SAGE Handbook of Research on Classroom Assessment James H. McMillan, 2012-11-02 The Sage Handbook of Research on Classroom Assessment provides scholars, professors, graduate students, and other researchers and policy makers in the organizations, agencies, testing companies, and school districts with a comprehensive source of research on all aspects of K-12 classroom assessment. The handbook emphasizes theory, conceptual frameworks, and all varieties of research: quantitative, qualitative, mixed methods, to provide an in-depth understanding of the knowledge base in each area of classroom assessment and how to conduct inquiry in the area. It presents classroom assessment research to convey in depth the state of knowledge and understanding that is represented by the research, with particular emphasis on how classroom assessment practices affect student achievement and teacher behavior. Editor James H. McMillan and five Associate Editors bring the best thinking and analysis from leading classroom assessment researchers on the nature of the research, making significant contributions to this prominent and hotly debated topic in education.

**Assessment Centres and Global Talent Management** George C. Thornton III, 2016-04-08 Globalization, innovation, market share, identifying visionary leaders, and particularly talent management are just some of the issues that benefit from using assessment and development centres. Assessment Centres and Global Talent Management focuses on topics that influence the design of the assessment centre in terms of the competencies being assessed, the exercises that are used, and the nature of the event so that they can deliver what is required. Often, to change organizational culture and values, practical examples and case studies are sprinkled throughout the book as international contributors explore cross-cultural implications and consider how the design, development, and use of assessment centres should be adapted to different cultures. Some of the world's leading researchers and practitioners outline their research into new applications for assessment centre methods, showing how they have used it.
