Science and Technology in Southern Europe Carlos Otero Hidalgo, 1997 This reference provides an overview of one of the fastest developing economic areas in science and technology Spain Italy Portugal and Greece These four EU countries whose science and technology development is heavily funded by the EU are emerging from underdeveloped status to a more level footing with other EU countries It illustrates details of funding in particular industry sectors and maps out European funding for science and technology in the region [Political Representation in Southern Europe and Latin America](#) André Freire, Mélanie Barragán, Xavier Coller, Marco Lisi, Emmanouil Tsatsanis, 2020-06-03 This collective volume with contributions from experts on these regions examines broader questions about the current crises The Great Recession and The Commodity Crisis and the associated changes in political representation in both regions It provides a general overview of political representation studies in Southern Europe and Latin America and builds bridges between the two traditions of political representation studies affording greater understanding of developments in each region and promote future research collaboration between Southern Europe and Latin America Finally the book addresses questions of continuity and change in patterns of political representation after the onset of the two economic crises specifically examining issues such as changes in citizens democratic support and trust in political representatives and institutions in descriptive representation in the sociodemographic profile of MPs and in substantive representation in the link between voters and MPs in terms of ideological congruence and or policy issue orientations This book will be of key interest to scholars and students of political elites political representation European and Latin American politics studies and more broadly to comparative politics **The Oxford Handbook of Postwar European History** Dan Stone, 2012-05-17 The postwar period is no longer current affairs but is becoming the recent past As such it is increasingly attracting the attentions of historians Whilst the Cold War has long been a mainstay of political science and contemporary history recent research approaches postwar Europe in many different ways all of which are represented in the 35 chapters of this book As well as diplomatic political institutional economic and social history the The Oxford Handbook of Postwar European History contains chapters which approach the past through the lenses of gender espionage art and architecture technology agriculture heritage postcolonialism memory and generational change and shows how the history of postwar Europe can be enriched by looking to disciplines such as anthropology and philosophy The Handbook covers all of Europe with a notable focus on Eastern Europe Including subjects as diverse as the meaning of Europe and European identity southern Europe after dictatorship the cultural meanings of the bomb the 1968 student uprisings immigration Americanization welfare leisure decolonization the Wars of Yugoslav Succession and coming to terms with the Nazi past the thirty five essays in this Handbook offer an unparalleled coverage of postwar European history that offers far more than the standard Cold War framework Readers will find self contained state of the art analyses of major subjects each written by acknowledged experts as well as stimulating and novel approaches to newer topics Combining

empirical rigour and adventurous conceptual analysis this Handbook offers in one substantial volume a guide to the numerous ways in which historians are now rewriting the history of postwar Europe *Environmental Politics in Southern Europe* K. Eder, M. Kousis, 2012-12-06 Europe is sometimes credited with a polis but not a demos Political integration and economic globalisation cannot diminish local identity and social memories This fascinating collection of national case studies shows why there will always be a local demos located in ecology economy and society But there will never be a transnational demos precisely because locality is the basis for meaningful sustainability Long may it triumph Tim O Riordan CSERGE University of East Anglia The book offers a refreshing perspective on the diversity of Europe and at the same time on the interdependence of the policies economies and societies of European countries Going beyond the dichotomies of good and bad and leaders and laggards in environmental matters the authors contribute to a different understanding of the North South divide in the process of European integration Angela Liberatore European Commission Directorate General for Research This is a self consciously revisionist volume whose findings are theoretically significant policy relevant and timely Its insistence on bringing society back in its debunking of the notion of a Mediterranean syndrome its emphasis on developmental leapfrogging capacity of late comers to emerge as leaders in contexts of late modernity and its systematic attempt to reconceptualize the politics of Europeanization should be carefully listed to students and policy makers concerned with collective action Southern Europe European integration and environmental politics P Nikiforos Diamandouros University of Athens
