School Link To The Workforce:

Integrating School and Workplace Learning in Canada Hans Georg Schütze, Robert Arthur Sweet, 2003 In response to concerns that Canada's educational system from public schools through colleges universities and apprenticeship programmes cannot adequately prepare students for work in the new economy this book proposes alternation a hybrid form of learning that by combining experiential and cognitive learning skills allows individuals to develop the relevant skills and intellectual capabilities to address and solve complex problems encountered in the workplace Alternation involves not only a curricular balance between the theoretical and the practical but also two distinct venues for learning the classroom and the workplace The authors discuss cognitive and social learning its implementation in a variety of settings its role in smoothing the school work transition process and its potential to contribute to the knowledge and skills needed by the workforce They bring a range of disciplinary perspectives to bear in their analyses of the principles and practices of alternation providing historical theoretical and practical insights Their analysis contributes to and extends the debate and discussion surrounding necessary changes in education and training practices *The School-to-work Connection*, 1990 *Reshaping the American Workforce in a Changing Economy* Harry J. Holzer, Demetra S. Nightingale, 2007 Comprises ten essays addressing issues relating to the altering demands for workers at various skill levels Considers consequences of large scale technological changes workplace reorganisation and growing international trade with respect to the availability of highly skilled workers and on the other hand difficulties encountered by less skilled workers in finding or maintaining regular stable employment and the weakening of unions and minimum wage laws Describes labour market developments during the period 1960 2004 Building a System to Connect School and Employment Council of Chief State School Officers, 1994 *Understanding Systems Leadership* Pat Collarbone, John West-Burnham, 2008-07-30 Provides an insight into the most significant changes ever in the understanding of the nature and purpose of educational leadership The concept of Systems Leadership is not yet recognised as a concept and this book is the first to explore in detail the rationale and implications this will have for educational leadership *The Link*, 1997 *The Next Generation of Workforce Development Project*, 2005 Resources in Education, 2001 *School-linked Human Resources* United States. General Accounting Office, 1993 Reauthorization of the Workforce Investment Act United States. Congress. Senate. Committee on Health, Education, Labor, and Pensions.
