China's Crisis Management Jae Ho Chung, 2013-03 This book presents a comprehensive overview of crisis management in China It considers economic political and military crises and also natural disasters and public health

problems In each area it considers the nature of potential crises and their possible effects and the degree to which China is prepared to cope with crises *Crises in Authoritarian Regimes* Jörg Baberowski, Martin Wagner, 2022-01-19 Krisen offenbaren die Fragilität der Ordnung und fordern die Macht heraus Wie gehen autoritäre Regime mit ihnen um Welche Stärken und Schwächen zeigen sie in der Krisenbewältigung verglichen mit demokratischen Ordnungen Wie lässt sich ihre Anpassungsfähigkeit und Persistenz erklären Die Beiträge dieses Bandes verbinden die Sichtweisen von Politikwissenschaft Geschichte Literaturwissenschaft Soziologie und Regionalwissenschaften auf gegenwärtige und untergegangene Regime in Afrika Ost und Zentralasien Ost und Westeuropa und Lateinamerika Die Fallstudien beleuchten die Verdichtung autoritärer Herrschaft in der Krise die meist zwei konträre Ziele verfolgt die Stabilität zu erhalten und die eigene Herrschaft zu erneuern

China's Information and Communications Technology Revolution Xiaoling Zhang, Yongnian Zheng, 2009-03-20 This book examines China's information and communications technology revolution It outlines key trends in internet and telecommunications exploring the social cultural and political implications of China's transition to a more information and communications rich society It shows that despite remaining a one party state with extensive censorship substantial changes have occurred *Crisis Communication in China* Wei Cui, 2022-10-04 Crisis Communication in China examines crisis communication strategies taken by the Chinese government during public crises and discusses how the public react to these strategies exploring the cultural context and the development of digital media as critical factors underlying the strategies adopted The Global Illusion of Citizen Protection Robert Mandel, 2018-07-11 This book comprehensively analyzes the global illusion of citizen protection so common today This text helps students understand a central puzzle in human security which has two distinct components 1 although it might be reasonable to assume that political leaders threat responses would almost always have a decent chance of safeguarding the mass public sometimes they do not exhibiting rhetoric reality gaps and purely symbolic gestures and 2 although the wealth of security information available to the mass public would seem to provide them with the opportunity to gain almost always an accurate picture of existing dangers and state threat responses sometimes citizens evaluation of their own safety is grossly distorted exhibiting an overly extreme sense of helplessness about ongoing threat and an overly extreme sense of skepticism about state protection At first glance it is difficult to comprehend fully why states would often select ineffective means of protecting their citizens assuming the availability of other options when it appears that there are incentives for them to choose effective ones particularly within societies with responsive forms of government and why citizens would often mischaracterize their own security predicament when they have a direct on the ground view of their plight and seem to have incentives to view their own safety accurately In exploring these puzzles through detailed international case study analysis this text investigation consciously deviates from some prevailing orthodox assumptions It calls into question the desirability of the political centrality of state authority and of the prevailing economic and cultural norms in today's world opening up serious questions about when and how existing

structures and values contribute to increasing rather than decreasing human insecurity for the average world citizen

Chinese National Security Decisionmaking Under Stress Andrew Scobell, 2005 If there is one constant in expert analyses of the history of modern China it is the characterization of a country perpetually in the throes of crises While China at the mid point of the Twenty first Century s first decade is arguably the most secure and stable it has been in more than a century crises continue to emerge with apparent frequency Consequently the study of china s behavior in conditions of tension and stress is of considerable importance to policy makers and analysts around the world **Farewell to the God of Plague**

Miriam Gross, 2016-01-19 Farewell to the God of Plague reassesses the celebrated Maoist health care model through the lens of Mao s famous campaign against snail fever Using newly available archives Miriam Gross documents how economic political and cultural realities led to grassroots resistance Nonetheless the campaign triumphed but not because of its touted mass prevention campaign Instead success came from its unacknowledged treatment arm carried out jointly by banished urban doctors and rural educated youth More broadly the author reconsiders the relationship between science and political control during the ostensibly antiscientific Maoist era discovering the important role of grassroots science in regime legitimation and Party control in rural areas **Crisis Management in China** Lan Xue, Qiang Zhang, Kaibin

Zhong, 2022-05-06 This book describes various crisis situations in transitional China and by analyzing the unique characteristics and backgrounds of emergencies and crisis it argues that crisis management has become a major challenge for the Chinese governments It then discusses the chronology of crisis organizational behaviors and the decision making processes to construct a modern crisis management system in detail to shed light on the creation of a strategic design and institutional framework of crisis management in China In so doing it provides not only insights into the dynamics of crisis decision making and communication but also solutions for possible problems specific to a transitional political regime in China **Negotiating And Navigating Global Health: Case Studies In Global Health Diplomacy** Ellen Roskam, Ilona

Kickbusch, 2011-12-28 Diplomacy is undergoing profound changes in the 21st century and global health is one of the areas where this is most apparent The negotiation processes that shape and manage the global policy environment for health are increasingly conducted not only between public health experts representing health ministries of nation states but include many other major players at the national level and in the global arena These include philanthropists and public private players As health moves beyond its purely technical realm to become an ever more critical element in foreign policy security policy and trade agreements new skills are needed to negotiate global regimes international agreements and treaties and to maintain relations with a wide range of actors The intent of this book is to provide learning tools for today s broad group of new health diplomats in the landscape of this ever shifting complex technical and political arena The case studies are told as the negotiations were experienced by individuals who participated in the various debates dialogues negotiations or by experts who have studied them This collection fills an important gap in both knowledge and practice providing insight on

how negotiations on global health issues have transpired the successes challenges failures tools and frameworks for negotiation mechanisms of policy coherence ways to achieve global health objectives internationally and how global health diplomacy used as a foreign policy tool can improve relations between nations

China Into The Hu-wen Era: Policy Initiatives And Challenges Hongyi Lai, John Wong, 2006-09-28 This volume is an updated survey and assessment of the recent policy initiatives of Hu Jintao and Wen Jiabao which have come to be known as the Hu Wen s New Deal Individual chapters are written by scholars from different academic disciplines and backgrounds These scholars hail from Singapore the United States Australia Korea Hong Kong Taiwan and Mainland China Topics cover the patterns and process of leadership succession emerging political factions social unrest sources of economic growth income disparities social security reform land use policy banking reform corporate governance labor and population policies rule of law and changes in the Party and ideology On the external aspects discussion includes China s changing relations with the U S Japan and ASEAN In many ways the Hu Wen leadership today is still coming to grips with the same issues and problems as discussed in this book *China's Governance Model* Hongyi Lai, 2016-06-10 Many studies of government in China either simply describe the political institutions or else focus critically on the weaknesses of the system such as corruption or the absence of Western style democracy Authors of these studies fail to appreciate the surprising ability of China s government to rapidly transform a once impoverished economy and to recover from numerous crises from 1978 to the present This book on the other hand takes a more balanced more positive view This view is based on a study of changes in China s institutions for coping with critical crises in governance since 1978 These changes include better management of leadership succession better crisis management improved social welfare the management of society through treating different social groups differently depending on their potential to rival the Party state and a variety of limited intra party and grassroots democracy This book applies to the Chinese model the term pragmatic authoritarianism It explains changes to and the likely future direction of China s governance model It compares current risks in China s governance with threats that terminated dynasties and the republic in China over the past four thousand years and concludes that the regime can be expected to survive a considerable period despite its existing flaws Few topics in Chinese politics are as significant as the nature state and prospects of the political regime While the topic had been unduly understudied for a long period of time a young generation of scholars has emerged on this subject Among others the book by Hongyi Lai stands out and provides a comprehensive and penetrating analysis on this topic I am confident that his book will make a significant contribution to the study of Chinese politics and may well define the debate on China s political development governance and model for years to come Yongnian Zheng Director East Asian Institute National University of Singapore

Public Health in Asia during the COVID-19 Pandemic Anoma Veere, Florian Schneider, Catherine Lo, 2025-10-01 Asian countries have dealt with COVID 19 with varying levels of success The WHO s lack of effective leadership in the region has resulted in increasingly contested global health governance

The pandemic continues to undermine global health and the highly interdependent economies in Asia have exposed the speed with which pandemics can now spread. The security of migrant workers is more precarious than ever. Millions have been stranded and face limited access to health services. Public Health in Asia during the COVID 19 Pandemic: Global Health Governance, Migrant Labour and International Health Crises provides an accessible framework for understanding the COVID 19 pandemic in Asia through the lens of global governance in health and labour. *China's New Public Health Insurance* Armin Müller, 2016-11-25. Especially since the 2003 SARS crisis, China's healthcare system has become a growing source of concern both for citizens and the Chinese government. China's once praised public health services have deteriorated into a system driven by economic constraints in which poor people often fail to get access and middle income households risk to be dragged into poverty by the rising costs of care. The New Rural Cooperative Medical System (NRCMS) was introduced to counter these tendencies and constitutes the main system of public health insurance in China today. This book outlines the nature of the system, traces the processes of its enactment and implementation, and discusses its strengths and weaknesses. It argues that the contested nature of the fields of health policy and social security has long been overlooked and reinterprets the NRCMS as a compromise between opposing political interests. Furthermore, it argues that structural institutional misfits facilitate fiscal imbalances and a culture of non-compliance in local health policy which distort the outcomes of the implementation and limit the effectiveness of insurance. These dynamics also raise fundamental questions regarding the effectiveness of other areas of the comprehensive New Health Reform which China has initiated to overhaul its healthcare system. **China's 'Peaceful Rise' in the 21st Century** Sujian Guo, 2016-12-05. China's rapid development has attracted worldwide attention in recent years. The implications of China's rise from its expanding influence and military muscle to its growing demand for energy supplies are heatedly debated in the international community. Jintao's officially proposed concept of peaceful development has become the underlying principle behind Chinese foreign policy under the fourth generation leadership. However, is peaceful development possible in the broad context of domestic and international development? This comprehensive and timely study examines the conditions and challenges of China's peaceful rise and addresses the central question of whether it is possible for China to rise peacefully in the 21st century, bearing in mind the implications for China and the rest of the world. It is ideal as a supplementary course book in foreign policy, Asian politics and development.

Proceedings of the 2023 2nd International Conference on Social Sciences and Humanities and Arts (SSHA 2023) Mohd Fauzi bin Sedon, Intakhab Alam Khan, Mehmet CÜNEYT BİRKÖK, KinSun Chan, 2023-06-29. This is an open access book. With the progress of social civilization, social science and its research are becoming more and more important. Theoretically and practically, the study of social phenomena and social problems and the development of prosperous social sciences are the eternal themes of human beings. At present, social science research and its results can hardly meet the needs of social development, especially the unscientific evaluation of social science results which has aroused great concern from all

walks of life and has produced dirt and questions on social science thus affecting the proper development of social science Max Weber once said that the most important function of social science in modern times is to keep people clear headed and to resist the delusions of prophetic legislators Humanities and arts are the process of perceiving realizing thinking manipulating and expressing objective or subjective objects through capturing and excavating feeling and analyzing integrating and applying or displaying the stage results in the form obtained through feeling seeing hearing smelling touching The social sciences and humanities and arts contain content that will directly affect our lives and the way society functions And by reacting to today s increasingly intricate problems and situations through systematic and professional discussions they will further contribute to the improvement of institutions and the development of society By thinking about issues and looking at problems and the world from different perspectives by putting the two together it may be possible to have more comprehensive appropriate and better responses for example the development of laws requires a deeper understanding of the environment in which they are implemented international trade requires a certain understanding of the customs of different countries and the development of tax and economic policies requires a certain understanding of the population consumer demand etc

The Domestic Sources of China's Foreign Policy Lai Hongyi, 2010-04-28 Offers a systemic analysis of the foreign policy of China This title demonstrates how domestic factors have profoundly shaped China s foreign policy from the late Mao s era to the reform era presenting its argument through an analysis of major cases of Chinese foreign policy

Chinese Politics in the Hu Jintao Era: New Leaders, New Challenges Willy Lam, 2016-07-01 Drawing on hundreds of interviews with top Chinese officials parliamentarians scholars and businessmen Willy Lam a renowned journalist and writer on Chinese affairs presents a first hand multi dimensional account of twenty first century China and the impact of fourth generation leaders including President Hu Jintao and Premier Wen Jiabao Lam goes behind the glitzy facade of nouveau riche Beijing and Shanghai to examine how the Hu leadership has tried to extend the Communist Party s mandate of heaven by tackling an array of daunting problems the weakening legitimacy of the Party s leadership restive peasants angry workers political stagnation over the lack of reform foreign relations difficulties unreliable energy supplies resurgent nationalism and the increasingly dubious Chinese model of development The author assesses possible contributions that the new classes of private businessmen professionals and intellectuals as well as new ideas such as nationalism globalization and federalism will make to economic prosperity and political liberalization The book also includes a chapter on foreign policy which contains an insightful account of Beijing s evolving and sometimes difficult relations with the United States Europe Japan and other major countries and blocs as well as the role of the People s Liberation Army

Crisis Rhetoric and Policy Change in China Yihong Liu, 2022-01-13 This book explores how China s political system responds to crisis A crisis is an episode whose impact cannot be controlled merely by astute on the ground incident management particularly in cases involving widespread doubt about the legitimacy of established policy paradigms or the

political order as a whole Crisis can create political windows for advocacy groups challenging established policies in pluralist democracies The political battle between competing definitions of an uncertain and ambiguous situation among the various actors provides them with crisis induced opportunity space for dramatic policy change However the process of crisis induced policy change mainly by crisis framing in non west regimes like China has not been adequately addressed As China s leadership foregrounds legitimacy in victory over COVID 19 and a new era of climate change disasters begins this dynamic model of crisis and recuperation will offer food for thought for scholars of Chinese and global politics
