this metamorphosis among Laotian women Throughout she poses questions such as What has happened to women s traditional sources of control over their own and others activities since the 1975 socialist revolution Have their traditional sources of power or autonomy expanded or contracted as changing conditions have allowed other groups to appropriate women s traditional resources and roles Have the dramatic changes had different effects on rural women of differing ethnic backgrounds and varying economic means Focusing on women from three major ethnic groups the lowland Lao the Khmu and the Hmong Ireson examines the different ways they have responded to political and economic changes She shows us that the Laotian experience reveals in microcosm the processes of change toward specialization and integration of women s work into national and global economies and explains how this shift deeply affects women s lives **Forestry ...** Boy Scouts of America,1925 Environmental and Forest Governance Michael Böcher,Lukas Giessen,Daniela Kleinschmit,2008 This edited volume comprises contributions to the international conference on the Scientific Framework of Environmental and Forest Governance The role of discourses and expertise which was organised by the Chair of Forest and Nature Conservation Policy of the Georg August University in G ttingen Germany in August 2007 It accounts for the increasing attention of the governance concept in environmental and forest policy research The volume in detail addresses the role of discourses and expertise within the overall conceptual framework of governance both from a theoretical and empirical point of view in environmental and forest related policies It concludes that new modes of governance seem to represent a fruitful environment in which discourses and expertise and their interactions can be seen as important aspects for the analysis of policy processes **Profiles of U.S.A. Hayes,Susan L. Stout,Ralph H. Crawford,Anne P. Hoover,2014-07-22 USDA Forest Service Experimental Forests and Ranges EFRs are scientific treasures providing secure protected research sites where complex and diverse ecological processes are studied over the long term This book offers several examples of the dynamic interactions among questions of public concern or policy EFR research and natural resource management practices and policies Often trends observed or expected in the early years of a research program are contradicted or confounded as the research record extends over decades The EFRs are among the few areas in the US where such long term research has been carried out by teams of scientists Changes in society s needs and values can also redirect research programs Each chapter of this book reflects the interplay between the ecological results that emerge from a long term research project and the social forces that influence questions asked and resources invested in ecological research While these stories include summaries and syntheses of traditional research results they offer a distinctly new perspective a larger and more complete

picture than that provided by a more typical 5 year study They also provide examples of long term research on EFRs that have provided answers for questions not even imagined at the time the study was installed
