violence who cite religion as a motivation This encyclopedia includes a wide range of entries biographies of key figures historical events religious groups countries and regions where religion and violence have intersected and practices rituals and processes of religious violence Varieties of Secularism in Asia Nils Ole Bubandt, Martijn Van Beek, 2012-03-12 Varieties of Secularism is an ethnographically rich theoretically well informed and intellectually coherent volume which builds off the work of Talal Asad Charles Taylor and others who have engaged the issue of secularism s and in socio political life The volume seeks to examine theories of secularism secularity and examine concrete ethnographic cases in order to further the theoretical discussion Whereas Taylor s magisterial work draws up the conditions and problems of a belief in God in Western modernity it leaves unexplored the challenges posed by the spiritual in modernity outside of the North Atlantic rim This anthology seeks to begin that task It does so by suggesting that the kind of secularity described by Taylor is only one amongst others By attending to the shifting relationship between proper religion and bad faiths between politically valorised and embarrassing spiritual phenomena between the new visibilities and silences of magic ancestors and religion in democratic politics this book seeks to outline the particular formations of secularism that have become possible in Asia from China to Indonesia and from Bahrain to Timor Leste This book will appeal to students and scholars of Asian religion politics and anthropology Legitimacy Gap Vincent Depaigne, 2017-08-25 This book provides an account and explanation of a fundamental dilemma facing secular states the legitimacy gap left by the withdrawal of religion as a source of legitimacy Legitimacy represents a particular problem for the secular state The secular in all its manifestations is very much linked to the historical rise of the modern state It should not be seen as a category that separates culture and religion from politics but rather as one that links these different dimensions In the first part of the book Depaigne explains how modern constitutional law has moved away from a substantive legitimacy based in particular on natural law towards a procedural legitimacy based on popular sovereignty and human rights Depaigne examines three case studies of constitutional responses to legitimacy challenges which articulate the three main sources of procedural legitimacy people rights and culture in different ways the neutral model constitutions based on the displacement of culture the multicultural model constitutions based on diversity and pluralism and the asymmetric model constitutions based on tradition Even if secularization can be considered European in its origin it is best seen today as a global phenomenon which needs to be approached by taking into account the particular cultural dimension in which it is rooted Depaigne s detailed study shows how secularization has moved either towards nationalization linked to a particular national identity as in France and to some

extent in India or towards de secularization whereby secularism is displaced by particular cultural norms as in Malaysia

The Oxford Handbook of Religion and Education Liam Francis Gearon, Arniika Kuusisto, 2025-04-29 The Oxford Handbook of Religion and Education offers a multi disciplinary work of scholarship and research highlighting the global significance of a critical interface of cultural and social political and theological importance Drawing on historical perspective and contemporary reflection the collection provides a uniquely transformative analysis of why the interface of religion and education is of such critical significance With contributions from some of the leading thinkers in the field this Handbook presents a cumulatively powerful argument to reassess the complexities of the intersection of religion and education With ambitious and yet accessible intellectual engagements the Handbook here furthers a central thesis that the interface of religion and education is not merely a matter of arcane disputation about a domain of ancient origin or a rudimentary matter of formal educational process but a vibrant domain of critical contestation fundamental to knowing understanding and living in the modern world

Mapping the Academic Debate Johannes Duschka, Christoph Kleine, Monika Wohlrab-Sahr, Florian Zemmin, 2024-12-16 This volume maps the international academic debate on secularity It places seminal contributions from within Western academia alongside less well known texts from various parts of the world in several cases this is the first time that they have been translated into English The volume demonstrates that the academic debate on secularity was and is a global debate with contributions from many regions The collected texts relate to each other either directly or indirectly by referring to similar arguments whether reinforcing or criticising them and thus create a discourse When speaking of global secularity we therefore do not insinuate a uniform world secularity resulting from the alleged global diffusion of Western norms ideas and concepts It is rather a web of relations that is constituted via various different references These references are not evenly distributed the development in the West is often the point of reference to which positions from other regions relate to which they connect or from which they distance themselves But the references are not completely unidirectional We also present texts from Europe that underline the multidirectionality of the process even early on Thereby the volume offers the reader the material with which to trace these global exchanges and references

Religion and Politics in International Relations Timothy Fitzgerald, 2011-10-27

Scholars in International Relations concerned with religion and its relations to world politics are rhetorically constructing a powerful modern myth A component of this myth is that religion is inherently violent and irrational unless controlled by the secular state which is inherently rational and only reluctantly violent Timothy Fitzgerald discusses how in this modern myth religion appears as a force of nature which either assists or threatens the sacred secular order of things and how religion is portrayed as a kind of universal essence which takes many forms its recent most dangerous manifestation being Islamic terrorism This book illustrates that the essential distinction between irrational religion and rational secular politics appears as an unquestioned preconception on the basis of which policy is conducted countries invaded and wars fought Arguing that this rhetorical construction of religion provides the foundation for faith in the rationality of modern liberal capitalism Fitzgerald demonstrates how a historically contingent discourse has been transformed into a powerful set of global assumptions
