Saving Pabion:

Coronet, 1960-02 **Home is Where the Mic Is** Vundla, Mandi Poefficient, Horwitz, Allan Kolski, 2019-03-18 This anthology presents the work of twenty four young Spoken Word poets from South Africa with a sprinkling of guests from the United States Britain and Australia The experience of black youth in societies polarized by racism inequality and gender violence whilst at the same time struggling to come to terms with love sex and all the other basic needs of young people makes for fascinating reading The inventive graphic layout is a fine addition to a stand out volume Home is Where the Mic Is was conceived as a collaboration with Word n Sound a popular Johannesburg Spoken Word platform The intention was to give hitherto only stage poets an opportunity to test their work on the page and confound the Eurocentric critics of the new wave of performance poetry who decry its energy and breaking down of artificial definitions of poetry This is South African poetry standing on it s own two feet Medical Firsts Tish Davidson, 2023-06-15 Profiling 60 medical innovations and milestones from the 11th through 21st centuries this book highlights the people and stories behind these key moments while also exploring their historical context and enduring legacy Medical Firsts Innovations and Milestones That Changed the World brings together a carefully curated collection of turning points in the history of medicine over the last millennium These firsts are drawn from a wide array of medical fields from surgery to genetics dentistry and psychiatry Firsts are arranged chronologically but a thematic listing has also been included to allow readers to focus in on particular subject areas such as trailblazing individuals groundbreaking drugs and treatments pioneering diagnostic tools and life saving medical procedures Each entry begins with a description of how the first came to be followed by discussion of the historical context in which it emerged and its continued impact on the world of medicine Sources for further information are provided at the end of each entry and serve as a gateway to further study We take many modern medical devices and techniques for granted but everything from hypodermic needles and baby incubators to organ transplants antibiotics and hearing aids began simply as ideas in someone s mind And while such concepts as formal medical education methodical clinical trials and universal healthcare may seem commonplace today this wasn t always the case In some cases milestones centered around key people and institutions rather than technologies or ideas Do you know who the first woman to win the Nobel Prize in Physiology or Medicine was or where the oldest medical school still in existence resides Medical history comes to life in this captivating volume **War Poster Collections** Princeton University. Library, 1920 *The Saturday Evening Post*, 1965 *The Churchman*, 1896 **The Many Valued and Nonmonotonic Turn in Logic** Dov M. Gabbay, John Woods, 2007-08-13 The present volume of the Handbook of the History of Logic brings together two of the most important developments in 20th century non classical logic These are many valuedness and non monotonicity On the one approach in deference to vagueness temporal or quantum indeterminacy or reference failure sentences that are classically non bivalent are allowed as inputs and outputs to consequence relations Many valued dialetheic fuzzy and quantum logics are among other things principled

attempts to regulate the flow through of sentences that are neither true nor false On the second or non monotonic approach constraints are placed on inputs and sometimes on outputs of a classical consequence relation with a view to producing a notion of consequence that serves in a more realistic way the requirements of real life inference Many valued logics produce an interesting problem Non bivalent inputs produce classically valid consequence statements for any choice of outputs A major task of many valued logics of all stripes is to fashion an appropriately non classical relation of consequence The chief preoccupation of non monotonic and default logicians is how to constrain inputs and outputs of the consequence relation In what is called left non monotonicity it is forbidden to add new sentences to the inputs of true consequence statements The restriction takes notice of the fact that new information will sometimes override an antecedently and reasonably derived consequence In what is called right non monotonicity limitations are imposed on outputs of the consequence relation Most notably perhaps is the requirement that the rule of or introduction not be given free sway on outputs Also prominent is the effort of paraconsistent logicians both preservationist and dialetheic to limit the outputs of inconsistent inputs which in classical contexts are wholly unconstrained In some instances our two themes coincide Dialetheic logics are a case in point Dialetheic logics allow certain selected sentences to have as a third truth value the classical values of truth and falsity together So such logics also admit classically inconsistent inputs A central task is to construct a right non monotonic consequence relation that allows for these many valued and inconsistent inputs The Many Valued and Non Monotonic Turn in Logic is an indispensable research tool for anyone interested in the development of logic including researchers graduate and senior undergraduate students in logic history of logic mathematics history of mathematics computer science AI linguistics cognitive science argumentation theory and the history of ideas Detailed and comprehensive chapters covering the entire range of modal logic Contains the latest scholarly discoveries and interpretative insights that answers many questions in the field of logic
