Renaissance Thought A Reader:

Renaissance Thought Robert Black, 2001 Renaissance Thought is a fascinating collection of essays on the Renaissance focusing on humanism and thought The concept of the Renaissance has always been challenging to define and this book enables a deeper understanding of the essential features of the Renaissance and humanism Knowledge of Renaissance thought illuminates other key aspects of Renaissance culture such as philology political thought and scholastic and platonic philosophy Renaissance Thought explores all the important themes and influential figures including humanism and scholasticism the scholarship of Politician printers and readers in Italy Ptolemy of Lucca Petrarch Florentine constitutionalism and Medici ascendancy the humanist challenge to medieval German culture This collection of articles is essential reading for students of the Renaissance The book will allow readers to contribute to the debate on the Renaissance a theme which has never ceased to stimulate intellectual interest since the earliest days of the Renaissance itself **The Great Humanists** Jonathan Arnold, 2011-10-14 Born out of a love of language text classical learning art philosophy and philology the Christian Humanist project lasted beyond the turmoil of sixteenth century Europe to survive in a new form in post Reformation thought Jonathan Arnold here explores the finest intellects of late Renaissance Europe providing an essential guide to the most important scholars priests theologians and philosophers of the period now collectively known as the Christian Humanists The Great Humanists provides an invaluable context to the philosophical political and spiritual state of Europe on the eve of the Reformation through inter related biographical sketches of Erasmus Thomas More Marsilio Ficino Petrarch Johann Reuchlin Jacques Lefevre d Etaples and many others The legacy of these thinkers is still relevant and widely studied today and this book will make invaluable reading for scholars and students of philosophy and early modern European history *The Artist as Reader* Heiko Damm, Michael Thimann, Claus Zittel, 2012-12-07 Based on the history of knowledge the contributions to this volume elucidate various aspects of how in the early modern period artists education knowledge reading and libraries were related to the ways in which they presented themselves *Ars et methodus* Sandra Bihlmaier, 2018-07-16 Sandra Bihlmaier constitutes a historical and philosophical analysis of Philipp Melanchthon s concept of method and philosophy By means of a detailed inquiry into Melanchthon s textbooks of dialectic and rhetoric it uncovers the emergence and development of a notion of method which underlies an encyclopedic understanding of philosophy The work reveals both the traditions of rhetoric and dialectic which Melanchthon builds on in his own works as well as the Reformer s own original reinterpretation of these traditions Moreover the reinterpretation and transformation of essential concepts taken from traditional accounts is thematized against the background of the canon of arts and sciences which undergoes a fundamental change during the European Renaissance The understanding configuration and the applicability of this canon is deeply influenced by this original concept of method Philipp Melanchthon s concept of method and philosophy is central to the understanding of 16th century definition of philosophy Melanchthon s attempt to integrate into a former

theoretical discipline both the aspect of usefulness as well as a degree of general applicability in human affairs testifies to the fertility of his philosophical program Also his project is highly relevant for an understanding of philosophy which transgresses contemporary idiosyncratic categories of philosophical knowledge and draws attention to two fundamental historiographical aspects First it cautions historians and philosophers against transferring current definitions of philosophy to works which emerge from different historical social and intellectual traditions Second it raises the awareness of the reader regarding his own understanding of philosophy and of its underlying presuppositions

Reading Galileo Renée Raphael, 2017-03-15 How did early modern scientists interpret Galileo's influential *Two New Sciences* In 1638 Galileo was over seventy years old blind and confined to house arrest outside of Florence With the help of friends and family he managed to complete and smuggle to the Netherlands a manuscript that became his final published work *Two New Sciences* Treating diverse subjects that became the foundations of mechanical engineering and physics this book is often depicted as the definitive expression of Galileo's purportedly modern scientific agenda In *Reading Galileo* Renée Raphael offers a new interpretation of *Two New Sciences* which argues instead that the work embodied no such coherent canonical vision Raphael alleges that it was written and originally read as the eclectic product of the types of discursive textual analysis and meandering descriptive practices Galileo professed to reject in favor of more qualitative scholarship Focusing on annotations period readers left in the margins of extant copies and on the notes and teaching materials of seventeenth century university professors whose lessons were influenced by Galileo's text Raphael explores the ways in which a range of early modern readers from ordinary natural philosophers to well known savants responded to Galileo She highlights the contrast between the practices of Galileo's actual readers who followed more traditional bookish scholarly methods and their image constructed by Galileo and later historians as modern mathematical experimenters *Two New Sciences* has not previously been the subject of such rigorous attention and analysis *Reading Galileo* considerably changes our understanding of Galileo's important work while offering a well executed case study in the reception of an early modern scientific classic This important text will be of interest to a wide range of historians of science of scholarly practices and the book and of early modern intellectual and cultural history

Reading Machiavelli John P. McCormick, 2020-12-15 A new reading of Machiavelli's major works that demonstrates how he has been previously misread To what extent was Niccol Machiavelli a Machiavellian Was he an amoral adviser of tyranny or a stalwart partisan of liberty A neutral technician of power politics or a devout Italian patriot A reviver of pagan virtue or initiator of modern nihilism *Reading Machiavelli* answers these questions through original interpretations of Machiavelli's three major political works *The Prince* *Discourses* and *Florentine Histories* and demonstrates that a radically democratic populism seeded the Florentine's scandalous writings John McCormick challenges the misguided understandings of Machiavelli set forth by prominent thinkers including Jean Jacques Rousseau and representatives of the Straussian and Cambridge schools and he emphasizes the fundamental often unacknowledged elements of a vibrant Machiavellian politics Advancing fresh readings of Machiavelli's work this book presents a new outlook on how politics should be conceptualized and practiced

Reading the World Mary Franklin-Brown, 2012-09-01 The thirteenth century saw such a proliferation of new encyclopedic texts that more than one scholar has called it the century of the encyclopedias Various referred to as a speculum thesaurus or imago mundi the term encyclopedia was not commonly applied to such books until the eighteenth century these texts were organized in such a way that a reader could easily locate a collection of authoritative statements on any given topic Because they reproduced rather than simply summarized parts of prior texts these compilations became libraries in miniature In this groundbreaking study Mary Franklin Brown examines writings in Latin Catalan and French that are connected to the encyclopedic movement Vincent of Beauvais's *Speculum maius* Ramon Llull's *Libre de meravelles* *Arbor scientiae* and *Arbre de filosofia d'amor* and Jean de Meun's continuation of the *Roman de la Rose* Franklin Brown analyzes the order of knowledge in these challenging texts describing the wide ranging interests the textual practices including commentary compilation and organization and the diverse discourses that they absorb from preexisting classical patristic and medieval writing She also demonstrates how these encyclopedias like libraries became heterotopias of knowledge spaces where many possible ways of knowing are juxtaposed But Franklin Brown's study will not appeal only to historians she argues that a revised understanding of late medievalism makes it possible to discern a close connection between scholasticism and contemporary imaginative literature She shows how encyclopedists employed the same practices of figuration narrative and citation as poets and romanciers while much of the difficulty of the imaginative writing of this period derives from a juxtaposition of heterogeneous discourses inspired by encyclopedias With rich and innovative readings of texts both familiar and neglected *Reading the World* reveals how the study of encyclopedism can illuminate both the intellectual work and the imaginative writing of the scholastic age
