

SCIENCE

by Martin Dejnicky

Everything works,
because of science.
Even your old
kitchen appliance.
What about your
mom's car?
Without science,
it wouldn't go far.
With science we could make,
a computer or phone,
If you want a twin,
just ask for a clone.
Science will explain,
nature and trees,
It's also used,
to find cures for disease.
Science is cool,
the evidence is clear,
It's so much fun,
enjoy it my dear.

Science And Other Poems:

Science and Other Poems Alison Hawthorne Deming, 1994-03-01 I greatly admire Alison Deming's lucid and precise language her stunning metaphors her passion her wild and generous spirit her humor her formal cunning I am taken as all readers will be by the knowledge she displays and how she puts this knowledge to a poetic use but I am equally taken I am more taken by the wisdom that lies behind the knowledge I am amazed and delighted by her authority and tenacity She is of this world she lives in it and for better or worse it is the world she settles for and she understands that even if she must rage a little and sometimes more than a little she is one of its citizens Like every original poet she appears to have sprung full blown out of Zeus head I want to say but Aphrodite is here as well as Athena the ocean as well as the mountain I congratulate her on this fine book Gerald Stern Alison Hawthorne Deming brings to her first collection of verse the kinds of scrupulous observation and clear eyed analysis that characterize scientific inquiry as well as a poet's eye for the telling moment *Science and Other Poems* establishes astonishing parallels between the mute inexorable processes of the physical universe and the dark mysteries of the human heart parallels so clearly wrought and convincing that we wonder why we had not recognized them before *Caffe Trieste* lays bare the unexamined terror and sorrow that underlie the proliferation of faux fifties kitsch then strips the veil of spacious grace from the decade and reveals it as it was for those who lived it bombs spread like bacteria on culture plates when the cost of a family staying together might be Stelazine and high voltage erasures They're just American all shine and no pain In the chilling *Alliance* Ohio a mother and daughter suddenly find themselves stranded in a world of predators a poisonous world charged with sexual threat where every smile every gesture drips with sly menace Yet moments of dislocation can also be cause for rejoicing as when a speaker after surprising a bat in the house is moved to rapture by the sight of the night sky Every page of *Science and Other Poems* is alive with startling juxtapositions eerie parallels abrupt shifts of tone and image after image of crystalline perfection as in this dazzling evocation of soft shelled crabs their finely stippled bodies that give to the touch translucent as Japanese lanterns These poems imbue everything from the microscopic to the stellar with wonder Each instant of illumination like poetry itself brings the world alive with a faithfulness deeper than seeing **The Cant of Science, and Other Tales** James Matthias Russell, 1871

Instinct-Science Gurdev Boparai, 2010 *Instinct Science Other Poems* *Rough Ascension and Other Poems of Science* Arthur J. Stewart, 2003 *Resistance to Science in Contemporary American Poetry* Bryan Walpert, 2011-09-26 This book examines types of resistance in contemporary poetry to the authority of scientific knowledge tracing the source of these resistances to both their literary precedents and the scientific zeitgeists that helped to produce them Walpert argues that contemporary poetry offers a palimpsest of resistance using as case studies the poets Alison Hawthorne Deming Pattiann Rogers Albert Goldbarth and Joan Retallack to trace the recapitulation of romantic arguments inherited from Keats Shelley and Coleridge which in turn were produced in part in response to Newtonian physics modernist arguments inherited from

Eliot and Pound arguments influenced in part by relativity and quantum theory and postmodernist arguments arguments informed by post structuralist theory e g Barthes Derrida Foucault with affinities to arguments for the limitations of science in the philosophy sociology and rhetoric of science Some of these poems reveal the discursive ideologies of scientific language reveal in other words the performativity of scientific language In doing so these poems themselves can also be read as performative acts and therefore as forms of intervention rather than representation Reading Retallack alongside science studies scholar Karen Barad the book concludes by proposing that viewing knowledge as a form of intervention rather than representation offers a bridge between contemporary poetry and science

The Science of Language Friedrich Max Müller,1899 **The Advancement of Science** Sir Edwin Ray Lankester,1890 Transactions of the National Association for the Promotion of Social Science National Association for the Promotion of Social Science (Great Britain),1860 The volume for 1886 contains the proceedings of the Conference on temperance legislation London 1886 **Museum of Foreign Literature, Science and Art** ,1839 *The Saturday Review of Politics, Literature, Science and Art* ,1856
