Science Communication Development:

Science Communication in the World Bernard Schiele, Michel Claessens, Shunke Shi, 2012-04-05 This volume is aimed at all those who wonder about the mechanisms and effects of the disclosure of knowledge Whether they have a professional interest in understanding these processes generally or they wish to conduct targeted investigations in the PCST field it will be useful to anyone involved in science communication including researchers academics students journalists science museum staff scientists high public profiles and information officers in scientific institutions *Science Communication* Laura Bowater, Kay Yeoman, 2012-10-25 Science communication is a rapidly expanding area and meaningful engagement between scientists and the public requires effective communication Designed to help the novice scientist get started with science communication this unique guide begins with a short history of science communication before discussing the design and delivery of an effective engagement event Along with numerous case studies written by highly regarded international contributors the book discusses how to approach face to face science communication and engagement activities with the public while providing tips to avoid potential pitfalls This book has been written for scientists at all stages of their career including undergraduates and postgraduates wishing to engage with effective science communication for the first time or looking to develop their science communication portfolio **Race and Sociocultural Inclusion in Science**

Communication Elizabeth Rasekoala, 2025-01-21 Chapter 12 is available Open Access under CC BY NC ND licence Conversations around diversity equity and inclusion in science communication are in danger of generating much concern without effecting change and systematic transformations This radical volume addresses these circular discourses and reveals the gaps in the field Putting the spotlight on the marginalised voices of so called racialised minorities and those from Global South regions it interrogates the global footprint of the science communication enterprise Moving beyond tokenistic and extractive approaches this book creates a space for academics and practitioners to challenge issues around race and sociocultural inclusion providing mutual learning paradigm shifting perspectives and innovative ways forward for the science communication advancement agenda This work has received Special Recognition from the CIMUSET Award Committee

Science Communication Annette Leßmöllmann, Marcelo Dascal, Thomas Glöning, 2019-12-16 The volume gives a multi perspective overview of scholarly and science communication exploring its diverse functions modalities interactional structures and dynamics in a rapidly changing world In addition it provides a guide to current research approaches and traditions on communication in many disciplines including the humanities technology social and natural sciences and on forms of communication with a wide range of audiences **Successful Science Communication** David J. Bennett, Richard C. Jennings, 2011-09-29 In the 25 years since the Bodmer Report kick started the public understanding of science movement there has been something of a revolution in science communication However despite the ever growing demands of the public policy makers and the media many scientists still find it difficult to successfully explain and publicise their activities or to

understand and respond to people's hopes and concerns about their work. Bringing together experienced and successful science communicators from across the academic, commercial and media worlds, this practical guide fills this gap to provide a one-stop resource covering science communication in its many different forms. The chapters provide vital background knowledge and inspiring ideas for how to deal with different situations and interest groups. Entertaining personal accounts of projects ranging from podcasts to science festivals to student-run societies give working examples of how scientists can engage with their audiences and demonstrate the key ingredients in successful science communication. **Science**

Communication: An Introduction Frans Van Dam, Liesbeth De Bakker, Anne M Dijkstra, Eric Allen Jensen, 2020-03-05 The book provides a concise, informative, comprehensive and current overview of key issues in the field of science communication: the background of science communication, its theoretical bases and its links to science communication practice. Especially the link between theory, research and practice is very well developed in the book and in the individual chapters. I think that is valuable for both readers new to the field of science communication but also for those who identify with only one of these sides. It is indeed a comprehensive and concise overview, convincing in its aim to link theory, research and practice, and I will definitely use it for my lectures on science communication. JCOM Journal of Science Communication A concise, coherent and easily readable textbook about the field of science communication, connecting the practice of science communicators with theory. In the book, recent trends and shifts in the field resonate, such as the transition from telling about science to interacting with the public and the importance of science communication in health and environmental communication. The chapters have been written by experts in their disciplines, coming from philosophy of science and communication studies to health communication and science journalism. Cases from around the world illustrate science communication in practice. The book provides a broad, up-to-date and coherent introduction to science communication for both students of science communication and related fields as well as professionals.
