Religious Systems And Psychotherapy:

Religious Systems and Psychotherapy Richard H. Cox, 2010-11-01 Man's search for answers to the problem of human existence has led him from soothsayers to psychotherapists. He has sought guidance on an individual and group basis. This guidance has often resulted in organized institutions of a religious, political, or philosophical nature. The major world religions presented in this book are discussed from the psychotherapeutic and mental health point of view. Many other religious systems are included as well as selected specific topics of special concern. There are three major sections in this volume. Section one includes fourteen major world religious systems. Section two includes indigenous and emergent systems such as magic, exorcism, and witchcraft, and section three deals with multiple systems and includes areas of special concern to both the student of religion and human behavior. Of particular interest is the section of discussions on the role of the religious man as psychotherapist and the psychotherapist as a religious man. Other concerns deal with ethics, values, morals, and psychoanalysis. This book will serve as a resource volume for students, teachers, and practicing professionals in the helping professions, particularly the fields of religion and mental health.

Religious Theories of Personality and Psychotherapy R. Paul Olson, 2002 Six clinical psychologists from six different Eastern and Western religious traditions: Hinduism, Buddhism, Taoism, Judaism, Christianity, and Islam examine a single clinical case from their individual religious perspective. Each of six chapters includes an overview of the specific spiritual tradition, its theory of personality, its theory of the symptoms and etiology of distress, suffering, or pathology, its theory of therapy procedures and techniques to facilitate change, relationships between the religious tradition and other traditions, and application to the specific clinical case. For mental health professionals and clergy, and for academic instructors and students in undergraduate and graduate courses on religion, cross-cultural studies, personality, counseling, and psychotherapy. Religion and Prevention in Mental Health Robert E. Hess, Kenneth I. Maton, Kenneth Pargament, 2014-06-23 Here is the first book which highlights the unique resource of religion in the field of prevention. Until now, religious systems have been a largely untapped resource of talent, energy, care, and physical and financial assets. *Religion and Prevention in Mental Health* is a significant new volume that lays a general foundation for preventive work in the religious area. It presents a number of reasons for examining religion as a source for aiding prevention and well-being. The authors dispute the popular notion of religion as damaging to mental health, as well as the idea that religious affiliation is entirely predictive of better mental health. Instead, they focus on the framework for living that religions provide, which assists believers in anticipating, avoiding, or modifying problems before they develop. For the human service professional willing to build a collaborative relationship with religious systems, this vital book depicts the richness and diversity of religion and shows the interface of religion, well-being, and prevention. Important

issues such as the impact of religion on American society and the ethos of mental health and prevention the historical and contemporary role of the African American church as an empowering agent and mediating structure for black citizens the critical roles of theology in determining the attitude of religious systems toward prevention and well being the importance of community and personal narratives and the limitations of religious settings due to their survival concerns and methods to increase their potential to heal are all discussed thoroughly Through a better understanding of religious settings programs and processes human service professionals can more effectively utilize religion and reach a neglected portion of the population in need of help In addition religious leaders mental health professionals including counselors social workers program developers evaluators and administrators and psychologists sociologists and anthropologists will benefit from the comprehensive material provided in this timely book

Counseling and Psychotherapy With Religious Persons Stevan L. Nielsen, W. Brad Johnson, Albert Ellis, 2001-05 This may be the most practical and user friendly guide to treating religious persons ever published Mental health professionals from all backgrounds will benefit from the author's detailed yet manual focused approach to help overcome emotional distress

New Religious Movements and Counselling Sarah Harvey, Silke Steidinger, James A. Beckford, 2017-12-14 There are many different ways in which minority religions and counselling may interact In some cases there can be antagonism between counselling services and minority religions with each suspecting they are ideologically threatened by the other but it can be argued that the most common relationship is one of ignorance mental health professionals do not pay much attention to religion and often do not ask or consider their client's religious affiliation To date the understanding of this relationship has focused on the anti cult movement and the perceived need for members of minority religions to undergo some form of exit counselling In line with the series this volume takes a non judgemental approach and instead highlights the variety of issues religious groups and counselling approaches that are relevant at the interface between minority religion and counselling The volume is divided into four parts Part I offers perspectives on counselling from different professions Part II offers chapters from the field leaders directly involved in counselling former members of minority religions Part III offers unique personal accounts by members and former members of a number of different new religions while Part IV offers chapters on some of the most pertinent current issues in the counselling minority religions fields written by new and established academics In every section the volume seeks to explore different permutations of the counsellor client relationship when religious identities are taken into account This includes not only secular therapists counselling former members of religion but the complexities of the former member turned counsellor as well as counselling practised both within religious movements and by religious movements that offer counselling services to the outside world

Spirituality in Counselling and Psychotherapy Dennis

Lines,2006-10-16 Fascinating There is much here that is controversial thought provoking and very useful It is encyclopaedic in its breadth and use of knowledge Like rich food it needs to be taken in slowly savouring every morsel Thresholds Spirituality has been traditionally taboo within the counselling and psychotherapy profession Denis Lines comes into this controversial scene with a rigorous but gentle mystical but grounded inspiring and thought provoking voice The book is well written and presents the model in the context of other therapeutic modalities which makes it interesting and useful for therapists from different backgrounds and practice settings It could also be of use for those involved in religious education pastoral care or anybody interested in the spiritual development of the self or the existential quest of humankind Therapy Today This gentle mystical empirical and scholarly book is truly inspirational and it deserves the widest possible readership among therapists religious educators and all those who care about the spiritual destiny of humankind Professor Brian Thorne Co founder The Norwich Centre and Emeritus Professor of Counselling University of East Anglia Spirituality in Counselling and Psychotherapy explores the idea that throughout the course of a therapeutic relationship between therapist and client a spiritual level is reached by the two people involved The author shows how this dimension can help clients who are living in an increasingly secular and faithless society to find some resolution with the issues they bring to therapy By exploring different perspectives on religion and spirituality the book provides therapists with the grounding they need to introduce spiritually centred counselling into their practice It describes the characteristics of spiritual counselling and covers practical considerations such as recognising indications from the client to move into a spiritual mode of therapy exploring the self through spiritual work within the therapeutic process and how this can lead to healing and growth how to deal with doubt and scepticism over issues of spirituality The book is illustrated throughout with transcripts and case studies to show how therapists can integrate the spiritual within their own approach to therapeutic work It will be invaluable to all those who wish to explore this dimension in their work with clients
