Science Technology And National Policy:

Science, Technology, and National Policy Thomas Kuehn, Alan L. Porter, 2019-06-30 Science Technology and National Policy is the first collection of essays to deal with technology as it relates to and is influenced by public policy making Bringing together twenty five of the most significant papers on this topic the editors seek to provide a broad perspective to sample the full spectrum of core concerns in technology policy and to stimulate critical thinking Part One treats the social political economic and international concerns that affect technology policy Part Two examines how different government institutions deal with technology including the federal executive Congress courts and state and local governments Ideal for professional and course use this volume offers an excellent framework for discussing and coming to terms with these complex issues **National Policy and Priorities for Science and Technology Act, 1975** United States. Congress. Senate. Committee on Labor and Public Welfare. Special Subcommittee on the National Science Foundation, 1976

Science and Technology, 1990 **Science, Technology, and National Security in an Era of Global Competition** Richard H. Van Atta, 1990 Firm-Level Innovation In Africa Abiodun Egbetokun, Richmond Atta-Ankomah, Oluseye Jegede, Edward Lorenz, 2020-04-29 The literature on innovation in Africa is rapidly expanding and a recurring thread in the emergent literature is the pervasiveness of systemic weaknesses that inhibit the innovation process Despite these firms are able to innovate in Africa It is then logical to ask how do African firms manage to overcome the prevalent constraints and learn to innovate This book directly tackles this question with a view to improving our understanding of the innovation landscape in Africa The book brings together some of the latest innovation research from across the African continent ranging from Tanzania and Ethiopia in the east to Nigeria in the west The chapters included in the collection adopt different but complementary theoretical and methodological approaches to address a rich mix of interrelated issues These issues include the factors that enhance or inhibit innovation in African firms the sources of knowledge information for innovation policy options for overcoming constraints and facilitating firm level innovation the nature and roles of brokers and intermediaries in dealing with innovation constraints and in facilitating the innovation process and the role of interactive learning and acquisition of embodied technology in the innovation process This book was originally published as a special issue of Innovation and Development *Science, Technology, and National Security* President's Council of Advisors on Science and Technology (U.S.), 1992 *Technology and National Security* James Kadtke, John Wharton, National Defense University (U S), 2018-03-29 The authors present arguments about the role that technology and science will play within the international scene and globalization corridor as a way to develop a national security strategy for years to come Part of the discussion observes the past present and future of technology innovation within global governments including the sharing of data artificial intelligence AI military policy defense strategies and more For instance globalization of science and technology emerging and unpredictable threats both manmade and natural conventional and emerging weapons of mass destruction and

an inversion of technology flow from the private to public sectors all present challenges to our national security Many countries are now dramatically increasing their investments in science technology and commercialization particularly in Asia and including many nontraditional players such as Vietnam and Singapore From a grand strategic perspective one might observe that in the decades to come in a world dominated by pervasive advanced technologies the countries that are most able to create acquire and utilize these disruptive technologies will lead the world This technological capacity will be one of if not the most important global resources Technological capacity will become the new oil Other topical related products can be found here Armed Robotics Emergence Weapons Systems Life Cycles Analysis and New Strategic Realities Enhancing Identity Development at Senior Services Colleges Military Communications A Test for Technology Closer Than You Think The Implications of the Third Offset Strategy for the U S Army *National Policy and Priorities for Science and Technology Act, 1975* United States. Positing the notions of coloniality of ignorance and geopolitics of ignorance as central to coloniality and colonisation this book examines how colonialists socially produced ignorance among colonised indigenous peoples so as to render them docile and manageable Dismissing colonial descriptions of indigenous people as savages illiterate irrational prelogical mystical primitive barbaric and backward the book argues that imperialists colonialists contrived geopolitics of ignorance wherein indigenous regions were forced to become ignorant hence containable and manageable in the imperial world Questioning the provenance of modernist epistemologies the book asks why Eurocentric scholars only contest the provenance of indigenous knowledges artefacts and scientific collections Interrogating why empire sponsors the decolonisation of universities epistemologies in indigenous territories while resisting the repatriation restitution of indigenous artefacts the book also wonders why Westerners who still retain indigenous artefacts skulls and skeletons in their museums universities and private collections do not consider such artefacts and skulls to be colonising them as well The book is valuable to scholars and activists in the fields of anthropology museums and heritage studies science and technology studies decoloniality policymaking education politics sociology and development studies
