

The authors present a full plate of historical, organizational, and observational data. While James sought a peaceful channeling of warlike instincts, Eberly, Sherraden, and their confederates roam far beyond James's narrow scope, tapping societal, cultural, organizational, and social-psychological themes. Consequently, the coupling with James seems a bit contrived. More seriously, the title's spotlight on James's non-military service as "the moral equivalent of war" misleads. None of the programs in the nine countries purports to provide that. At times the chapters seem a bit uneven, largely because the programs they describe exhibit such diversity in structure and purpose.

Fortunately the editors, along with Margaret Sherraden, do a fine job in the last two chapters of pulling it together and providing policy implications. They argue persuasively that nonmilitary service programs in these nine nations provide tangible public goods as well as important benefits more difficult to measure. Noting that opinion polls in the United States have consistently detected substantial support for voluntary nonmilitary service, the editors outline what a successful program here might look like. The program should be voluntary, draw participants from diverse segments of the population, and address practical problems. In the process, it should promote cultural integration and cooperative patterns of achievement. The term of participation should be a full-time for one year, preferably after graduation from high school, as a way of earning entitlements for college—a kind of civilian G.I. Bill. It might also provide an option for subsequent overseas service as a reward for having performed well on the homefront.

All in all, readers will find this edited volume useful and informative, in particular because cross-national data give shape to its proposal for voluntary nonmilitary service in the United States.
