International Ethics Mark R. Amstutz,2018-02-23 Mark Amstutz illustrates the role of moral norms in global politics and the ethical foundation of the rules institutions and structures of global society with twenty six new and revised case studies including the ethics of climate change the refugee crisis and the Syrian civil war The cases address the following major global issues human rights war unconventional military operations foreign intervention international economic relations justice among states and global justice This comprehensive study will be of special interest to students and practitioners of international affairs who are concerned with the role of political morality and ethical judgment in global affairs Senses of the Future Gerard Delanty,2024-03-04 The future has become a problem for the present Almost every critical issue is now understood and experienced through the prism of the future since this is the primary focus for the playing out of crises Senses of the Future offers a wide ranging discussion of theories of the future It covers the main ideas of the future in modern thought and explores how we should view the future today in light of a plurality of very different and conflicting

visions The key contribution of this book is to bring together the different approaches with an account that is grounded in sociological and philosophical analysis as opposed to visions of the future that are inspired by extreme visions of catastrophe or approaches that see the future as only the continuation of the present Given a revival of apocalyptic visions of the end times and dystopian views of the future of human societies there is urgent need for a new approach on how we should imagine the future The author explores the future as a field of tensions that is revealed in narratives utopian desires hope imaginaries and social struggles concerning the potential possibilities of the present the future does not just arrive it has to be fought for This book is an important contribution to a critical sociology of the future It is both a work of reconstruction and critique grounded in a historical and philosophical hermeneutics of the future International Trade Law Indira Carr, Peter Stone, 2010 International Trade Law offers a comprehensive and informed analysis of the complexities of an international sale transaction through case law policy documents legislation international conventions and rules adopted by international organisations such as the ICC Focusing on international sales of goods and the various relations that arise as a result of sale contract this book considers and discusses standard trade terms major conventions and principles issues relating to E Commerce international transportation of cargo insurance and payment mechanisms dispute resolution Accessible to students encountering this often challenging area of the law for the first time International Trade Law clarifies a range of topics through tables and diagrams and directs the reader to relevant further reading online resources and journal articles throughout The False Promise of Global Learning Alex Standish, 2012-05-31 This book is available as open access through the Bloomsbury Open Access programme and is available on www.bloomsburycollections.com Through the language of global learning education is being reformed by corporations political activists and policy makers Academic subject based knowledge has been cast as elitist and outdated for a rapidly changing world The curriculum has been colonized in the name of teaching skills and attitudes for the global market and global citizenship Can young people effectively contribute to society without an education in academic knowledge Alex Standish argues that we can only educate children about the world if we are clear about the boundaries that provide education with its moral worth These include the boundaries between education and political activity public and private realms education and training theoretical and everyday knowledge communities and subject disciplines The False Promise of Global Learning demonstrates that the nature and purpose of education has become confused with social economic political and therapeutic aims and that control over the curriculum has been taken away from teachers and communities This is a hard hitting work that will resonate with all who have a stake in how and why we educate our children **The Trolley Problem** Hallvard Lillehammer, 2023-03-02 The Trolley Problem is one of the most intensively discussed and controversial puzzles in contemporary moral philosophy Over the last half century it has also become something of a cultural phenomenon having been the subject of scientific experiments online polls television programs computer games and several popular books This volume offers newly written chapters on a range of topics including the

formulation of the Trolley Problem and its standard variations the evaluation of different forms of moral theory the neuroscience and social psychology of moral behavior and the application of thought experiments to moral dilemmas in real life The chapters are written by leading experts on moral theory applied philosophy neuroscience and social psychology and include several authors who have set the terms of the ongoing debates The volume will be valuable for students and scholars working on any aspect of the Trolley Problem and its intellectual significance *Global Issues and Ethical Considerations in Human Enhancement Technologies* Thompson, Steven John, 2014-04-30 With rapid advancements in human enhancement technologies society struggles with many issues such as definition effects participation regulation and control Current and future initiatives in these technologies may not be in the participants best interests therefore it is imperative for research on humanitarian considerations to be available to those affiliated with this field *Global Issues and Ethical Considerations in Human Enhancement Technologies* compiles prestigious research and provides a well rounded composite of the field's role in emerging technologies Addressing both present and future concerns this publication serves as a valuable reference work for researchers students professionals and practitioners involved in computer science and the humanities as well as many engaged in a humanities approach to metasystems new artificial life and robotics *International Legal Personality* Fleur Johns, 2017-07-05 Who or what is entitled to act on the international plane Where should responsibility for violations of international law lie What sort of entities are capable of possessing international legal rights What is the status of individuals minority groups non governmental bodies international organisations and animals in the international legal order and how has their status shifted over time *International Legal Personality* contains fourteen articles that address these and related questions In historical and contemporary writings international lawyers grapple with the nature of legal identity and confront global distributions of authority and responsibility as they explore who or what is a person in the international legal order These essays document the emergence of an international legal order increasingly conceived in terms of patterns and probabilities rather than as the stagecraft of a small company of permanent players *Philosophy of Ethics and Society* Hector Davidson, This book consists of the following titles and topics Adam Smith Ayn Rand Baruch Spinoza Bertrand Russell Camus Critical Theory Cynicism Epicurus Feminist Philosophy Humanism Liberalism Mary Wollstonecraft Montesquieu Moral Philosophy Naturalism Niccolo Machiavelli Parmenides Peter Singer Political Philosophy Simone Weil Socrates Transcendentalism Utilitarianism **Non-State Actors and International Law** Andrea Bianchi, 2017-03-02 The expression non state actors has become part and parcel of the common parlance of international lawyers Together with the traditional subjects of international law such as states and international organizations non state actors play an important role in international law making law adjudication and law enforcement processes Although the subjects actors discourse takes place in a variety of contexts most of the time the relevant narrative merely describes how different actors participate in the legal process in any given area Little attention has been drawn to the theoretical discourse about non state actors and its relation

to the doctrine of the subjects of international law Whether the solution lies in relativizing the subjects or rather in subjectivizing the actors remains open to doubt The constant swing of the pendulum from the normative to the descriptive mesmerizes the observer but hardly hides the struggle for determining who may legitimately and authoritatively perform legally relevant acts on the international scene
