*Cryptocurrency Remote Viewed: The Top Twelve (2nd Edition)* Kiwi Joe,2024-02-09 Kiwi Joe presents the best of his remote viewing analyses after targeting more than sixty five of the top ranking cryptocurrencies The vast majority were ranked within the top 250 coins as of late 2020 according to market capitalization The selection in the book represents his top picks distinguished by the quality and accuracy of the remote viewing data In the 2nd Edition of The Top Twelve you will

find a new preface and three additional chapters making a total of 16 picks that highlight the precision of Kiwi Joe's remote viewing insights. Now is an opportune time to embark on your cryptocurrency exploration. You may find undervalued prospects in the current market. These selections are culled from all seven books in the series. The crypto projects that Kiwi Joe's data suggest will excel amidst the vast array of less promising options. This kind of information can be instrumental in focusing your research on the most promising cryptocurrencies. Kiwi Joe's remote viewing data might reveal insights that are elusive in conventional sources, giving your research an advantageous edge. Along with the raw data and insights, each analysis chapter provides background to the coin or tokens, including who is behind the project, the aims and goals of the development team, and significant events since the launch of the project, as well as important links. Remote viewing is a skill based on a strict protocol that leverages a fundamental ability innate to all humans. Each of us possesses a degree of ESP, often experienced as intuition. Imagine enhancing this natural capability through disciplined training, akin to a martial artist mastering the body to transcend physical and mental limits. Developed by the Defense Intelligence Agency (DIA) and the Stanford Research Institute (SRI) in the 1970s, remote viewing represents a structured method to harness this intrinsic human potential.

*Forrest Fenn's Treasure Remote Viewed* Kiwi Joe, 2019-06-11. Important update: Forrest Fenn has confirmed to the Santa Fe New Mexican that the treasure chest has been found, reported June 07, 2020. Well done, Back East Kiwi Joe! This is the second book in the Remote Viewed series. It covers many remote viewing sessions that targeted the location of Forrest Fenn's treasure chest. The book aimed to help readers verify solutions and strategies, to rethink them where necessary, and to pose critical questions they may not otherwise have considered. I show the meaning of two of the most important clues in Forrest Fenn's poem and location within a one and a half mile radius. I also include a bird's eye view and views from much higher. Finally, I show how the data points to the specific region in the Rock Mountains. There are 21 illustrations in total, taken from six extended remote view sessions. Additionally, there's a resource list including literature and online sources. There is something for both treasure hunters and remote viewers alike. Remote Viewing uses an ESP ability found in all of us to view a distant or unseen object, utilizing a disciplined approach originally developed under the auspices of the Defense Intelligence Agency (DIA) and the Stanford Research Institute (SRI) in the 1970s.
