Schooling The Violent Imagination:

Schooling the Violent Imagination John F. Schostak, 2020-03-13 The violent imagination begins in experiences of violation against the self and grows through the stories myths folktales and anecdotes of everyday life Originally published in 1986 John Schostak discusses the educational social and moral implications of the violent imagination in connection with theories of violence childrearing practices and schooling as a childrearing institution He also looks at the relation between sexism racism drugs and the emergence of a vandalised sense of self The book explores the complex ways in which images of violence pervade society inform action and provide interpretations of events Schools the author argues contribute towards the development of a violent imagination which guides judgements and actions The child's images and experiences of violation may involve physical assault or psychological forms of assault Some of these experiences of violation and violence are considered normal even moral spare the rod and spoil the child others are considered abnormal criminal pathological although the abstract logical form of each may be equivalent Nevertheless all such images contribute towards the development of a sense of violation and children are schooled to accept normal forms and reject abnormal forms

Schooling as Violence Clive Harber, 2004-08-26 Asking fundamental and often uncomfortable questions about the nature and purposes of formal education this book explores the three main ways of looking at the relationship between formal education individuals and society that education improves society that education reproduces society exactly as it is that education makes society worse and harms individuals Whilst educational policy documents and much academic writing and research stresses the first function and occasionally make reference to the second the third is largely played down or ignored In this unique and thought provoking book Clive Harber argues that while schooling can play a positive role violence towards children originating in the schools system itself is common systematic and widespread internationally and that schools play a significant role in encouraging violence in wider society Topics covered include physical punishment learning to hate others sexual abuse stress and anxiety and the militarization of school The book both provides detailed evidence of such forms of violence and sets out an analysis of schooling that explains why they occur In contrast the final chapter explores existing alternative forms of education which are aimed at the development of democracy and peace This book should be read by anyone involved in education from students and academics to policy makers and practitioners around the world

Youth Violence I. M. Rachia,1999 This bibliography comprises a selection of Library of Congress catalog records for some 1 500 books periodicals and websites related to youth violence Anyone wanting such a bibliography could probably compile it from the Library of Congress web site and the deficiencies in conception and design of this product defy understanding A brief preface sounds an alarm no one should be surprised that youth violence lurks behind every school house door but sets forth no criteria for selection of citations no indication of time frame purpose or audience Entries are arranged alphabetically by title within chapters on school violence guns and youth gangs campus violence dating and violence and periodicals and Web sites Unforgivably primitive alphabetic sorting puts all titles beginning with The together the same with other articles and in addition those titles are indexed together Though the title indicates the presence of abstracts there are none except the summaries supplied by Library of Congress for juvenile titles of which there are many Cross referencing and indexing except by title are absent The compiler s credentials motivation and orientation are not cited Furthermore with better design the contents would have consumed half the number of pages and a few typeface variations would have eased scanning Annotation copyrighted by Book News Inc Portland OR

provides a holistic analysis of how violent epistemology and the non conducive circumstances that it produces can be seen to be at the roots of violence in societies and social institutions such as schools Chapter 1 outlines how current and historical theories of violence and interventions based on them have failed due to their inability to properly conceptualise the root causes of violence Chapters 2 addresses this by providing a new epistemic and methodological framework for studying violence Chapters 3 and 4 then demonstrate how violence can be best conceptualised as a problem of specifically violent epistemology and the non conducive social circumstances that it fosters Chapters 5 7 demonstrate in practice how violent epistemology results in multiple manifestations of violence at the global national local and ultimately classroom level Chapter 8 concludes the book by presenting an early conceptualisation of non violent epistemology and what fostering this might look like in practice

Home Schooling Frederick M. Lawrence, 2007 From left to right on the political spectrum there is at least one note of agreement the nation's school system has not delivered universal quality education Accordingly debate has raged over how to rectify this situation Should the government increase funding encourage privatisation some of both Another option though has emerged and is seemingly gaining popularity home schooling Citing both substandard education and displeasure with school environments and curricula many parents have decided to teach their own children Supporters say it is well within their rights to raise their children as they see fit and that at home learning is superior to the public system Detractors claim that home schooled children are deprived of social interaction and the broad based education provided by the system Neither side wants to cede ground making the issue of home schooling an integral part of a wider national debate on education In this book the specific topic of home schooling is presented from all relevant sides to give a complete picture of the present status of the issue and its potential for future resolution Following this overview is a thorough and carefully selected bibliography of literature about home schooling from all viewpoints Easy access to this important resource is then provided via author title and subject indexes
