The four papers following this introduction were originally presented at the 5th International Joint Conference on Rules and Reasoning (RuleML+RR 2021). The conference Program Committee chairs, in collaboration with the editor-in-chief of the Theory and Practice of Logic Programming journal, invited the authors of these papers to extend them and submit full improved versions for publication in the journal.

RuleML+RR joined the efforts of two well-established conference series: the International Web Rule Symposia (RuleML) and the Web Reasoning and Rule Systems (RR) conferences. The RuleML symposia have been held since 2002 and the RR conferences since 2007. The RuleML Symposia were devoted to disseminating research, applications, languages, and standards for rule technologies, with attention to both theoretical and practical developments, to challenging new ideas and to industrial applications. The RR conferences have been a forum for discussion and dissemination of new results on Web Reasoning and Rule Systems, with an emphasis on rule-based approaches and languages.

To leverage these ambitions, RuleML+RR 2021 was organized as part of the virtual event *Declarative AI 2021: Rules, Reasoning, Decisions, and Explanations*, held from 8 to 15 September 2021. This event was hosted by KU Leuven, Belgium. With its general topic "Declarative Artificial Intelligence," a core objective of the event was to present the latest advancements in AI and rules, rule-based machine learning, reasoning, decisions, and explanations and their adoption in IT systems. To this end, Declarative AI 2021 brought together co-located events with related interests. In addition to RuleML+RR, this included DecisionCAMP 2021 and the Reasoning Web Summer School (RW 2021).

The program of the main track of RuleML+RR 2021 included the presentation of 17 full research papers and 2 short papers. These contributions were carefully selected by the Program Committee from 39 high-quality submissions to the event. Each paper was carefully reviewed and discussed by at least three members of the PC. The technical program was then enriched with the additional contributions from its subevents as well as from DecisionCAMP 2021, a co-located event aimed at practitioners.
