The background of the cover is a photograph of a dark, jagged silhouette of a mountain or a large, stepped structure against a sky with soft, orange and yellow clouds, suggesting a sunset or sunrise. The silhouette is dark and textured, with several sharp peaks and valleys.

Self Cosmos God:

Self, Cosmos, God ,1993 The Creative Suffering of the Triune God Gloria L. Schaab,2007-10-18 The global reality of suffering and death has always demanded an authentic theological response and impelled debate concerning Gods relationship to suffering as well as the conceivability of the suffering of God The scope and impact of this suffering in the last century have driven this debate to an acute pitch demanding to know how one can speak rightly of God in view of the suffering that is inherent and inflicted in the cosmos While in former ages some looked to an omnipotent and impassible deus ex machina in answer to this question many contemporary theologians have revised their understanding of God in relation to the world With these theologians Gloria Schaab proposes that a viable response to cosmic suffering is the recognition that the triune Christian God participates in the very sufferings of the cosmos itself She sets her argument within theology and science dialogue and specifically within the work of scientist theologian Arthur Peacocke Informed by the understandings of evolutionary science grounded within a panentheistic paradigm of the God world relationship and rooted within the Christian theological tradition this work contends that the understanding of the Triune God as intimately involved with the suffering of the cosmos is viable and efficacious in view of the suffering of the cosmos and its creatures It develops a female procreative model of the creative suffering of the Triune God an ecological ethics based on the midwife model of care and a pastoral model of threefold differentiation of suffering in God as steps toward Christian praxis in response to the mystery of God within the pain suffering and death of cosmic existence and human experience **Cosmos and Revelation** Peter R. Stork,2021-09-30 Science and technology have profoundly altered the cosmic and societal perceptions of the world Regrettably the Christian imagination has not kept pace Most believers still adhere to pre scientific views Cosmos and Revelation urges the Christian community to reimagine God s creation by engaging the data of science For if God has indeed brought forth an intelligible world for us to explore through scientific research those who profess this faith ought to as a minimum allow scientific findings to expand their theological horizon Drawing on his scientific qualification and academic background in theology Peter R Stork opens several windows on God s creation from galactic star nurseries to the wonderland of living cells After rereading Genesis 1 and 2 the author interlaces examples and reflections to present a coherent yet provocative sketch of the new landscape that spreads out before us leaving it to his readers to intuit for themselves the immensities Christians are challenged to embrace in the age of science The Self-Disclosure of God William C. Chittick,2015-03-26 The Self Disclosure of God offers the most detailed presentation to date in any Western language of the basic teachings of Islam s greatest mystical philosopher and theologian It represents a major step forward in making available to the Western reading public the enormous riches of Islamic teachings in the fields of cosmology mystical philosophy theology and spirituality The Self Disclosure of God continues the author s investigations of the world view of Ibn al Arab the greatest theoretician of Sufism and the seal of the Muhammadan saints The book is divided into three parts

dealing with the relation between God and the cosmos the structure of the cosmos and the nature of the human soul A long introduction orients the reader and discusses a few of the difficulties faced by Ibn al Arab s interpreters Like Chittick s earlier work *The Sufi Path of Knowledge* this book is based primarily on Ibn al Arab s monumental work *al Fut t al Makk yah* *The Meccan Openings* More than one hundred complete chapters and subsections are translated not to mention shorter passages that help put the longer discussions in context There are detailed indices of sources Koranic verses and hadiths The book s index of technical terminology will be an indispensable reference for all those wishing to delve more deeply into the use of language in Islamic thought in general and Sufism in particular *No Morality, No Self* James Doyle,2018-01-01 Elizabeth Anscombe s *Modern Moral Philosophy* and *The First Person* have become touchstones of analytic philosophy but their significance remains controversial or misunderstood James Doyle offers a fresh interpretation of Anscombe s theses about ethical reasoning and individual identity that reconciles seemingly incompatible points of view **The Philosophy of Thomas Hill Green** William Henry Fairbrother,1896 **Human Significance in Theology and the Natural Sciences** Christopher L. Fisher,2010-02-03 The medieval worldview that regarded human beings as at the center of God s plans for His universe has long been regarded as obsolete its synthesis of Christian theology and Greek philosophy having collapsed under the weight of Copernicus Galileo and Darwin The popular stereotype is that Science both in the Copernican revolution that dethroned the earth centered view of the cosmos and in subsequent developments in evolutionary theory and general relativity has marginalized and trivialized human existence revealing humanity s place in the cosmos to be accidental peripheral and ultimately meaningless However an investigation into both modern Christian theology and contemporary twenty first century Science reveals just the opposite providing solid evidence in the interdisciplinary dialogue concerning the significance of humanity within the universe In this important study Christopher Fisher analyzes several modern theologians including Wolfhart Pannenberg Karl Rahner and John Zizioulas to reveal how contemporary ecumenical theology is deeply and intrinsically committed to a high view of human cosmic significance as a consequence of Christianity s indelible Trinitarian and incarnational faith Fisher then demonstrates how research in contemporary natural Science confirms this finding in its own way as recent primate intelligence studies artificial intelligence research and even the quest for extra terrestrial intelligence reveal the wonder of human uniqueness A contemporary version of the teleological argument also resurfaces in consideration of cosmic evolutionary perspectives on human existence Even ecological concerns take on a new poignancy with the realization that among material creatures only human beings are capable of addressing the world s situation This interdisciplinary study uncovers the surprising coherence and convergence of Christian Theology and Natural Science on the subject of human existence and significance here at the beginning of the twenty first century and it highlights the very unique role of humanity in global and cosmic history **The Cosmic Spirit** Roland Faber,2021-03-04 Are we more than stardust Is the appearance of the fragile Earth in the vast universe more than an accident Are we not children of a Spirit

that pervades the dust rejuvenates life and embraces the ever evolving universe Is there a cosmic Spirit that wants us to awaken to a consciousness of universal meaning sacred purpose and mutual friendship with all beings This book answers these questions with a spirituality of the numinous in our relation to the elements of the Earth in the matrix of the multiverse by taking you on a journey through nine paths and nineteen meditations of awakening Not bound by any religion but in deep appreciation of the religious and spiritual heritage of human encounters with the divine depth of existence in our selves and in nature they invite you to become sojourners by engaging the most profound embodiments of the intangible Spirit by which it facilitates its own materialization in the cosmos and our spiritualization of the cosmos Use says this Spirit the stardust that you are to become a spirit faring species in an eternal journey of the cosmos to realize its ultimate motive of existence the attraction of love

The Early Works, 1882-1898: 1895-1898. Sire,2020-08-04 For more than forty years The Universe Next Door has set the standard for an introduction to worldviews This sixth edition uses James Sire s widely influential model of eight basic worldview questions to examine prominent worldviews that have shaped the Western world critiquing each worldview within its own frame of reference and in comparison to others

God After Darwin 1E John Haught,2021-11-28

Argues that both evolutionism and creationism rely too heavily on notions of underlying order and design. Instead of focusing on the idea of novelty in human experience, novelty as a necessary component of evolution and as the essence of divine Mystery. In *God After Darwin*, John Haught argues that the ongoing debate between Darwinian evolutionists and Christian apologists is fundamentally misdirected; both sides persist in focusing upon an explanation of underlying design and order in the universe. Haught suggests that what is lacking in both of these competing ideologies is the notion of novelty, a necessary component of evolution and the essence of the unfolding of divine Mystery. He argues that Darwin's disturbing picture of life, instead of being hostile to religion as scientific skeptics and many believers have thought it to be, actually provides a most fertile setting for mature reflection on the idea of God. Solidly grounded in scholarship, Haught's explanation of the relationship between theology and evolution is both accessible and engaging. *The Cosmic God*, Isaac Mayer Wise, 2009-05.

With our American Philosophy and Religion series, Applewood reissues many primary sources published throughout American history. Through these books, scholars, interpreters, students, and non-academics alike can see the thoughts and beliefs of Americans who came before us. *On the Cosmic Relations*, Henry Holt, 1914. *The Cosmic Relations and Immortality*, Henry Holt, 1919. *From East to West*, Roy Bhaskar, 2002-09-09. In this radical book, Roy Bhaskar expands his philosophy of critical realism with an audacious re-synthesis of many aspects of Western and Eastern thought. Arguing that the existence of God provides the fundamental structure of the world, he renders plausible ideas of reincarnation, karma, and moksha, or liberation. *From East to West* signifies a major new development in critical realism. It will stimulate debate in ontology, epistemology, ethics, political philosophy, and the philosophy of religion. **Essays in the Philosophy of Religion**, Philip L. Quinn, 2006-10-12. This volume presents a selection of essays by the late Philip Quinn, one of the world's leading philosophers of religion. Quinn left behind an influential body of work on a wide variety of topics. He was the author of *Divine Commands and Moral Requirements* (1978) and of more than two hundred papers in philosophy. Fourteen of his best and most influential contributions to the philosophy of religion are gathered here. The papers have been organized around the following topics: religious epistemology, religious ethics, religion and tragic dilemmas, religion and political liberalism, topics in Christian philosophy, and religious diversity.
