Science And Babies Private Decisions Public Dilemmas:

Science and Babies Institute of Medicine, Suzanne Wymelenberg, 1990-02-01 By all indicators the reproductive health of Americans has been deteriorating since 1980 Our nation is troubled by rates of teen pregnancies and newborn deaths that are worse than almost all others in the Western world Science and Babies is a straightforward presentation of the major reproductive issues we face that suggests answers for the public The book discusses how the clash of opinions on sex and family planning prevents us from making a national commitment to reproductive health why people in the United States have fewer contraceptive choices than those in many other countries what we need to do to improve social and medical services for teens and people living in poverty how couples should shop for a fertility service and make consumer wise decisions and what we can expect in the future featuring interesting accounts of potential scientific advances **New and Forthcoming Books** National Academy Press (U.S.), 1992 **In Her Own Right** Beryl Lieff Benderly, Institute of Medicine, 1997-04-02 Right to life Right to choice Masetomy lumpectomy Vitamin therapy hormone therapy aromatherapy Tabloids op eds Phil Sally Oprah Yesterday women confided in their doctors about health problems and received private albeit sometimes paternalistic attention Today women s health issues are headline material Topics that once raised a blush now raise a blare of conflicting medical news and political advocacy Women welcome the new recognition of their health concerns Now women are less often treated as the old saw goes as a uterus with a person attached At the same time they need help in sorting through the flood of reports on scientific studies claims of success for new treatments and just plain myths The Institute of Medicine IOM has responded to this need with In Her Own Right Throughout its 25 year history the IOM has provided authoritative views on fast moving developments in medicine bringing accuracy objectivity and balance to the hottest controversies Talented science writer Beryl Lieff Benderly synthesizes this expertise into a readable overview of women s health Why do women live longer than men Why do more women than men suffer vertebral fractures Benderly highlights what we know about the health differences between men and women and the mysteries that remain to be solved With a frank conversational approach Benderly examines women s health across the life span Issues of female childhood adolescence and sexual maturity including smoking eating behavior teen pregnancy and more The host of issues surrounding the reproductive years contraception infertility abortion pregnancy and birth AIDS and mental health Postmenopausal life and issues of aging as health choices made decades earlier come home to roost Benderly addresses women s experience with the nation s health care establishment and the controversy over the lack of female representation in the world of scientific research Much more than a how to guide In Her Own Right translates the finest scholarship on topics of women s health into terms that will help any woman ask the right questions and make the right choices Covering the spectrum from traditional beliefs to cutting edge research this book presents the personal insights of leading investigators along with clear explanations of breakthrough studies written in plain English February **Genetic Counselling** Angus Clarke, 2006-12-05 Contributions to this study are

drawn both from health professionals engaged in genetic counselling and from observers and critics with backgrounds in law philosophy biology and the social sciences This diversity will enable health professionals to examine their activities with a fresh eye and will help the observer critic to understand the ethical problems that arise in genetic counselling practice rather than in imaginary encounters Most examinations of the ethical issues raised by genetics are concerned in a broad sense with the application of new technology to human reproduction This volume focuses on genetic counselling and screening as such providing valuable insights for the health professional social scientist philosopher lawyer and bioethicist *The Integrated Medical Library* Ms. Helis Miido, 1991-06-18 Library automation has advanced at such a rapid pace within the last few years that librarians who have been limited by either budget or hardware constraints are today able to automate at least some library functions Even though presentations at meetings describing individual efforts have been published in the literature there has not been a comprehensive text discussing the status of integration at all levels of library management as it exists today The Integrated Medical Library addresses this need by presenting the results of a survey of automated systems currently used in medical libraries as a basis on which to discuss various methods for integrating these systems This includes serials cataloging circulation acquisitions internal database management systems external database search procedures and management and financial control The book emphasizes current practices and procedures and proposes methods for libraries to improve their performance and services Part I defines an integrated online library system and describes the study design and analysis of results Part II describes commercially available integrated online library systems currently used by medical libraries Part III discusses the specialized integrated online library systems of the U S National Library of Medicine and the Swedish Planning and Rationalization Institute for the Health and Social Services Part IV describes ad hoc integrated functions currently used by medical libraries while Part V discusses the various means of integration

Disciplining Reproduction Adele E. Clarke, 2022-03-25 Reproductive issues from sex and contraception to abortion and cloning have been controversial for centuries and scientists who attempted to turn the study of reproduction into a discipline faced an uphill struggle Adele Clarke's engrossing story of the search for reproductive knowledge across the twentieth century is colorful and fraught with conflict Modern scientific study of reproduction human and animal began in the United States in an overlapping triad of fields biology medicine and agriculture Clarke traces the complicated paths through which physiological approaches to reproduction led to endocrinological approaches creating along the way new technoscientific products from contraceptives to hormone therapies to new modes of assisted conception for both humans and animals She focuses on the changing relations and often uneasy collaborations among scientists and the key social worlds most interested in their work major philanthropists and a wide array of feminist and medical birth control and eugenics advocates and recounts vividly how the reproductive sciences slowly acquired standing By the 1960s reproduction was disciplined and the young and contested scientific enterprise proved remarkably successful at attracting private funding and support But the controversies continue

as women the targeted consumers create their own reproductive agendas around the world Elucidating the deep cultural tensions that have permeated reproductive topics historically and in the present *Disciplining Reproduction* gets to the heart of the twentieth century's drive to rationalize reproduction human and nonhuman in order to control life itself This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1998 *Women, Medicine, Ethics and the Law* Susan Sherwin, Barbara Parish, 2020-09-10 This title was first published in 2002 A collection of articles focused on women within a general study of medicine ethics and the law Topics covered include areas where the institutions of medicine ethics and the law intersect in women's reproductive and sexual lives the impact of legal policies and dominant ethical beliefs on many aspects of women's health and the health practices and policies of bioethics and health law The editors recognise that it is important not to lose sight of social differences other than gender such as race ethnicity class age sexuality religion level of physical and mental ability and family relationships In their approach they seek to consider the lives and experiences of women as primary Hence they focus on the question of how women's encounters with the health care system are structured by gender and other socially significant dimensions of their lives rather than the question of how women differ from the male norm *Infertility Around the Globe* Marcia C. Inhorn, Frank van Balen, 2002-05-30 These essays examine the global impact of infertility as a major reproductive health issue one that has profoundly affected the lives of countless women and men The contributors address a range of topics including how the deeply gendered nature of infertility sets the blame on women's shoulders **The Whole Truth About Contraception** Suzanne Wymelenberg, Beverly Winikoff, 1997-09-27 What birth control method is most reliable Can contraceptives protect me from AIDS How can I choose the method that's best for me Finding the answers to these and other questions about birth control can be tough On the one hand today's sexually active person has many contraceptive options On the other hand each option has pluses and minuses that must be weighed For teenagers especially asking questions about birth control can be awkward and difficult Yet teenagers may be in greatest need of the facts While there is no right method for everyone *The Whole Truth About Contraception* is the right book for anyone making decisions about contraception men and women from teenagers to middle agers It illustrates male and female anatomy and explains how conception occurs The book carefully describes the birth control methods available today barrier such as condoms and diaphragms hormonal the Pill and Norplant intrauterine devices surgical sterilization and other approaches such as the rhythm method and breastfeeding as a contraceptive For each method the authors discuss how well it prevents pregnancy its potential effects on the user's health and common problems Illustrated how to sections are provided and the authors comment on how each method typically affects sexual experience The book also discusses how birth control products can be

obtained and their cost Precautions tips on usage and other features throughout the book will help each reader decide what type of contraception is best for his or her age personal preferences and situation in life The Whole Truth About Contraception gives up to date information on new products such as the female condom and the nonlatex male condom The book provides details about contraception and sexually transmitted diseases with an emphasis on AIDS Also offered is an expanded discussion of emergency contraception designed for use after unprotected sex The book includes a full and factual discussion of abortion Contraception may be the most important and deeply personal choice anyone has to make This book provides the straight facts that will make the decision easier and the results better for everyone **Raising Families the**
