Science And Spectacle The Work Of Jodrell Bank In Postwar British Culture:

Science and Spectacle John Agar, 2014-02-04 Science and Spectacle relates the construction of the telescope to the politics and culture of post war Britain From radar and atomic weapons to the Festival of Britain and later Harold Wilson's rhetoric of scientific revolution science formed a cultural resource from which post war careers and a national identity could be built The Jodrell Bank Radio Telescope was once a symbol of British science and a much needed prestigious project for the Department of Scientific and Industrial Research but it also raised questions regarding the proper role of universities as sites for scientific research

Science and Spectacle Jon Agar, 1998 **International Science Between the World Wars** N. L. Krementsov, 2005 This book addresses the function of international science through a detailed study of international congresses in genetics held from 1899-1939 *Instruments, Travel and Science* Marie Noëlle Bourguet, Christian Licoppe, H. Otto Sibum, 2003-08-29 We are now accustomed to conceive of science as an instrumental activity producing numbers measurements and graphs by means of sophisticated devices This book investigates the historical process that gave rise to this instrumental culture The contributors trace the displacement of instruments across the globe the spread of practices or precision and the circulation and appropriation of skills and knowledge Through comparative and contextual approaches the volume confronts the tension between the local and the global examining the process of the universalization of science Bringing together case studies ranging from the seventeenth to the twentieth centuries contributors discuss French German and British initiatives as well as the knowledge and techniques of travellers in countries such as India Africa South East Asia and the Americas Students and researchers interested in the history of science in both Western and non Western cultures will find this book a valuable and thought provoking read **Science and Spirituality**

David Knight, 2023-04-14 Until the end of the eighteenth century almost everyone believed that the empirical world of science could produce evidence for a wise and loving God By the twenty first century this comforting certainty has almost vanished What caused such a cataclysmic change in attitudes to science and to the world Science and Spirituality offers a new history of the interaction between Western science and faith which explores their volatile connection and challenges the myth of their being locked in inevitable conflict Journeying from the French Revolution to the present day and taking in such figures as Francis Bacon Ren Descartes Charles Darwin Immanuel Kant Albert Einstein Mary Shelley and Stephen Hawking David Knight shows how science evolved from medieval and Renaissance forms of natural theology into the empirical

discipline we know today Focusing on the overthrow of Church and State in revolutionary France and on the crucial nineteenth century period when a newly emerging scientific community rendered science culturally accessible Science and Spirituality shows how scientific disenchantment has provided some of our most flexible and powerful metaphors for God such as the hidden puppet master and the blind watchmaker and illustrates how questions of moral and spiritual value continue to intervene in scientific endeavour

Science and Ideology Mark Walker,2013-10-11 Does science work best in a democracy Were Soviet or Nazi science fundamentally different from science in the USA These questions have been passionately debated in the recent past Particular developments in science took place under particular political regimes but they may or may not have been directly determined by them Science and Ideology brings together a number of comparative case studies to examine the relationship between science and the dominant ideology of a state Cybernetics in the USA is compared to France and the Soviet Union Postwar Allied science policy in occupied Germany is juxtaposed to that in Japan The essays are narrowly focussed yet cover a wide range of countries and ideologies The collection provides a unique comparative history of scientific policies and practices in the 20th century

A Single Sky David P.D. Munns,2012-10-26 How radio astronomers challenged national borders disciplinary boundaries and the constraints of vision to create an international scientific community For more than three thousand years the science of astronomy depended on visible light In just the last sixty years radio technology has fundamentally altered how astronomers see the universe Combining the wartime innovation of radar and the established standards of traditional optical telescopes the radio telescope offered humanity a new vision of the universe In A Single Sky the historian David Munns explains how the idea of the radio telescope emerged from a new scientific community uniting the power of radio with the international aspirations of the discipline of astronomy The radio astronomers challenged Cold War era rivalries by forging a united scientific community looking at a single sky Munns tells the interconnecting stories of Australian British Dutch and American radio astronomers all seeking to learn how to see the universe by means of radio Jointly this international array of radio astronomers built a new community style of science opposing the glamour of nuclear physics A Single Sky describes a communitarian style of science a culture of interdisciplinary and international integration and cooperation and counters the notion that recent science has been driven by competition Collaboration or what a prominent radio astronomer called a blending of radio invention and astronomical insight produced a science as revolutionary as Galileo s first observations with a telescope Working together the community of radio astronomers revealed the structure of the galaxy

Global Science and National Sovereignty Grégoire Mallard,Catherine Paradeise,Ashveen Peerbaye,2010-04-15 Global Science and National Sovereignty Studies in Historical Sociology of Science provides detailed case studies ranging from post War nuclear science to contemporary climatology of how sovereignty has been constructed reaffirmed and transformed in the twentieth century by the construction of scientific disciplines knowledge practices and research objects
