School Politics Chicago Style:

School Politics, Chicago Style Paul E. Peterson, 1981 *Desegregating Chicago's Public Schools* Dionne Danne, 2014-01-15 Highlighting the processes and missteps involved in creating and carrying out school desegregation policies in Chicago Dionne Danne discusses the challenges of using the 1964 Civil Rights Act to implement school desegregation and the resultant limitations and effectiveness of government legislative power in bringing about social change *The Politics of School Reform, 1870 - 1940* Paul E. Peterson, 1985-07 Was school reform in the decades following the Civil War an upper middle class effort to maintain control of the schools Was public education simply a vehicle used by Protestant elites to impose their cultural ideas upon recalcitrant immigrants In *The Politics of School Reform 1870 1940* Paul E Peterson challenges such standard revisionist interpretations of American educational history Urban public schools he argues were part of a politically pluralistic society Their growth both in political power and in sheer numbers had as much to do with the demands and influence of trade unions immigrant groups and the public more generally as it did with the actions of social and economic elites Drawing upon rarely examined archival data Peterson demonstrates that widespread public backing for the common school existed in Atlanta Chicago and San Francisco He finds little evidence of systematic discrimination against white immigrants at least with respect to classroom crowding and teaching assignments Instead his research uncovers solid trade union and other working class support for compulsory education adequate school financing and curricular modernization Urban reformers campaigned assiduously for fiscally sound politically strong public schools Often they had at least as much support from trade unionists as from business elites In fact it was the business backed machine politicians from San Francisco's William Buckley to Chicago's Edward Kelly who deprived the schools of funds At a time when public schools are being subjected to searching criticism and when new educational ideas are gaining political support *The Politics of School Reform 1870 1940* is a timely reminder of the strength and breadth of those groups that have always supported free public schools **Saving Schools** Paul E. Peterson, 2011-11-30 *Saving Schools* traces the story of the rise decline and potential resurrection of American public schools through the lives and ideas of six mission driven reformers Horace Mann John Dewey Martin Luther King Jr Albert Shanker William Bennett and James Coleman Yet schools did not become the efficient egalitarian and high quality educational institutions these reformers envisioned Indeed the unintended consequences of their legacies shaped today's flawed educational system in which political control of stagnant American schools has shifted away from families and communities to larger more centralized entities initially to bigger districts and eventually to control by states courts and the federal government Peterson's tales help to explain how nation building progressive education the civil rights movement unionization legalization special education bilingual teaching accountability vouchers charters and homeschooling have each in a different way set the stage for a new era in American education Now under the impact of rising cost coupled with the possibilities unleashed by technological innovation schooling may be

transformed through virtual learning The result could be a personalized customized system of education in which families have greater choice and control over their children s education than at any time since our nation was founded

The New Politics Of Race And Gender Catherine Marshall,2002-11-01 What can schools do to eliminate sexism and racism By the 1990 s with shifting demographics disillusionment with conventional liberal policies and new political coalitions the politics of race and gender requires new analyses The chapters in this book demonstrate how the politics of race and gender enter into proposals for parental choice business involvement in schools definitions of good leadership special schools for minority children curriculum debates and debates about testing and accountability Catherine Marshall provides the political historical context of race and gender politics in schools and the following eighteen chapters provide a greater in depth analysis The chapters include work of scholars and policy analysts focusing on policy and policy implementation at all levels of school politics in the US Australia and Israel The book ends with critical policy analysis raising deep theoretical questions and pulling out the chronic race and gender issues in education politics

The Politics of School Choice Hubert Morken,Jo Renee Formicola,1999 The Politics of School Choice is the first comprehensive examination of diverse efforts to promote tax credits public vouchers private scholarships and charter schools Morken and Formicola provide the most current national report on the burgeoning American school choice movement They analyze the strategies and tactics being used by a wide variety of individuals and organizations to leverage change pass laws win court cases and mobilize community support to build successful winning school choice coalitions Based largely on extensive interviews documentary research and surveys this book covers the spectrum of school choice options and shows how they are being promoted in the United States today It explains who the players are what types of programs they endorse and the various rationales behind them The authors report the views of the entrepreneurs religious leaders heads of think tanks and foundations public litigators scholars activists minority leaders and politicians who are in the forefront of providing parents with resources for educational alternatives Finally Morken and Formicola cover the strengths and weaknesses of the school choice issue concluding that the movement has a wide ranging membership that is uneven in its implementation and that it is taking different forms in various regions of the country As the pace of change accelerates and new school choice programs proliferate this study is a critical resource for all those concerned about the present and future status of American education

The Changing Urban School Robert Thornbury,2012 The author takes a long look at what goes on in schools and the roles played by people specifically concerned with them but finally the problems of the school are seen as indissolubly bound up with the changes that have overtaken urban life The school cannot be isolated teachers administrators planners and parents must actively co operate in making the school work in society and a society which works for the school Nothing other than such a total vision he concludes will enable us to achieve normal educational goals Robert Thornbury writes out of fifteen years experience of the urban school and of the problems not only of Britain but also those sometime similar often more acute of other countries in

particular the United States and Australia The need for a total urban strategy is worldwide His point of view is broad based but his sympathies lie most of all with the hard working teacher who stayed on in the urban classroom It is a book for teachers therefore but also by its own argument for all concerned with the future of the inner city and the reordering of education

Subordination Or Empowerment? Richard A. Keiser, 1997 Why have Blacks won political empowerment in some cities and remained subordinated in others Through case studies of Chicago Gary Philadelphia and Atlanta Keiser argues that electoral competition among White factions has created opportunities for Black leaders to win political empowerment and avoid subordination In the absence of electoral competition Black votes become superfluous and separatist and messianic appeals from leaders like Louis Farakhan gain resonance *Innovations in Urban Politics* Jonathan Davies, 2007-12-13 Previously published as a special issue of Policy Studies this volume demonstrates the vitality of the field of urban politics and presents future challenges for urban political research in the years ahead If it does not already the population of cities will very soon make up more than half the global population As the global urban population co

Empowered Participation Archon Fung, 2009-01-10 Every month in every neighborhood in Chicago residents teachers school principals and police officers gather to deliberate about how to improve their schools and make their streets safer Residents of poor neighborhoods participate as much or more as those from wealthy ones All voices are heard Since the meetings began more than a dozen years ago they have led not only to safer streets but also to surprising improvements in the city's schools Chicago's police department and school system have become democratic urban institutions unlike any others in America Empowered Participation is the compelling chronicle of this unprecedented transformation It is the first comprehensive empirical analysis of the ways in which participatory democracy can be used to effect social change Using city wide data and six neighborhood case studies the book explores how determined Chicago residents police officers teachers and community groups worked to banish crime and transform a failing city school system into a model for educational reform The author's conclusion Properly designed and implemented institutions of participatory democratic governance can spark citizen involvement that in turn generates innovative problem solving and public action Their participation makes organizations more fair and effective Though the book focuses on Chicago's municipal agencies its lessons are applicable to many American cities Its findings will prove useful not only in the fields of education and law enforcement but also to sectors as diverse as environmental regulation social service provision and workforce development
