Practice in Cardiothoracic Surgery Wu Ying-kai, Richard M. Peters, 2012-12-06 Surgery has been impressive during the past two decades. Surgeons from many countries have accumulated outstanding experiences which are both unique and varied. With the aim of promoting international exchange of scientific and technical accomplishments in cardiothoracic surgery we began in 1982 to consult with a number of leading cardiothoracic surgeons about compiling a book that would permit them to present their expertise. Through the untiring efforts of all the authors and sectional editors during the past three years International Practice in Cardiothoracic Surgery is now published both in an English language edition and in a Chinese language edition. There are one hundred and eleven chapters in eight sections contributed by over a hundred authors from Brazil, Canada, China, England, France, Germany, Finland, Japan, New Zealand, Sweden, Switzerland and the United States of America. This book is not intended to be a textbook but a compilation of current views and techniques from cardiothoracic surgeons with unique experiences who have made significant contributions in certain subjects. No uniformity in format was requested. A certain amount of overlapping and even conflicting ideas are purposely collected to express the international character of the book. We appreciate the warm support, cooperation and hard work of all the authors, translators, sectional editors and secretarial workers in completing the book **Proceedings of the 2022 5th International Conference on Humanities Education and Social Sciences (ICHESS 2022)** Augustin Holl, Jun Chen, Guiyun Guan, 2023-02-09 This is an open access book.
