Science And Liberation:

Science and Liberation Gerben J. Stavenga, 1991 This study is an inquiry into the foundations of science evoked especially by contemporary crises Its methodological approach is determined by the fact that there are indications that basic and general assumptions underlying current research traditions should be questioned An analysis of modern physics and of elementary particle tracks in particular gives rise to the suspicion that scientific research has a fundamental blind spot characterized by a new subject object relation We encounter the same subject object relation and a corresponding concept of reality in a research programme deviating from the regular sciences viz the theology of Karl Barth Used as a means of contrast this programme can draw science's attention to a new concept of knowledge and reality possible in principle Furthermore the present inquiry brings to light that there are altogether four different subject object relations with their concomitant basic structures of reality The blind spot pointed out by the means of contrast is one of these four structures the most fundamental one to be precise Freedom and liberation prove to be essential features of this new structure Hence these features will characterize science once it develops itself further by focussing on this new structure of reality The reality then dealt with by science will turn science into liberation science

Science David Vaden House, Institute for Christian Studies, 1997 **Science, Theology, and Ethics** Ted Peters, 2017-03-02 Science challenges faith to seek fuller understanding and faith challenges science to be socially and ethically responsible This book begins with faith in God the Creator of the world and then expands our understanding of creation in light of Big Bang cosmology and new discoveries in physics Examining the expanding frontier of genetic research Ted Peters draws out implications for theological understandings of human nature and human freedom Issues discussed include methodology in science and theology eschatology in cosmology and theology freedom and responsibility in evolution and theology and genetic determinism genetic engineering and cloning in relation to freedom the commodification of human life and equitable distribution of the fruits of genetic technology The dialogue model of relationship between science and religion proposed in this book provides a common ground for the disparate voices among theologians scientists and world religions This common ground has the potential to breathe new life into current debates about the world in which we live move and have our being

Latin American Perspectives on Science and Religion Ignacio Silva, 2015-10-06 Latin America plays an increasingly important role in the development of modern Christianity yet it has been underrepresented in current scholarship on religion and science In this first book on the subject contributors explore the different ways that religion and science relate to each other **Science**, 1887 Vols for 1911-13 contain the Proceedings of the Helminthological Society of Washington ISSN 0018-0120 1st 15th meeting Science, race relations and resistance Douglas A. Lorimer, 2015-11-01 By exploring the dimensions of race race relations and resistance this book offers a new account of the British Empire's greatest failure and its most disturbing legacy Using a wide range of published and archival sources this study of racial discourse from 1870 to

1914 argues that race then as now was a contested territory within the metropolitan culture Based on a wide range of published and archival sources this book uncovers the conflicting opinions that characterised late Victorian and Edwardian discourse on the colour question It offers a revisionist account of race in science and provides original studies of the invention of the language of race relations and of resistance to race thinking led by radical abolitionists and persons of Asian and African descent living in the United Kingdom The book will be of interest to students and scholars of race colonialism and culture and to a readership interested in the history of science and race anti slavery and humanitarian movements and the roots of anti racist resistance

Reconsideration of Science and Technology I Liu Dachun,Wang Bolu,Ding Junqiang,Liu Yongmou,2022-09-30 This volume analyzes Karl Marx s understanding of science and technology and how it is associated with his focus on the perspective of history and human practice seeking to illuminate a renewed understanding of science and technology from a Marxist angle As the first volume of a three volume set that proposes to reconsider science and technology and explores how the philosophy of science and technology responds to an ever changing world the book delves into Marx s analysis of scientific and technological problems and phenomena across five chapters The authors explain the positioning of science and technology and the Marxist theoretical perspective of history and practice from which Marx s views on science and technology derive before an examination of three focal dimensions pertaining to science and technology productivity technological alienation and liberty Not always viewed as central to Marx s works discussions on science and technology are often underdeveloped but a reinterpretation of Marx s thoughts on the issues corroborates the efficacy of Marxism in terms of understanding today s world and especially the development of science and technology The volume will appeal to scholars and students interested in Marxist philosophy the philosophy of science and technology and topics related to scientific culture
