## **Remarriage In The Middle Years And Beyond:**

Widows: North America ,1987 What happens when the husband dies depends on the society on the location of the widow in urban rural or class terms and on the widow's own personal resources In some societies the woman is totally dependent upon a grown son and cannot remarry in others such as that in the United States she is more dependent upon her own resources and wishes For some widowhood results in a great loss of status for others it can mean loneliness and social isolation Yet widowhood can mean greater social freedom for some women a blooming of personality Even grief is experienced in various ways and degrees Thus there is no such thing as a widow type only a great heterogeneity in widowhood as in wifehood Volume I analyzes the support systems and life styles of widows in Australia the Philippines Korea Iran China a Pacific island India Turkey and Israel Volume II North America examines two communities in Canada a Florida retirement community and communities in several other locations as well as the relative situations of homeowners blacks and poor ethnic populations

**Divorce** Marilyn Leighman, Ph.D. LPC,2017-09-01 When someone dies family and friends gather around the bereaved to offer comfort and support However when divorce happens no one comes to your door with a casserole and condolences The one left behind feels isolated often they are alone for the first time after years of living within a family Family and friends may choose sides and sometimes even those who love both parties remain aloof in order to remain neutral and not take sides But divorce is a death the death of a marriage The Dream of a happily ever after marriage and family is the major goal of many women especially Christian women When divorce occurs the devastation and heartbreak make one wonder How will I get through this and Will I ever be happy again Seven women tell the stories of their marriage their divorce and their recovery Though the stories are different they share similar traumas and truths Each person offers insights into how to overcome the trauma survive in the new normal and choose happiness for themselves and their families Most of all they learn how to trust God with their future Have no fear of what the future holds for God holds the future

The Economics of Divorce Craig Everett,2014-01-09 The Economics of Divorce recognizes the critical role economic factors play during and after the divorce process In the past research into this issue has remained very general despite the enormous weight economics put on the entire divorce process This book concentrates on elements specifically relevant to the economic variables of divorce It focuses on the issues of work employment and financial support after divorce and how these issues affect the parents children and home environments of divorced families The research presented not only provides insights into the economic aspects of divorce but it is also invaluable to the entire study of divorce and remarriage as it explores the personal impact of these issues Geared toward anyone working with divorced families whether they are clinicians educators mediators or attorneys The Economics of Divorce is also of use to members of divorced or remarried families The book contains demographics on the financial lives of custodial parents who remarry custodial parents who work and the financial support of college students from divorced families It offers a close study of the realities of single parenting

and reentering the work force as well as the economic consequences of marital dissolution The Economics of Divorce is unique in that it is the first publication of its kind to formally identify the economic results of divorcing and remarried families It reshapes thinking on issues often taken for granted and redefines the ways in which financial issues are addressed This book analyzes and advises readers on a number of personal and practical issues Topics discussed include the role of employment for women intergenerational financial support the economics of remarried families financial support for children's college education The book was designed not only to address these issues but to also facilitate further research and discussion into the economic realities of divorced families The Economics of Divorce is the first in its field to address the impact of economics on divorced families but hopefully not the last      *Contemporary Marriage* Kingsley Davis, 1986-08-20

This fascinating symposium is based on an assumption that no longer seems to need justification that the institution of marriage is today experiencing profound changes But the nature of those changes their causes and consequences is very much in need of explication The experts contributing to this volume bring a wide range of perspectives sociological anthropological economic historical psychological and legal to the problem of marriage in modern society Together these essays help illuminate a form of relationship that is both vulnerable and resilient biological and social a reflection of and an influence on other social institutions Contemporary Marriage begins with an important assessment of the revolution in marital behavior since World War II tracing trends in marriage age cohabitation divorce and fertility The focus here is primarily on the United States and on industrial societies in general Later chapters provide intriguing case studies of particular countries There is a recurrent interest in the impact on marriage of modernization itself but a number of essays probe influences other than industrial development such as strong cultural and historical patterns or legislation and state control Beliefs and expectations about marriage are explored and human sexuality and gender roles are also considered as factors in the nature of marriage Contemporary Marriage offers a rich spectrum of approaches to a problem of central importance The volume will reward an equally broad spectrum of readers interested in the meaning and future of marriage in our society      *The Handbook of Systemic Family Therapy, Systemic Family Therapy with Couples* Adrian J. Blow, 2020-10-19

Dupuis,2009      Old Age in European Society Peter N. Stearns,2024-05-10 Originally published in 1977 Old Age in European Society provides an historical perspective on aging a process which had received little attention from any group in the social sciences and virtually none from historians at the time Starting from the premise that the elderly can and should be active participant members of their society the book examines the ways in which old people were and are viewed by certain key groups This is done in a series of thematic essays linked by the main theme of a dominant culture in which the elderly and the groups who deal with them were and still are ensnared This dominant culture is one of denigration of the elderly the traditional idea of veneration of the elderly is found to be largely mythical Variations on this theme are dealt with in individual chapters concerned with the elderly in French working class culture and geriatric medicine Key groups are studied with an eye to distinct patterns of modernization which involves particular attention to the working class and middle class as those exposed to the leading edge of change Women are treated separately as their aging process involves distinctive elements which exacerbate the problems of old age France with its exceptional percentage of elderly and its low retirement ages provides much of the material for these essays the main purpose of which is to indicate those topics for which an historical treatment is vital to our understanding of the elderly and to the formulation of a more positive approach to old age

**Middle and Late Life Transitions** Felix M. Berardo,1982 The articles in this volume reflect a reorientation in the ways that scientists have viewed human growth and development In this new perspective transitions are viewed as normal situations that are likely to confront anyone Whatever the situation each transition encompasses a bridging period often characterized by feeling of uncertainty and instability During this interval the person engages in various degrees of social and psychological adaptations to the changing situations in his or her life While such transitional processes have long been characteristic of the human condition it is only in recent years that social and behavioral scientists have begun to rectify out limited knowledge concerning how people and families negotiate a wide array of middle and late life transitions The current preoccupation with the transitions of middle and old age has evolved from several historical economic and demographic changes that have combined to shift our populations toward the middle of the age structure and have produced new stages in the life cycle The result is that today most Americans can expect to pass through these new stages including long term survival the empty nest period universal retirement and an extended term of widowhood in late life characterized by solitary living Many of these changes have in common that they involve periods of imbalance often accompanied by strong emotions Lives must be restructured adaptations made and modifications in both mental and physical behavior must occur The descriptions of these transitions and the process by which adaptations to them are made are the subjects of the articles in this issue      *Remarriage* Phyllis Kamm,1991      **Aging and the Life Course** Deborah Lowry,2022-01-10 Aging part II explores the experiences and conditions of aging especially in particular groups and part III presents current research on older adults engagement in work family social networks and sex Finally Part IV addresses themes of aging and social change

Beyond the Philosopher's Fear Ludger H. Viefhues-Bailey, 2016-12-05 Based on a detailed analysis of gender in Stanley Cavell's treatment of the skeptical problem this book addresses the relationship between gender and religion in modern skepticism Engaging in dialogue with Julia Kristeva's philosophy Viefhues claims that a religious problem underlies Cavell's understanding of the feminine The feminine which the skeptic fears is construed as a placeholder for the beyond marking the transcendence of our origins which are elusive yet at the same time part of ourselves It is argued that a religious question of origins thus lies at the heart of the modern skeptical problem
