

Primary School Nurse Health Readiness Program

Information for Health Professionals

The Primary School Nurse Health Readiness Program (PSNHRP) is seeking the support of Health Professionals to increase community awareness of the vision screening program. This screening is conducted by Registered Nurses in schools for prep students across Queensland.

Who are we?

- The Primary School Nurse Health Readiness Program was established in 2015 and is a state-wide initiative, which aims to optimise the health and wellbeing of children during their transition to primary school, with a focus on Prep vision screening.
- Registered Nurses are employed in the program and work in all Hospital and Health Services across Queensland to provide vision screening to prep students in state, catholic and independent schools. They are supported by the PSNHRP Hub, based in Brisbane, to ensure consistent service delivery and maintenance of service delivery data.

How is vision screening conducted?

- PSNHRP Registered Nurses work independently on a designated caseload of schools and manage the screening process from first contact with the school to post-screening follow-up.
- The PSNHRP utilises two tools to screen for common visual abnormalities, including amblyopia (lazy eye), which if not detected and treated early can lead to blindness. These tools are:
 - PARR 4m Letter Matching Visual Acuity Chart
 - Welch Allyn Spot Vision Screener
- When used in conjunction, these tools have an 80-90 per cent accuracy rate in detecting visual abnormalities as shown in recent international studies.
- If a visual abnormality is identified during screening, parents/guardians are notified and provided with a referral to an eye health professional for further assessment. Ongoing follow-up is also conducted by the Registered Nurse following screening.
- 6.1 per cent of children screened by the PSNHRP are referred to an eye health professional for further assessment.
- In 2018, 68 per cent of children referred by the PSNHRP were found to have a visual abnormality.
