Science And Technology In Post Mao China:

Science and Technology in Post-Mao China Denis Fred Simon, Merle Goldman, 2020-10-26 Along with the political and economic reforms that have characterized the post Mao era in China there has been a potentially revolutionary change in Chinese science and technology Here sixteen scholars examine various facets of the current science and technology scene comparing it with the past and speculating about future trends Two chapters dealing with science under the Nationalists and under Mao are followed by a section of extensive analysis of reforms under Deng Xiaoping focusing on the organizational system the use of human resources and the emerging response to market forces Chapters dealing with changes in medical care agriculture and military research and development demonstrate how these reforms have affected specific areas during the Chinese shift away from Party orthodoxy and Maoist populism toward professional expertise as the guiding principle in science and technology Three further chapters deal with China's interface with the world at large in the process of technology transfer Both the introductory and concluding chapters describe the tension between the Chinese Communist Party structure with its inclinations toward strict vertical control and the scientific and technological community's need for a free flow of information across organizational disciplinary and national boundaries

Science and Dissent in Post-Mao China H. Lyman Miller, 1996 When in 1989 Chinese astrophysicist Fang Lizhi sought asylum for months in the U S Embassy in Beijing later escaping to the West worldwide attention focused on the plight of liberal intellectuals in China In *Science and Dissent in Post Mao China* H Lyman Miller examines the scientific community in China and prominent members such as Fang and physicist and historian of science Xu Liangying Drawing on Chinese academic journals newspapers interviews and correspondence with Chinese scientists he considers the evolution of China's science policy and its impact on China's scientific community He illuminates the professional and humanistic values that impelled scientific intellectuals on their course toward open liberal political dissent It is ironic that scientific dissidence in China arose in opposition to a regime supportive of and initially supported by scientists In the late 1970s scientists were called upon to help implement reforms orchestrated by Deng Xiaoping's regime which attached a high priority to science and technology The regime worked to rebuild China's civilian science community and sought to enhance the standing of scientists while at the same time it continued to oppose political pluralism and suppress dissidence The political philosophy of revolutionary China has taught generations of scientists that explanation of the entire natural world from subatomic particles to galaxies falls under the jurisdiction of natural dialectics a branch of Marxism Leninism Escalating debates in the 1980s questioned the relationship of Marxism to science and led some to positions of open political dissent At issue were the autonomy of China's scientific community and the conduct of science as well as the validity and jurisdiction of Marxist Leninist philosophy and hence the fundamental legitimacy of the political system itself Miller concludes that the emergence of a renewed liberal voice in China in the 1980s was in significant part an extension into politics of what some scientists believed to be the norms of healthy

science scientific dissidence was an unintended but natural consequence of the Deng regime's reforms. This thoughtful study of science as a powerful belief system and as a source of political and social values in contemporary China will appeal to a diverse audience including readers interested in Chinese politics and society, comparative politics, communist regimes, the political sociology of science, and the history of ideas.

Bureaucracy, Politics, and Decision Making in Post-Mao China
Kenneth G. Lieberthal, David M. Lampton, 2024-07-26 Using a model of fragmented authoritarianism, this volume sharpens our view of the inner workings of the Chinese bureaucracy. The contributors' interviews with politically well-placed bureaucrats and scholars, along with documentary and field research, illuminate the bargaining and maneuvering among officials on the national, provincial, and local levels.

CONTRIBUTORS: Nina P. Halpern, Carol Lee Hamrin, David M. Lampton, Kenneth G. Lieberthal, Melanie Manion, Barry Naughton, Lynne Paine, Jonathan D. Pollack, Susan L. Shirk, Paul E. Schroeder, Andrew G. Walder, David Zweig.

This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1992.

Policy Conflicts in Post-Mao China: A Documentary Survey with Analysis
John P. Burns, Stanley Rosen, 2016-07-08 This is a collection of essays exploring the deep-rooted problems presented by the Three Gorges dam project that the Chinese government are trying to disguise or suppress.

brought together by Dai Qing, an investigative journalist at the risk of her own freedom.

Civilising Citizens in Post-Mao China
Delia Lin, 2017-07-14 Political discourse in contemporary China is intimately linked to the patriotic reverie of restoring China as a great civilisation, a dream of reformers since the beginning of the twentieth century. The concept and use of *suzhi*, a term that denotes the idea of cultivating a quality citizenship, is central to this programme of rejuvenation and is enjoying a revival. This book therefore offers an accessible and comprehensive analysis of *suzhi*, investigating the underlying cultural, philosophical, and psychological foundations that propel the *suzhi* discourse.

Using a new method to analyse Chinese governance, one that is both historical and discursive in approach, the book demonstrates how *suzhi* has been made into a political resource by the Chinese Communist Party. State journeying from Confucianism to socialism, ultimately it asks the question: if we cannot rely on Western models of governance to explain how China is governed, what method of analysis can we use?

Making use of over 200 Chinese language primary sources, the book highlights the link between *suzhi* and similar discourses in post-Mao China, including those centring on notions of civilisation, harmonious society, and the China dream. As the first book to provide an in-depth study of *suzhi* and its relevance in Chinese society, *Civilising Citizens in Post-Mao China* will be useful for students and scholars of Chinese studies, Chinese politics, and sociology.

Educational Reform in Post-Mao China
Nalini Mathur, 2007

Education and Society in Post-Mao China
Edward Vickers, Zeng Xiaodong, 2017-06-26 The post-Mao period has witnessed rapid social and

economic transformation in all walks of Chinese life much of it fuelled by or reflected in changes to the country's education system This book analyses the development of that system since the abandonment of radical Maoism and the inauguration of Reform and Opening in the late 1970s The principal focus is on formal education in schools and conventional institutions of tertiary education but there is also some discussion of preschools vocational training and learning in non formal contexts The book begins with a discussion of the historical and comparative context for evaluating China's educational achievements followed by an extensive discussion of the key transitions in education policymaking during the Reform and Opening period This informs the subsequent examination of changes affecting the different phases of education from preschool to tertiary level There are also chapters dealing specifically with the financing and administration of schooling curriculum development the public examinations system the teaching profession the phenomenon of marketisation and the international dimension of Chinese education The book concludes with an assessment of the social consequences of educational change in the post Mao era and a critical discussion of the recent fashion in certain Western countries for hailing China as an educational model The analysis is supported by a wealth of sources primary and secondary textual and statistical and is informed by both authors' wide ranging experience of Chinese education As the first monograph on China's educational development during the forty years of the post Mao era this book will be essential reading for all those seeking to understand the world's largest education system It will also be crucial reference for educational comparativists and for scholars from various disciplinary backgrounds researching contemporary Chinese society
