The Global Navigation Satellite System Alessandra A.L. Andrade, 2017-03-02
The book constitutes a valuable guide to the implementation of the CNS ATM system towards ensuring safe efficient and orderly evolution of international air transport It uses a pragmatic approach in addressing the major legal institutional technical political and economic aspects underlying the Global Navigation Satellite System which is expected to play a fundamental role in aviation safety and air navigation world wide The book also examines through well reasoned analysis and research the various controversial and relevant issues which will dominate the system in the years to come The author demonstrates a profound grasp of the subject matter through a sustained absorption of technical institutional and legal principles applying to this complex subject This is brought to bear in the coherent structure and logical organisation of the chapters which makes the book an invaluable tool for the aviation community scholars and national and international regulatory authorities It will also be immensely useful for practitioners who work towards further development and implementation of the CNS ATM system There has been no comparable work previously published

NASA Thesaurus, 1998 Contains the authorized subject terms by which the documents in the NASA STI Database are indexed and retrieved

Scientific Satellite and Moon-Based Earth Observation for Global Change Huadong Guo, Wenxue Fu, Guang Liu, 2019-06-27 Global change involves complex and far reaching variations in the Earth's systems and satellite observations have been widely used in global change studies Over the past five decades Earth observation has developed into a comprehensive system that can conduct dynamic monitoring of the land the oceans and the atmosphere at the local regional and even global scale At the same time although a large number of Earth observation satellites have been launched very few of them are used in global change studies The lack of scientific satellite programs greatly hinders research on global change This book proposes using a series of global change scientific satellites to establish a scientific observation grid for global environmental change monitoring from space and offers the first comprehensive review of lunar based Earth observation These scientific satellites could provide not only basic datasets but also scientific support in facilitating advances in international global change research

Ground Station Design and Analysis for LEO Satellites Shkelzen Cakaj, 2022-10-20. Tutorial for analytical and scientific approaches related to LEO satellites, ground station performance including math experiments and simulations. *Ground Station Design and Analysis for LEO Satellites* provides complete instructions and steps for ground station performance evaluation, including stations dedicated for scientific or communication purposes, and offers the reader an enhanced learning experience by proposing 40 ideas related to ground station performance assessment. Each idea goes over the math analysis, experiment or simulation, the methodology applied, the results, and a conclusion. This approach provides the reader with the opportunity to compare theoretical results with on-site results, guiding the reader towards intelligent and practical performance evaluation and enhancement. The text also considers the future emerging developments of LEO satellites and their challenges and applications, including multimedia and other scientific applications. Stemming from the highly qualified author's research work of roughly 20 years, *Ground Station Design and Analysis for LEO Satellites* includes information on interference aspects covering intermodulation interference, modeling for LEO satellite ground stations, and downlink adjacent interference for LEO search and rescue satellites. Sun synchronization covering nodal regression and Sun synchronization of low Earth orbits through inclination angle. Horizon plane and communication duration covering communications duration with LEO satellites under ideal practical and designed horizon plane for LEO satellite ground stations. Figure of merit and system noise temperature covering composite and antenna noise temperature. Sun noise experiment and desensibilization measurements at LEO satellite ground stations. *Ground Station Design and Analysis for LEO Satellites* is an innovative and advanced tutorial-based resource that will appeal to satellite engineers, operators, vendors working on the operation, maintenance, and performance evaluation of ground stations, as well as postgraduate students, early stage researchers wishing to obtain knowledge on this state-of-the-art technology.
