Saving Children:

Saving the Children Emily Baughan, 2021-11-23 *Saving the Children* analyzes the intersection of liberal internationalism and imperialism through the history of the humanitarian organization Save the Children from its formation during the First World War through the era of decolonization. Whereas Save the Children claimed that it was saving children to save the world, the vision of the world it sought to save was strictly delimited, characterized by international capitalism and colonial rule. Emily Baughan's groundbreaking analysis across fifty years and eighteen countries shows that Britain's desire to create an international order favorable to its imperial rule shaped international humanitarianism. In revealing that modern humanitarianism and its conception of childhood are products of the early twentieth-century imperial economy, *Saving the Children* argues that the contemporary aid sector must reckon with its past if it is to forge a new future. **Children's**

Saving Edmund J.S. Sonuga-Barke, Paul Webley, 2017-12-06 Originally published in 1993, this book presents an alternative approach to the study of the emergence of economic awareness during childhood: a new developmental economic psychology. In the past, attempts to study the emergence of children's economic consciousness have failed to take account of the practical nature of the economic in the history of western cultures. Economic socialisation has been seen as the acquisition of abstract knowledge about the institutions of adult economic culture. The child has been seen as a spectator acquiring knowledge of that culture but never really a part of it. However, economic actions in essence are directed not towards the attainment of knowledge but rather towards the practical solution of problems of resource allocation imposed by constraint. Children, just like adults, are faced with practical problems of resource allocation. Their response to these problems may be different from those of adults but no less economic for that. This realisation forms the heart of this book. In it, children are seen as both inhabitants of their own playground economic subculture and actors in the wider economic world of adults, solving or attempting to solve practical economic problems. In order to highlight this child-centred approach, the authors studied the way children tackle the particular problems posed by limitations of income: How do children learn about the relationship between choices available in the present and the future? b) to spread their limited financial resources over time into the future and c) about the strategies such as banking that allow them to protect those resources from threats and temptations. In short, how do children learn to save? This volume goes some way to answering these and related questions and, in so doing, sets up an alternative framework for the study of the emergence of economic awareness. **Saving Regional Children's Hospital ,**

a rights based culture and that children constitute an important group of rights holders Now in its third edition Children's Rights and the Developing Law explores the way developing law and policies in England and Wales are simultaneously promoting and undermining the rights of children It reflects on how far these developments take account of children's interests using current research on children's needs as a template against which to assess their effectiveness and considering a broad range of topics including medical law education and youth justice A critical approach is maintained throughout particularly when assessing the extent to which the concept of children's rights is being acknowledged by the courts and policy makers and the degree to which the UK fulfils its obligations under for example the UN Convention on the Rights of the Child
