### **Mutants, Androids, and Aliens**

James A. Tyner, 2025-05-19. In both literature and film, mutants, androids, and aliens have long functioned as humanity's Other nonhuman bodies serving as surrogates to explore humanity's prejudice, bigotry, and hatred. Scholars working in fields of feminism, ethnic studies, queer studies, and disability studies, among others, have deconstructed representations of the Othered body and the ways these fictional depictions provide insight into the contested terrains of identity, subjectivity, and personhood. In science fiction, more broadly, and the superhero genre in particular, the fictional Other, often a superhero or a villain, is juxtaposed against the normal human, and such Others have long been the subject of academic investigation. Author James A. Tyner shifts this scholarly focus to consider the ordinary humans who ally with or oppose Othered superheroes. Law enforcement officers, military officials, politicians, and the countless nameless civilians are all examples of humans who try to make sense of a rapidly changing, more-than-human and other-than-human universe. The resulting volume, *Mutants, Androids, and Aliens: On Being Human in the Marvel Cinematic Universe*, provides a critical posthumanist reading of being human in the Marvel Cinematic Universe (MCU). Centering the MCU's secondary human characters, including Matthew Ellis, Ellen Nadeer, Rosalind Price, as well as Jimmy Woo, Sadie Deever, Holden Radcliffe, and others, Tyner considers how these characters attempt to monitor, incarcerate, or exterminate those beings considered unnatural and thus threatening. Placing into conversation posthumanism, environmental ethics, and myriad philosophical and biological ontologies of life and death, Tyner maintains that the superhero genre reflects the current complexities of meaningful life and of what happens in society when the human is no longer the unquestioned normative standard.

### **Science Fiction, Fantasy and Horror Film Sequels,**

**Series and Remakes** Kim R. Holston, Tom Winchester, 2018-02-12. Science fiction, fantasy, and horror movies have spawned more sequels and remakes than any other film genre. Following Volume I, which covered 400 films made 1931-1995, Volume II analyzes 334 releases from 1996 through 2016. The traditional cinematic monsters are represented: Dracula, Frankenstein, the Wolf Man, a new Mummy. A new wave of popular series, inspired by comics and video games, as well as *The Lord of the Rings* trilogy, could never have been credibly produced without the advances in special effects technology. Audiences follow the exploits of superheroes like Captain America, Iron Man, Spider-Man, and Thor, and such heroines as the vampire Selene, zombie killer Alice, dystopian rebels Katniss Everdeen and Imperator Furiosa, and Soviet spy turned American agent Black Widow. The continuing depredations of Jason Voorhees, Freddy Krueger, and Michael Myers are described. Pre-1996 movies that have

since been remade are included Entries features cast and credits detailed synopsis critics reviews and original analysis

Scientific Mythologies James A. Herrick,2008-01-01 What does science have to do with science fiction What does science fiction have to do with scientists What does religion have to do with science and science fiction In the spiritual vacuum of our post Christian West new mythologies continually arise The sources of much religious speculation however may be surprising Author James Herrick directs our attention to a wide range of scientists filmmakers science fiction writers and religious philosophers and discovers there the role that science and science fiction have played in such mythmaking From scientists such as Francis Bacon Francis Crick Carl Sagan and Freeman Dyson to filmmakers such as George Lucas and Steven Spielberg to science fiction writers such as Olaf Stapledon Sir Arthur C Clarke Robert Heinlein and Isaac Asimov Herrick finds a curious collusion of science with science fiction for promoting and justifying alternative spiritualities The rise of these new mythologies he argues is no longer a curiosity at the edge of Western culture This alchemy is catalyzing a religious vision of new gods a new humanity and alien races with superior intelligence and secret knowledge This new mythology overshadows the realms of politics science and religion Should we follow such visions Does science endorse these mythologies Are we being offered a spirituality superior to the Judeo Christian tradition This book will help you decide

**The Science Fiction Film in Contemporary Hollywood** Evdokia Stefanopoulou,2023-07-27 The Science Fiction Film in Contemporary Hollywood focuses on the American science fiction SF film during the period 2001 2020 in order to provide a theoretical mapping of the genre in the context of Conglomerate Hollywood Using a social semiotics approach in a systematic corpus of films the book argues that the SF film can be delineated by two semiotic squares the first one centering on the genre s more than human ontologies SF bodies and the second one focusing on its imaginative worlds SF worlds Based on this theoretical framework the book examines the genre in six cycles which are placed in their historical context and are analyzed in relation to cultural discourses such as technological embodiment race

animal human relations environmentalism global capitalism and the techno scientific Empire By considering these cycles which include superhero films creature films space operas among others as expressions of the genre s basic oppositions the book facilitates the comparison and juxtaposition of films that have rarely been discussed in tandem offering a new perspective on the multiple articulations of the SF film in the new millennium
