Science The Measure Of Things:

The Doctrine of Being in Hegel's Science of Logic Mehmet Tabak, 2017-06-06 This book provides an accessible and thorough analysis of The Doctrine of Being the first part of Hegel's Science of Logic Though it received much scholarly attention in the past interpreters of this text have generally refrained from examining it in a sufficiently detailed manner Through a rigorous and critical reading of Hegel's speculative arguments Mehmet Tabak illustrates that Hegel meant his logic to be both a presuppositionless analysis and development of the basic categories of thought on the one hand and a post Kantian ontology on the other However the analysis of the text demonstrates that Hegel fails to deliver such logic This volume promises to be an indispensable guide to those who wish to understand the first book of Science of Logic *Quantity and Measure in Hegel's 'Science of Logic'* Stephen Houlgate, 2021-10-21 Hegel on Being provides an authoritative treatment of Hegel's entire logic of being Stephen Houlgate presents the Science of Logic as an important and neglected text within Hegel's oeuvre that should hold a more significant place in the history of philosophy In the Science of Logic Hegel set forth a distinctive conception of the most fundamental forms of being through ideas on quality quantity and measure Exploring the full trajectory of Hegel's logic of being from quality to measure this two volume work by a preeminent Hegel scholar situates Hegel's text in relation to the work of Plato Aristotle Descartes Spinoza Kant and Frege Volume II Quantity and Measure in Hegel's Science of Logic continues the discussion of Hegel's logic of being and considers all aspects of quantity and measure in his logic including his basic categories of being writings on calculus philosophy of mathematics as well as a comparative study of Hegel and Frege's approach to logic Science : the Measure of Things Longfield, Alan, Richter, Klaus, John R. Wells, 1981 **Measures of Science** James Barry, 1996 Drawing on past and current research in continental philosophy Measures of Science Theological and Technological Impulses in Early Modern Thought examines the development of certain founding issues of early modern science Focusing on three key seventeenth century figures Descartes Bacon and Newton and locating his argument explicitly within the approach of Alexandre Koyre James Barry Jr explores the philosophical theological and technological priorities that established the frame for the full emergence of the new science In showing how the work of these and other seventeenth century figures led to the appearance of a dominant new view of nature and perception Barry's book makes an important contribution to our understanding of the formative period of modern science **Hegel and the Problem of Multiplicity** Andrew Haas, 2000-01-25 What could the term multiplicity mean for philosophy Haas contends that modern understandings of the concept are either Aristotelian or Kantian The Hegelian concept of multiplicity Haas suggests is opposed to both or supersedes them *Wallace D.
