History of Science in the Eighteenth Century Ray Spangenburg, Diane K Moser, 1999 [A History of Science, Technology, and Philosophy in the Eighteenth Century](#) Abraham Wolf, Douglas McKie, 1952 Publisher Fact Sheet Why women join hate groups how they participate in them why they stay *Laura Bassi and Science in 18th Century Europe* Monique Frize, 2013-07-08 This book presents the extraordinary story of a Bolognese woman of the settecento Laura Maria Caterina Bassi 1711 1778 defended 49 Theses at the University of Bologna on April 17 1732 and was awarded a doctoral degree on May 12 of the same year Three weeks before her defense she was made a member of the Academy of Sciences in Bologna On June 27 she defended 12 additional Theses Several of the 61 Theses were on physics and other science topics Laura was drawn by the philosophy of Newton at a time when most scientists in Europe were still focused on Descartes and Galen This last set of Theses was to encourage the University of Bologna to provide a lectureship to Laura which they did on October 29 1732 Although quite famous in her day Laura Bassi is unfortunately not remembered much today This book presents Bassi within the context of the century when she lived and worked an era where no women could attend university anywhere in the world and even less become a professor or a member of an academy Laura was appointed to the Chair of experimental physics in 1776 until her death Her story is an amazing one Laura was a mother a wife and a good scientist for over 30 years She made the transition from the old science to the new very early on in her career Her work was centered on real problems that the City of Bologna needed to solve It was an exciting time of discovery and she was at the edge of it all the way
