Saucon Valley Country Club Ralph G. Schwarz, 2000 *Lehigh University* Willard Ross Yates, 1992 W Ross Yates has chosen for his subject a history of education in engineering business and related fields as they developed at Lehigh University in Bethlehem Pennsylvania This work is neither an official institutional history nor a call to the nostalgia of old grads but a scholar s summary of some major trends in education whose interweaving produced Lehigh University with original objectives that survived good and bad fortune good and indifferent management and an unfailing if at times flawed attention to evolving national vocational and liberal educational ideals Asa Packer builder of the Lehigh Valley Railroad founded Lehigh University in 1865 to provide a useful common sense education for men planning careers in engineering applied science and the professions He lavishly endowed it With the declining fortunes of the Lehigh Valley Railroad in the 1890s the university had to retrench but it continued along lines laid down by Packer About the turn of the century Lehigh added programs for careers in teaching and business With aid from alumni and industries especially its neighbor the Bethlehem Steel Corporation Lehigh built strong undergraduate programs in engineering science business administration teacher education and the liberal arts At every stage Lehigh s development was bound up with the growth of a science based society Originally the interaction was most obvious at the local level Situated in the industrial part of the lower Lehigh Valley in southeastern Pennsylvania Lehigh was until the First World War removed from the large manufacturing and financial centers of the Atlantic seaboard and was intimately associated with local enterprises concentrating on anthracite coal railroads and heavy metals especially iron steel and zinc After the First World War Lehigh began forming a capacity for sponsored research and branching out into graduate education With the conclusion of the Second World War these moves were speeded up Lehigh entered the mainstream of currents in science engineering and industrial management It broadened its financial base modernized its administration built up its capacity in physics and chemistry added programs leading to the M B A Ph D and Ed D degrees and organized research centers During the late 1960s student and faculty discontents born of a collision between rapid internal growth and unsettling international situations briefly delayed orderly progress Trustees and administrators allayed discontents by bringing students and faculty into the work of administration By 1980 the university was still small by modern standards having approximately 4 400 undergraduate and half as many graduate students It had become coeducational and continued concentrating on vocational preparation for careers in engineering science business and teaching all within the context of a liberal arts emphasis on the human condition Swimming Upstream Michael F Foley, 2020-10-05 In 1898 a 16 year old immigrant with a sixth grade education and not much more than the clothes on his back landed in Boston By 1906 this immigrant Michael Foley had started a fresh fish company In 2005 Michael Foley s great granddaughter Laura together with Peter her co owner husband became the fourth generation to own and operate the Foley Fish Company the seafood industry s standard for quality consistency and integrity Swimming
