Remaking Eden Harry Griffin, Pam Skelton, James McLean, John Haldane, 1998 **Remaking Eden** Lee M. Silver, 1998 A leading geneticist explores the brave new world of baby making in an age that looks onward from IVF and surrogacy to human clones and genetic engineering Lee Silver explains the science of embryology explores what science can and will be able to do to affect the natural processes and through a series of individual stories both contemporary and imagined from the future looks at the moral ethical and legal implications **Enhanced Beings** Kerry Lynn Macintosh, 2018-08-23 Today scientists are using CRISPR Cas9 and other molecular editing tools to alter human gametes and embryos a practice known as human germline modification In the near future these efforts may lead to the birth of children with better health improved memories and extended lifespans However critics claim that human germline modification exceeds divine and natural boundaries transforms reproduction into manufacture and yields apocalyptic outcomes such as the collapse of democracy **Enhanced Beings** Human Germline Modification and the Law analyzes and critiques these objections on both biological and political grounds Professor Kerry Lynn Macintosh discusses the hidden psychology behind the objections and describes the laws that affect this new technology Provocative and timely **Enhanced Beings** argues that bans on human germline modification pose a threat to scientists and science parents children foreigners and society **Who Gives a Gigabyte?** Gary Stix, Miriam Jacob, 1999-03-15 An exhilarating chronicle of the most revolutionary advancements in recent and future technology Which new technologies are bound to have the biggest impact on our lives in the years ahead This groundbreaking book looks at the latest technological superstars destined to reshape the upcoming century and offers easy to understand engaging explanations of what they are how they work and how they will affect our lives Written by a senior editor of Scientific American the world's premier science magazine and based on in depth interviews with today's leading innovators as well as extensive research of the latest scientific literature **Who Gives a Gigabyte** takes you on a fast paced tour into the brave new world of gene therapy quantum computation designer drugs and recyclable cars Surveying the wide range of technological wonders the authors investigate such diverse realms of scientific advancement as computing telecommunications laser beams bioengineering materials and alternative energy sources From the Human Genome Project which aims to spell out every letter of our genetic inheritance to the implications of altering genes in important agricultural projects to new strategies for attacking malignant cancer cells without the damaging side effects of traditional treatments to the startling but still unsuccessful attempts to make computer software more like the human mind **Who Gives a Gigabyte** demystifies the technology of today and provides an enlightening glimpse into the limitless possibilities of tomorrow An enjoyable and rewarding book Choice An informative overview of new and emerging technologies Booklist The reward for the reader is a solid grounding in technological literacy Scientific American **Blood Evidence** Henry Lee, Frank Tirnady, 2003-04-17 Uses case studies to examine how investigators collect genetic evidence and discusses how DNA has

altered crime solving and the court system as well as the ethical ramifications of cloning genetic modification and the death penalty

Transhumanist Dreams and Dystopian Nightmares Maxwell J. Mehlman, 2012-10-01 What will happen when technology allows us to direct our own evolution Transhumanists advocate for the development and distribution of technologies that will enhance human intellectual physical and psychological capacities even eliminate aging What if the dystopian futures and transhumanist utopias found in the pages of science journals Margaret Atwood novels films like Gattaca and television shows like Dark Angel are realized What kind of world would humans have created Maxwell J Mehlman considers the promises and perils of using genetic engineering in an effort to direct the future course of human evolution He addresses scientific and ethical issues without choosing sides in the dispute between transhumanists and their challengers However Transhumanist Dreams and Dystopian Nightmares reveals that radical forms of genetic engineering could become a reality much sooner than many people think and that we need to encourage risk management efforts Whether scientists are dubious or optimistic about the prospects for directed evolution they tend to agree on two things First however long it takes to perfect the necessary technology it is inevitable that humans will attempt to control their evolutionary future and second in the process of learning how to direct evolution we are bound to make mistakes Our responsibility is to learn how to balance innovation with caution
