Remembering Forgetting:

The Memory Illusion Dr Julia Shaw, 2016-06-16 THE INTERNATIONAL BESTSELLER Truly fascinating Steve Wright BBC Radio 2 Have you ever forgotten the name of someone you've met dozens of times Or discovered that your memory of an important event was completely different from everyone else's Or vividly recalled being in a particular place at a particular time only to discover later that you couldn't possibly have been We rely on our memories every day of our lives They make us who we are And yet the truth is they are far from being the accurate record of the past we like to think they are In *The Memory Illusion* forensic psychologist and memory expert Dr Julia Shaw draws on the latest research to show why our memories so often play tricks on us and how if we understand their fallibility we can actually improve their accuracy The result is an exploration of our minds that both fascinates and unnerves and that will make you question how much you can ever truly know about yourself Think you have a good memory Think again A spryly paced fun sometimes frightening exploration of how we remember and why everyone remembers things that never truly happened Pacific Standard

Complexities and Dangers of Remembering and Forgetting in Rwanda Olivier Nyirubugara, 2013 Can a society a culture a country be trapped by its own memories The question is not easy to answer but it would not be a bad idea to cautiously say It depends This book is about one society Rwanda and its culture traditions identities and memories More specifically it discusses some of the ways in which ethnic identities and related memories constitute a deadly trap that needs to be torn apart if mass violence is to be eradicated in that country It looks into everyday cultural practices such as child naming and oral traditions myths and tales proverbs war poetry etc and into political practices that govern the ways in which citizens conceptualise the past Rwanda was engulfed in a bloody war from 1990 until 1994 the last episode of which was a genocide that claimed about a million lives amongst the Tutsi minority This book the first in the *Memory Traps* series provides a new understanding of how a seemingly quiet society can suddenly turn into a scene of the most horrible inter ethnic crimes It offers an analysis of the complexities and dangers resulting from the ways in which memories are managed both at a personal level and at a collective level The main point is that Rwandans have become hostages of their memories of the long gone and the recent past The book shows how these memories follow ethnic lines and lead to a state of cultural hypocrisy on the one hand and to permanent conflict either open and brutal or latent and beneath the surface on the other hand Written from a memory studies perspective and informed by critical theory philosophy literature oral history and psychology amongst others this book deals with some controversial subjects and deconstructs some of the received ideas about the recent and the long gone past of Rwanda About the author Olivier Nyirubugara is a lecturer of New Media and Online Journalism at the Erasmus School of History Culture and Communication Erasmus University Rotterdam In 2011 he completed a PhD in Media Studies at the University of Amsterdam with a dissertation entitled *Surfing the Past Digital Learners in the History Class* in which he empirically explored ways in which pupils use the Web to find historical

The Feeling of Forgetting John Corrigan, 2023-07-06 A provocative examination of how religious practices of forgetting drive white Christian nationalism The dual traumas of colonialism and slavery are still felt by Native Americans and African Americans as victims of ongoing violence toward people of color today In *The Feeling of Forgetting* John Corrigan calls attention to the trauma experienced by white Americans as perpetrators of this violence By tracing memory's role in American Christianity Corrigan shows how contemporary white Christian nationalism is motivated by a widespread effort to forget the role race plays in American society White trauma Corrigan argues courses through American culture like an underground river that sometimes bursts forth into brutality terrorism and insurrection Tracing the river to its source is a necessary first step toward healing

researchers and students For two decades organization theorists have emphasized the need for more and better research recognizing the importance of the past in shaping the present and future By historicizing organizational research the contexts and forces bearing upon organizations will be more fully recognized and analyses of organizational dynamics improved But how precisely might a traditionally empirically oriented discipline such as history be incorporated into a theoretically oriented discipline such as organization studies This book evaluates the current state of play advances it and identifies the possibilities the new emergent field offers for the future In addition to providing an important work of reference on the subject for researchers the book can be used to introduce management and organizational history to a student audience at both undergraduate and postgraduate levels The book is a valuable source for wider reading providing rich reference material in tutorials across organizational studies or as recommended or required reading on courses with a connection to business or management history Chapter 1 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Beyond Memory Alexandre Dessingué, Jay Winter, 2015-08-14 *Beyond Memory* Silence and the Aesthetics of Remembrance analyses the intricate connections between silence acts of remembrance and acts of forgetting and relates the topic of silence to the international research field of Cultural Memory Studies It engages with the most recent work in the field by viewing silence as a remedy to the traditionally binary approach to our understanding of remembering and forgetting The international team of contributors examine case studies from colonialism war politics and slavery from across the globe as well as drawing examples from literature philosophy and sites of memory to draw three main conclusions Firstly that the relationship between remembering and forgetting is relational rather than hermetic and the space between the two is often occupied by silence Secondly silence is a force in itself capable of stimulating more or less remembrance Finally that silence is a necessary and key element in the interaction between the human mind and the outer world and enables people to challenge their understanding of art music literature history and memory With an introduction by the editors discussing Memory Studies and concluding remarks by Astrid Erll this collection demonstrates that acceptance and consideration of silence as having both a performative and aesthetic dimension is an essential component of history and memory studies

The Oxford Handbook of Shakespeare and Performance James C. Bulman, 2017-11-16 The Oxford Handbooks to Shakespeare are designed to record past and present investigations and renewed and revised judgments by both familiar and younger Shakespeare specialists Each of these volumes is edited by one or more internationally distinguished Shakespeareans

together they comprehensively survey the entire field Shakespearean performance criticism has firmly established itself as a discipline accessible to scholars and general readers alike And just as performances of the plays expand audiences understanding of how Shakespeare speaks to them so performance criticism is continually shifting the contours of the discipline The 36 contributions in this volume represent the most current approaches to Shakespeare in performance They are divided into four parts Part I explores how experimental modes of performance ensure Shakespeare s contemporaneity Part II tackles the burgeoning field of reception how and why audiences respond to performances as they do Part III addresses the ways in which technology has revolutionized our access to Shakespeare both through the mediums of film and sound recording and through digitalization Part IV grapples with global Shakespeare considering matters of cultural appropriation in productions played for international audiences Together these ground breaking essays attest to the richness and diversity of Shakespearean performance criticism as it is practiced today

Grammatical Change in Indo-European Languages Vit Bubenik,John Hewson,Sarah Rose,2009-07-16 The product of a group of scholars who have been working on new directions in Historical Linguistics this book is focused on questions of grammatical change and the central issue of grammaticalization in Indo European languages Several studies examine particular problems in specific languages but often with implications for the IE phylum as a whole Given the historical scope of the data over a period of four millennia long range grammatical changes such as the development of gender differences strategies of definiteness the prepositional phrase or of the syntax of the verbal diathesis and aspect are also treated The shifting relevance of morphology to syntax and syntax to morphology a central motif of this research has provoked lively debate in the discipline of Historical Linguistics

Refiguring the Archive Carolyn Hamilton,Verne Harris,Michèle Pickover,Graeme Reid,Razia Saleh,Jane Taylor,2012-12-06 Refiguring the Archive at once expresses cutting edge debates on the archive in South Africa and internationally and pushes the boundaries of those debates It brings together prominent thinkers from a range of disciplines mainly South Africans but a number from other countries Traditionally archives have been seen as preserving memory and as holding the past The contributors to this book question this orthodoxy unfolding the ways in which archives construct sanctify and bury pasts In his contribution Jacques Derrida an instantly recognisable name in intellectual discourse worldwide shows how remembering can never be separated from forgetting and argues that the archive is about the future rather than the past Collectively the contributors demonstrate the degree to which thinking about archives is embracing new realities and new possibilities The book expresses a confidence in claiming for archival discourse previously unentered terrains It serves as an early manual for a time that has already begun

Proust, Beckett, and Narration James H. Reid,2003-10-13 This a comprehensive comparison of the narrative techniques of two of the twentieth century s most important writers of prose Using a combination of theoretical

analysis and close readings of Proust's *A la recherche du temps perdu* and Beckett's trilogy of novels *Molloy*, *Malone Dies* and *The Unnamable*. James H. Reid compares the two novelists' use of first person narration in constructing and demystifying fictions of consciousness. Reid focuses on the narrator's search to represent the voice that speaks the novel, a search he argues that structures first person narration in the works of both novelists. He examines in detail the significant impact of Proust's writing on Beckett's own work as well as Beckett's subtle reworkings of Proust's themes and strategies. This study is an important contribution to critical literature and offers fresh perspectives on the crucial importance of the *Recherche* and the trilogy in the context of the twentieth century novel.
