Could a ship be constructed that would be able to survive the global flood described in biblical book of Genesis? Could it be built without the modern techniques of today being available to Noah? This groundbreaking book and DVD set answers both of these questions with a resounding yes. Join naval expert and mechanical engineer Tim Lovett in thinking outside the box as you consider critical research in this innovative study on Noah's ark. Lovett builds on traditional research into this historic event using the latest techniques in computer modeling and testing. Includes insight and context by pioneering creationist researcher Dr John Whitcomb. Unveils a new ark design based on biblical information and shipbuilding principles. Beautiful illustrations and photos reveal facets of design and construction techniques. Animations interviews and images of the Ark explain the most perplexing questions. Remaining faithful to the biblical dimensions Lovett's updated design similar to that of ancient sailing vessels is based on established principles in ship design and unique research. He reveals a feasible ark design explores the impact of flood waters on the vessel and provides remarkable insight and analysis into the skills and techniques needed to construct it. Look inside the ship that saved Noah.
