Science Surprises Vicki Cobb, 2015-08-04 With See for Yourself budding scientists can wow their teachers and classmates and maybe win a ribbon or two by learning How to extract DNA from an onion How pigments from vegetables make dye How to make paper out of lint from a clothes dryer How to make a friend feel like he or she has a third hand What happens when you grow yeast in dandruff shampoo That tea and iron pills make excellent inks And much more See for Yourself includes experiments in the areas of chemistry earth science physical science the human body and technology but the experiments all take their inspiration from very familiar places The materials needed to execute the experiments can all be inexpensively purchased at the supermarket the toy store the hardware store the stationery store and the drugstore Some of the experiments are quick and easy while others are more challenging Most include additional suggestions so that curious young scientists can keep on investigating [101 Science Surprises](#) Roy Richards, Alex Pang, 1992 [Science Surprises](#) Sandra Markle, 1996-11-01 An illustrated collection of simple and safe science experiments **Freaky Science Discoveries** Sarah Machajewski, 2015-07-15 Science has helped us make sense of some of the freakiest things about life on Earth and more amazing discoveries are made every day This book takes readers on a jaw dropping journey through some of history's wildest scientific revelations such as the existence of black holes the role of mold in fighting killer diseases and how maggots yes maggots are used to treat serious wounds Astounding full color images enhance the high interest text and will make readers squirm with delight as they learn about some of the most pivotal moments in scientific study Fascinating fun facts and in depth sidebars enhance the main content with information readers will not soon forget [Science Surprises](#) Sandra Markle, 1999 11 fun and easy science experiments **Science Experiments That Surprise and Delight** Sheri Bell-Rehwooldt, 2011 Provides step by step instructions for science projects using household materials and explains the science behind the experiments Provided by publisher *101 Science Surprises* Roy Richards, Alex Pang, 1992 Presents experiments and activities involving natural observation geometric patterns simple chemistry and more Suggested level primary *101 Science Surprises* Roy Richards, 1993 Presents experiments and activities involving natural observation geometric patterns simple chemistry and more **Ignorance and Surprise** Matthias Gross, 2021-08-03 The relationship between ignorance and surprise and a conceptual framework for dealing with the unexpected as seen in ecological design projects Ignorance and surprise belong together surprises can make people aware of their own ignorance And yet perhaps paradoxically a surprising event in scientific research one that defies prediction or risk assessment is often a window to new and unexpected knowledge In this book Matthias Gross examines the relationship between ignorance and surprise proposing a conceptual framework for handling the unexpected and offering case studies of ecological design that demonstrate the advantages of allowing for surprises and including ignorance in the design and negotiation processes Gross draws on classical and contemporary sociological accounts of ignorance and surprise in science and ecology and integrates these with

the idea of experiment in society He develops a notion of how unexpected occurrences can be incorporated into a model of scientific and technological development that includes the experimental handling of surprises Gross discusses different projects in ecological design including Chicago s restoration of the shoreline of Lake Michigan and Germany s revitalization of brownfields near Leipzig These cases show how ignorance and surprise can successfully play out in ecological design projects and how the acknowledgment of the unknown can become a part of decision making The appropriation of surprises can lead to robust design strategies Ecological design Gross argues is neither a linear process of master planning nor a process of trial and error but a carefully coordinated process of dealing with unexpected turns by means of experimental practice
