Routledge Handbook of Chinese Media Gary D. Rawnsley, Ming-yeh T. Rawnsley, 2015-04-24 The study of Chinese media is a field that is growing and evolving at an exponential rate. Not only are the Chinese media a fascinating subject for analysis in their own right but they also offer scholars and students a window to observe multi-directional flows of information, culture and communications within the contexts of globalization and regionalization. Moreover, the study of Chinese media provides an invaluable opportunity to test and refine the variety of communications theories that researchers have used to describe, analyse, compare and contrast systems of communications. The *Routledge Handbook of Chinese Media* is a prestigious reference work providing an overview of the study of Chinese media. Gary and Ming Yeh Rawnsley bring together an interdisciplinary perspective with contributions by an international team of renowned scholars on subjects such as television, journalism and the internet and social media. Locating Chinese media within a regional setting by focusing on Greater China, the People's Republic of China, Taiwan, Hong Kong, Macau and overseas Chinese communities, the chapters highlight the convergence of media and platforms in the region and emphasise the multi-directional and trans-national character of media information flows in East Asia. Contributing to the growing de-westernization of media and communications studies, this handbook is an essential and comprehensive reference work for students of all levels and scholars in the fields of Chinese Studies and Media Studies.

Edouard Vuillard Gloria Lynn Groom, Edouard Vuillard, 1993-01-01 Edouard Vuillard 1868-1940, one of the most admired post-impressionist artists, is best known for his small easel paintings and their charming portrayals of everyday life. However, a major part of his work during his early life was the painting of large decorative panels in the Parisian homes of wealthy private patrons produced between 1892 and 1912. These panels, some fifty in total, have been little studied due principally to the inaccessibility of many of them and the impossibility of their being included in exhibitions.

Achieving Your Potential As A Photographer Harold Davis, 2015-09-18 Coming from the perspective that true inspiration and great image making are at the core of any high-level photographic endeavour, *Achieving Your Potential as a Digital Photographer* presents an organized and cohesive plan for kickstarting creativity and then taking the resulting work into the real world. The ideas presented have been formulated by Harold Davis over many years working as a creative artist and award-winning photographer and in the celebrated workshops he has developed and led all around the world. These concepts are presented with accompanying exercises so that readers can put them into everyday practice as well as workbook pages bound into the book for note-taking and journaling. This book will enrich your photographic practice whether the goal is simply to enrich your photography or to make money from your work.

Stoics and Neostoics Mark P.O. Morford, 2017-03-14 In a vivid re-creation of late sixteenth-century Flemish intellectual life, Mark Morford explores the

intertwined careers of one of the period's most influential thinkers and one of its most original artists Justus Lipsius and Peter Paul Rubens He investigates the scholarship of Lipsius 1547 1606 whose revival of Roman Stoicism guided his contemporaries during the revolt of the Netherlands from the rule of Spain and whose teaching prepared future leaders in church and state Maintaining that Lipsius thought reached Peter Paul Rubens through his brother Philip Rubens Morford analyzes the artist's use of Stoic philosophical and political allegory beginning with his painting *The Four Philosophers* This book discusses the revival of Stoicism in northern Europe focusing on Lipsius editions of Tacitus and Seneca his widely read handbooks on constancy and politics and his interaction with leading scholars and public figures As his letters reveal Lipsius was inconsistent in his life and unsuccessful in reconciling Stoicism with Catholic doctrine Rubens although at first sympathetic to the doctrines of Lipsius is shown to have later transcended their limitations Originally published in 1991 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

American Faces Richard H. Saunders, 2016-09-06 Portraits We know what they are but why do we make them Americans have been celebrating themselves in portraits since the arrival of the first itinerant portrait painters to the colonies They created images to commemorate loved ones glorify the famous establish our national myths and honor our shared heroes Whether painting in oil carving in stone casting in bronze capturing on film or calculating in binary code we spend considerable time creating contemplating and collecting our likenesses In this sumptuously illustrated book Richard H Saunders explores our collective understanding of portraiture its history in America how it shapes our individual and national identity and why we make portraits whether for propaganda and public influence or for personal and private appreciation *American Faces* is a rich and fascinating view of ourselves

Painting the Heavens Eileen Reeves, 1997 The remarkable astronomical discoveries made by Galileo with the new telescope in 1609 10 led to his famous disputes with philosophers and religious authorities most of whom found their doctrines threatened by his evidence for Copernicus's heliocentric universe In this book Eileen Reeves brings an art historical perspective to this story as she explores the impact of Galileo's heavenly observations on painters of the early seventeenth century Many seventeenth century painters turned to astronomical pastimes and to the depiction of new discoveries in their work yet some of these findings imposed controversial changes in their use of religious iconography For example Galileo's discovery of the moon's rough topography and the reasons behind its secondary light meant rethinking the imagery surrounding the Virgin Mary's Immaculate Conception which had long been represented in paintings by the appearance of a smooth incandescent moon By examining a group of paintings by early modern artists all interested in Galileo's evidence for a Copernican system Reeves not only traces the

influence of science on painting in terms of optics and content but also reveals the painters in a conflict between artistic depiction and dogmatic representation Reeves offers a close analysis of seven works by Lodovico Cigoli Peter Paul Rubens Francisco Pacheco and Diego Velázquez She places these artists at the center of the astronomical debate showing that both before and after the invention of the telescope the proper evaluation of phenomena such as moon spots and the aurora borealis was commonly considered the province of the painter Because these scientific hypotheses were complicated by their connection to Catholic doctrine Reeves examines how the relationship between science and art and their mutual production of knowledge and authority must themselves be seen in a broader context of theological and political struggle **A**
