Science Myth Reality The Black Family In One Half Century Of Research:

Science, Myth, Reality Eleanor Engram, 1982-06-18 **Afro-American Life, History and Culture** ,1985 Black Families at the Crossroads Leonor Boulton Johnson, Robert Staples, 2004-09-24 This updated edition of the classic book Black Families at the Crossroads offers a comprehensive examination of the diverse and complex issues surrounding Black families. Leonor Boulton Johnson and Robert Staples combine more than sixty years of writing and research on Black families to offer insights into the pre slavery development of the Black middle class internal processes that affect all class strata among Black American families the impact of race on modern Black immigrant families the interaction of external forces and internal norms at each stage of the Black family life cycle and public policies that provide challenges and promising prospects for the continuing resilience of the Black family as an American institution This thoroughly revised edition features new research including empirical studies and theoretical applications and a review of significant social policies and economic changes in the past decade and their impact on Black families Sourcebook of Family Theories and Methods Pauline Boss, William J. Doherty, Ralph LaRossa, Walter R. Schumm, Suzanne K. Steinmetz, 2008-11-19 Origins We call this book on theoretical orientations and methodological strategies in family studies a sourcebook because it details the social and personal roots i e sources from which these orientations and strategies flow Thus an appropriate way to preface this book is to talk first of its roots its beginnings In the mid 1980s there emerged in some quarters the sense that it was time for family studies to take stock of itself A goal was thus set to write a book that like Janus would face both backward and forward a book that would give readers both a perspective on the past and a map for the future There were precedents for such a project The Handbook of Marriage and the Family edited by Harold Christensen and published in 1964 the two Contemporary Theories about the Family volumes edited by Wesley Burr Reuben Hill F Ivan Nye and Ira Reiss published in 1979 and the Handbook of Marriage and the Family edited by Marvin Sussman and Suzanne Steinmetz then in production **American Childhoods** Joseph E. Illick, 2013-09-04 Selected by Choice magazine as an Outstanding Academic Title The experiences of children in America have long been a source of scholarly fascination and general interest In American Childhoods Joseph Illick brings together his own extensive research and a synthesis of literature from a range of disciplines to present the first comprehensive cross cultural history of childhood in America Beginning with American Indians European settlers and African slaves and their differing perceptions of how children should be raised American Childhoods moves to the nineteenth century and the rise of industrialization to introduce the offspring of the emerging urban middle and working classes Illick reveals that while rural and working class children continued to toil from an early age as they had in the colonial period childhood among the urban middle class became recognized as a distinct phase of life with a continuing emphasis on gender differences Illick then discusses how the public school system was created in the nineteenth century to assimilate immigrants and discipline all children and observes its major role in age grouping children as well as drawing working class youngsters

from factories to classrooms At the same time such social problems as juvenile delinquency were confronted by private charities and ultimately by the state Concluding his sweeping study the author presents the progeny of suburban inner city and rural Americans in the twentieth century highlighting the growing disparity of opportunities available to children of decaying cities and the booming suburbs Consistently making connections between economics psychology commerce sociology and anthropology American Childhoods is rich with insight into the elusive world of children Grounded firmly in social and cultural history and written in lucid accessible prose the book demonstrates how children s experiences have varied dramatically through time and across space and how the idea of childhood has meant vastly different things to different groups in American society

Blackness and Social Mobility in Brazil Doreen Joy Gordon, 2022-03-07 This book examines the emergence of the black middle classes in urban Brazil after 30 years of black mobilization and against the backdrop of deep economic cultural and political transformations taking place in recent decades within the country One of the consequences of such transformations is said to be the restructuring of gender race and class relations Utilizing qualitative research techniques such as ethnography interviews life histories and focus groups among Afro descendant families in the Northeast region of the country the book explores contemporary race class and gender inequalities and their impact on daily lived experience It reveals the dynamics underlying upward mobility the diverse modes and experiences of social ascent into the middle classes and the everyday negotiations involved in establishing one s status in the socio racial hierarchy which are not captured by other more macro lenses While some of these patterns are not peculiar to black people this book argues that race shaped the contours and possibilities of social mobility in particular ways This book is critical reading for specialists in the fields of inequality and race class and gender relations

Disfigured Images Patricia Morton, 1991-05-21 Much of the material unearthed by this book is ugly states historiographer Patricia Morton who exposes profoundly dehumanizing constructions of reality embedded in American scholarship as it has attempted to render the history of the Afro American woman Focusing on the scholarly literature of fact rather than on fictional or popular portrayals Disfigured Images explores the telling and frequent mis telling of the story of black women during a century of American historiography beginning in the late nineteenth century and extending to the present Morton finds that during this period a large body of scholarly literature was generated that presented little fact and much fiction about black women s history The book s ten chapters take long and lingering looks at the black woman s prefabricated past Contemporary revisionist studies with their goals of discovering and articulating the real nature of the slave woman s experience and role are thoroughly examined in the conclusion Disfigured Images complements current work by recognizing in its findings a long needed refutation of a caricatured mythical version of black women s history Morton s introduction presents an overview of her subject emphasizing the mythical ingrained nature of the black woman s image in historiography as a natural and permanent slave The succeeding chapters use historical and social science works as primary sources to explore such issues as the foundations of sexism racism the writing of W E B DuBois twentieth century notions of black women current black and women s studies new and old images of motherhood and more The conclusion investigates how and why recent American historiographical scholarship has banished the old myths by presenting a more accurate history of black women This keenly perceptive and original study should find an influential place in both women s studies and black studies programs as well as in American history American literature and sociology departments With its unusually complete panorama of the period covered it would be a unique and valuable addition to courses such as slavery the American South women in North American history Afro American history race and sex in American literature and discourse and the sociology of race
