Humans, Animals, and U.S. Society in the Long Nineteenth Century: A Documentary History Dominik Ohrem, 2025-11-18 Volume I traces the significance of animals and the problem of animality within the currents of U S social and scientific thought during a period marked by a

rapid expansion of American and transatlantic print culture. It provides insights into how evolving ideas about animal intelligence, sociality, morality, and language interacted with contemporary notions of human nature in ways that could be mobilised both to defend and to challenge traditional claims to human uniqueness and rigid distinctions between human and animal life.

Mary Putnam Jacobi and the Politics of Medicine in Nineteenth-Century America Carla Bittel, 2012-06-01 In the late nineteenth century, as Americans debated the woman question, a battle over the meaning of biology arose in the medical profession. Some medical men claimed that women were naturally weak, that education would make them physically ill, and that women physicians endangered the profession. Mary Putnam Jacobi (1842-1906), a physician from New York, worked to prove them wrong and argued that social restrictions, not biology, threatened female health. *Mary Putnam Jacobi and the Politics of Medicine in Nineteenth-Century America* is the first full-length biography of Mary Putnam Jacobi, the most significant woman physician of her era and an outspoken advocate for women's rights. Jacobi rose to national prominence in the 1870s and went on to practice medicine, teach, and conduct research for over three decades. She campaigned for co-education, professional opportunities, labor reform, and suffrage, the most important women's rights issues of her day. Downplaying gender differences, she used the laboratory to prove that women were biologically capable of working, learning, and voting. Science, she believed, held the key to promoting and producing gender equality. Carla Bittel's biography of Jacobi offers a piercing view of the role of science in nineteenth-century women's rights movements and provides a historical perspective on continuing debates about gender and science today.

Film Serials and the American Cinema, 1910-1940 Ilka Brasch, 2025-10-01 Before the advent of television, cinema offered serialized films as a source of weekly entertainment. This book traces the history from the days of silent-screen heroines to the sound era's daring adventure serials, unearthing a thriving film culture beyond the self-contained feature. Through extensive archival research, Ilka Brasch details the aesthetic appeals of film serials within their context of marketing and exhibition, looking at how they adapted the pleasures of a flourishing crime-fiction culture to both serial visual culture and the affordances of the media modernity of the early 20th century. The study furthermore traces the relationship of film serials to the broadcast models of radio and television and thereby shows how film serials introduced modes of storytelling that informed popular culture even beyond the serial's demise.

The Incorporation of America Alan Trachtenberg, 2007-02-06 Analyzes the development of the U.S.'s modern socioeconomic structure in the late nineteenth century, discussing factors such as westward expansion, mechanization, labor unrest, and the growth of cities.

Scientists and Swindlers Paul Lucier, 2022-02-03 An insightful account of the early fossil-fuel industry, the rise of the professional consultant, and the nexus between science and money. *Technology and Culture* In this impressively researched, highly original work, Paul Lucier explains how science became an integral part of American technology and industry in the nineteenth century. *Scientists and Swindlers* introduces us to a new service of professionals: the consulting scientists. Lucier follows these entrepreneurial men of science on their wide-ranging commercial engagements.

from the shores of Nova Scotia to the coast of California and shows how their innovative work fueled the rapid growth of the American coal and oil industries and the rise of American geology and chemistry Along the way he explores the decisive battles over expertise and authority the high stakes court cases over patenting research the intriguing and often humorous exploits of swindlers and the profound ethical challenges of doing science for money Starting with the small surveying businesses of the 1830s and reaching to the origins of applied science in the 1880s Lucier recounts the complex and curious relations that evolved as geologists chemists capitalists and politicians worked to establish scientific research as a legitimate regularly compensated and respected enterprise This sweeping narrative enriches our understanding of how the rocks beneath our feet became invaluable resources for science technology and industry *The Oxford History of Historical Writing* Axel Schneider, Daniel Woolf, 2011-05-05 The fifth volume of The Oxford History of Historical Writing offers essays by leading scholars on the writing of history globally since 1945 Divided into two parts part one selects and surveys theoretical and interdisciplinary approaches to history and part two examines select national and regional historiographies throughout the world It aims at once to provide an authoritative survey of the field and to provoke cross cultural comparisons This is chronologically the last of five volumes in a series that explores representations of the past across the globe from the beginning of writing to the present day *Mirror-image twins* Edwin T. Layton, 1971 *American Studies* Jack Salzman, American Studies Association, 1986-08-29 A major three volume bibliography including an additional supplement of an annotated listing of American Studies monographs published between 1900 and 1988
