The steps which the Chinese state has taken to prevent disasters, mitigate their consequences and reconstruct in the aftermath of disasters are therefore key issues. This book examines the single metropolis of Tianjin in northern China, a city which has suffered particularly badly from natural disasters: the great famine of 1958-61, the great flood of 1963 and the great earthquake of 1976. It discusses how the city managed these disasters, what policies and measures were taken to prevent and mitigate disasters and to promote reconstruction afterwards. It also explores who suffered from and who benefited from the disasters. Overall, the book shows how disaster management was erratic, sometimes managed highly efficiently and in other cases disappointingly delayed and inept. It concludes that although the Maoist state possessed formidable resources, disaster management was always constrained by other political and economic considerations and was never an automatic priority. *International Handbook of Globalization and World Cities* Ben Derudder, 2012-02-01 This Handbook offers an unrivalled overview of current research into how globalization is affecting the external relations and internal structures of major cities in the world. By treating cities at a global scale, it focuses on the stretching of urban functions beyond specific place locations without losing sight of the multiple divisions in contemporary world cities. The book firmly bases city networks in their historical context, critically discusses contemporary concepts and key empirical measures and analyses major issues relating to world city infrastructures, economies, governance and divisions. The variety of urban outcomes in contemporary globalization is explored through detailed case studies. Edited by leading scholars of the Globalization and World Cities GaWC Research Network and written by over 60 experts in the field, the Handbook is a unique resource for students, researchers and academics in urban and globalization studies as well as for city professionals in planning and policy.

**China's Great Economic Transformation** Loren Brandt, Thomas G. Rawski, 2008-04-14 This landmark study provides an integrated analysis of China's unexpected economic boom of the past three decades. The authors combine deep China expertise with broad disciplinary knowledge to explain China's remarkable combination of high speed growth and deeply flawed institutions. Their work exposes the mechanisms underpinning the origin and expansion of China's great boom. Penetrating studies track the rise of Chinese capabilities in manufacturing and in research and development. The editors probe both achievements and weaknesses across many sectors including China's fiscal, legal and financial institutions. The book shows how an intricate minuet combining China's political system with sectorial development, globalization

resource transfers across geographic and economic space and partial system reform delivered an astonishing and unprecedented growth spurt

**The Economic Transformation Of China** Dwight Heald Perkins, 2015-03-27 The Economic Transformation of China is a collection of essays written by an eminent observer of the Chinese economy The book covers the Chinese transformation beginning in the 1950s and continuing through the second decade of the twenty first century It includes an analysis of the forces that held China back before 1949 the nature of the economy as it operated under the Soviet model of development and the transformation since 1978 into a socialist market economy The essays of the post 1978 era reflect the author's view of the state of the reform effort at the time the essay was written and carries the story up to the 2012 2013 slowdown in economic growth

**State-Led Privatization in China** Jin Zeng, 2013-10-01 Large scale privatization did not emerge spontaneously in China in the late 1990s Rather the Chinese state led and carefully planned ownership transformation with timetables and measurable privatization quotas not for the purpose of extracting the state from the economy but in order to strengthen the rule of the Party While it is widely believed that authoritarian regimes are better suited than democracies to carry out economic reform this book provides a more nuanced understanding of reform in China demonstrating that the Chinese state's capacity to impose unpopular reform is contingent on its control over local state agents and its adaptability to societal demands Building on rich fieldwork data gathered in three Chinese cities Shenyang Shanghai and Xiamen this book offers the first comparative study of China's privatization processes at the local level Instead of focusing solely on political elites Jin Zeng adopts a multi level interaction approach to examine how the complex interplay of the central leadership grassroots officials and state owned enterprise managers and workers shaped the contour of privatization in China The book advances three central arguments First local economic structure and cadre

evaluation system mediated local officials incentives to initiate privatization Second local officials relied on mobilization campaigns and various appeasement measures to implement privatization Finally the dynamics of privatization were fundamentally driven by the central government's reactions to social opposition and by the subsequent responses of local officials to the changed political regulatory environment As a detailed analysis of the dual transformation of the property regime and state society relations in China this book will be invaluable to students and scholars of Chinese politics economic reform as well as those interested in comparative political economy and economic development more broadly *Governance and Politics of China* Tony Saich, 2024-10-31 The success or failure of China's development will impact not only its own citizens but also those of the world China is widely recognized as a global actor on the world stage and no global challenge can be resolved without its participation It is important to understand how the country is ruled and what its policy priorities are Can China move to a more market based economy while controlling environmental degradation Can it integrate hundreds of millions of new migrants into the urban landscape The tensions between communist and capitalist identities continue to divide society as China searches for a path to modernization In this revised fifth edition and essential guide to the subject Tony Saich delivers a thorough introduction to all aspects of politics and governance in post Mao China taking full account of the changes of the 20th Party Congress and the 13th National People's Congress as well as the situation in Hong Kong and current debates in Chinese society **China's Public Diplomacy** Ingrid d'Hooghe, 2015-01-08 In China's Public Diplomacy author Ingrid d'Hooghe contributes to our understanding of what constitutes and shapes a country's public diplomacy and what factors undermine or contribute to its success China invests heavily in policies aimed at improving its image guarding itself against international criticism and advancing its domestic and international agenda This volume explores how the Chinese government seeks to develop a distinct Chinese approach to public diplomacy one that suits the country's culture and authoritarian system Based on in depth case studies it provides a thorough analysis of this approach which is characterized by a long term vision a dominant role for the government an inseparable and complementary domestic dimension and a high level of interconnectedness with China's overall foreign policy and diplomacy Reform and Development in China Yang Yao, Ho-Mou Wu, 2010-09-13 Between 1978 and 2006 GDP growth in China maintained an annual average rate of 9.7% meaning the Chinese economy increased by more than twelve times This was achieved with quite unorthodox approaches to reform and development as China has adopted a gradualist approach to adopting key institutions as well as modifying and experimenting with traditional recipes for economic growth This collection brings together key researchers in the field from Asia US Europe and Australia to discuss how China has managed to push forward reforms in the face of political resistance how the Chinese economy has maintained growth within an imperfect institutional environment and how the Chinese government remains effective when it relinquishes its power to the market Specific emphasis is paid to the relevance of China's experiences to other developing countries This valuable contribution to the study of China's

economy covers a wide range of topics including the historical foundations of the 30 years of reform law and development in China foreign direct investment poverty reduction market integration income distribution social protection as well as demographics and population Reform and Development in China finds both unique elements to the Chinese experience and elements which can be applied to other developing countries In particular China s gradualism in economic reform strong leadership and emphasis on inclusive development are singled out to be potentially transferable to other developing countries This collection will be of interest to postgraduate students and researchers as well as practitioners in development economics
