

Stretching the Bounds of SAS/GRAPH® Software

Mike Zdeb, University@Albany School of Public Health, Rensselaer, NY

ABSTRACT

This hands-on session will teach you how create graphics that you never imagined you could produce with SAS/GRAPH. You will learn some little-known, but very powerful, SAS/GRAPH tricks that you can use to create unique, custom, one-of-a-kind graphics.

Some of the areas covered during this hands-on workshop are: using PROC GMAP to create custom 'maps' that do not represent geographical areas (silicon wafer 'maps', calendar charts, floor plans, textile fabrics, company logos, data grids); using the new device=JAVAMETA graphics device to produce animated charts and slide shows (the person viewing the output can stop, start, and control the speed of the animation to help explore the data in detail, not possible with old-style gif animations); using the Annotate facility in non-standard fashions (to put 'shadows' behind maps, emphasize 2-level of borders around regions in maps, take transparent/shadow effects in maps); using the HTML= option to add custom CHARTTIPS (sometimes referred to as 'popups') and DRILLDOWNS to maps, bars, markers, annotated polygons, annotated 'invisible' areas, and annotated images (you will also learn how to use device=JAVAMETA CHARTTIPS, generally faster than the standard HTML tips and having some extra functionality).

The workshop features numerous hands-on examples to let you learn the basic concepts, familiarize yourself with the SAS code, and see how you can easily modify the examples to use them with your own data. Finally, there are several 'super-fancy' examples that put all of the basics together in a way that are guaranteed to produce... "Wow! I did not know that you could do that with SAS/GRAPH!"

INTRODUCTION

Each of the four detailed examples in this workshop involves the use of PROC GMAP. The first and third examples actually produce maps, while the second produces a calendar, and the fourth a display of silicon wafer data. Example one uses data from the US Census Bureau web site and SAS/GRAPH animation to show the westward movement of the US population center from 1790 to 2000. The second example uses counts of deaths by day over a period of ten years to demonstrate how time trends and outliers can be detected using PROC GMAP. The third example demonstrates a number of uses of the Annotate facility in producing a map of Pennsylvania, while the last example uses a combination of PROC GMAP, Annotate, and PROC GREPLAY to draw silicon wafers.

ANIMATION

A single map is good method of showing the spatial distribution of data at one point in time. A series of maps can be used to show the change in the spatial distribution of data over time. When the series of maps is shown in succession, with each new map replacing the display of the last map, you have an animated display. Though you may not have given it much thought, you do see animated maps on a regular basis since they are commonly used to show the progression of weather fronts, hurricanes, tornados, and other features on weather forecasts.

SAS/GRAPH offers two methods for creating animated graphical output: the GIFANIM device driver; the JAVAMETA device driver. Each method has advantages. Output created with the GIFANIM device driver is easily viewed on most computers. Output created with the JAVAMETA driver requires a SAS-supplied application for viewing, but it can include on-screen controls for controlling animation speed and for viewing the animation one frame at a time using a standard web browser.

The following data step creates a SAS data set (POPCTR) using data from the US Census Bureau on the location of the US population center. The data set is to be used to add markers to a map, with each marker placed at the longitude and latitude of the US population center in any given year. Therefore, many of the variables in the data set are Annotate data set variables. If you are not familiar with Annotate facility within SAS/GRAPH, it can be used to customize SAS/GRAPH output in ways that are not possible with PROC GMAP options alone (see the REFERENCES at the end of the paper for suggested reading to learn more about the Annotate facility).

Sasgraph Software Reference Version 6 Introduction

In this digital age, the convenience of accessing information at our fingertips has become a necessity. Whether its research papers, eBooks, or user manuals, PDF files have become the preferred format for sharing and reading documents. However, the cost associated with purchasing PDF files can sometimes be a barrier for many individuals and organizations. Thankfully, there are numerous websites and platforms that allow users to download free PDF files legally. In this article, we will explore some of the best platforms to download free PDFs. One of the most popular platforms to download free PDF files is Project Gutenberg. This online library offers over 60,000 free eBooks that are in the public domain. From classic literature to historical documents, Project Gutenberg provides a wide range of PDF files that can be downloaded and enjoyed on various devices. The website is user-friendly and allows users to search for specific titles or browse through different categories. Another reliable platform for downloading Sasgraph Software Reference Version 6 free PDF files is Open Library. With its vast collection of over 1 million eBooks, Open Library has something for every reader. The website offers a seamless experience by providing options to borrow or download PDF files. Users simply need to create a free account to access this treasure trove of knowledge. Open Library also allows users to contribute by uploading and sharing their own PDF files, making it a collaborative platform for book enthusiasts. For those interested in academic resources, there are websites dedicated to providing free PDFs of research papers and scientific articles. One such website is Academia.edu, which allows researchers and scholars to share their work with a global audience. Users can download PDF files of research papers, theses, and dissertations covering a wide range of subjects. Academia.edu also provides a platform for discussions and networking within the academic community. When it comes to downloading Sasgraph Software Reference Version 6 free PDF files of magazines, brochures, and catalogs, Issuu is a popular choice. This digital publishing platform hosts a vast collection of publications from around the world. Users can search for specific titles or explore various categories and genres. Issuu offers a seamless reading experience with its user-friendly interface and allows users to download PDF files for offline reading. Apart from dedicated platforms, search engines also play a crucial role in finding free PDF files. Google, for instance, has an advanced search feature that allows users to filter results by file type. By specifying the file type as "PDF," users can find websites that offer free PDF downloads on a specific topic. While downloading Sasgraph Software Reference Version 6 free PDF files is convenient, its important to note that copyright laws must be respected. Always ensure that the

PDF files you download are legally available for free. Many authors and publishers voluntarily provide free PDF versions of their work, but its essential to be cautious and verify the authenticity of the source before downloading Sasgraph Software Reference Version 6. In conclusion, the internet offers numerous platforms and websites that allow users to download free PDF files legally. Whether its classic literature, research papers, or magazines, there is something for everyone. The platforms mentioned in this article, such as Project Gutenberg, Open Library, Academia.edu, and Issuu, provide access to a vast collection of PDF files. However, users should always be cautious and verify the legality of the source before downloading Sasgraph Software Reference Version 6 any PDF files. With these platforms, the world of PDF downloads is just a click away.
