**Explained** Roy F. Baumeister, 2022-04-12 The idea of the self is immediately familiar to everyone yet elusive to define and understand From pioneering researcher Roy F Baumeister this volume synthesizes a vast body of knowledge to provide a panoramic view of the human self how it develops and functions why it exists and what problems it encounters on the journey through life What are the benefits of self knowledge and how attainable is it Do we have one self or many What is the relationship of self and society In 28 concise chapters Baumeister explains complex concepts with clarity and insight He reveals the central role played by the self in enabling both individuals and cultures to thrive **Self Expressions** Owen

Flanagan, 1996-01-25 In this trailblazing collection of essays on free will and the human mind distinguished philosopher Owen Flanagan seeks to reconcile a scientific view of ourselves with an account of ourselves as meaning makers and agents of free will He approaches this old philosophical quagmire from new angles bringing to it the latest insights of neuroscience cognitive science and psychiatry Covering a host of topics these essays discuss whether the conscious mind can be explained scientifically whether dreams are self expressive or just noise the moral socialization of children and the nature of psychological phenomena Ultimately Flanagan concludes that a naturalistic view of the self need not lead to nihilism but rather to a liberating vision of personal identity which makes sense of agency character transformation and the value and

worth of human life      **Handbook of Self and Identity** Mark R. **Sacrifice and Moral Philosophy** Marcel van Ackeren, Alfred Archer, 2020-09-10 The aim of this book is to foster a more explicit and direct discussion of the concept of sacrifice and its importance in moral philosophy Acts of self sacrifice have a special place in our moral lives We admire and celebrate those who give up their lives so that others may live Despite this important role that sacrifice plays in our moral thinking moral philosophers have had surprisingly little to say about the nature of sacrifice This lack of attention to the nature of sacrifice is particularly important given that sacrifice also has an important role to play in several key debates in moral philosophy The chapters in this volume make an important contribution to our understanding of sacrifice in three areas The first part of the book investigates the nature of sacrifice The next group of chapters investigates the role of sacrifice in moral philosophy Three of these pieces investigate the role of sacrifice in our moral lives generally while two investigate the role of sacrifice in relation to particular moral theories The final two chapters investigate the value of sacrifice in relation to political and theological issues The chapters in this book were originally published as a special issue of the International Journal of Philosophical Studies      **Sham** Steve Salerno, 2006-09-26 Self help To millions of Americans it seems like a godsend To many others it seems like a joke But as investigative reporter Steve Salerno reveals in this groundbreaking book it s neither in fact it s much worse than a joke Going deep inside the Self Help and Actualization Movement fittingly the words form the acronym SHAM Salerno offers the first serious expos of this multibillion dollar industry and the real damage it is doing not just to its paying customers but to all of American society Based on the author s extensive reporting and the inside look at the industry he got while working at a leading lifestyle publisher SHAM shows how thinly credentialed experts now dispense advice on everything from mental health to relationships to diet to personal finance to business strategy Americans spend upward of 8 billion every year on self help programs and products And those staggering financial costs are actually the least of our worries SHAM demonstrates how the self help movement s core philosophies have infected virtually every aspect of American life the home the workplace the schools and more And Salerno exposes the downside of being uplifted showing how the empowering message that dominates self help today proves just as damaging as the blame shifting rhetoric of self help s Recovery movement SHAM also reveals

How self help gurus conduct extensive market research to reach the same customers over and over without ever helping them The inside story on the most notorious gurus from Dr Phil to Dr Laura from Tony Robbins to John Gray How your company might be wasting money on motivational speakers executive coaches and other quick fixes that often hurt quality productivity and morale How the Recovery movement has eradicated notions of personal responsibility by labeling just about anything from drug abuse to sex addiction to shoplifting a dysfunction or disease How Americans blindly accept that twelve step programs offer the only hope of treating addiction when in fact these programs can do more harm than good How the self help movement inspired the disastrous emphasis on self esteem in our schools How self help rhetoric has pushed people away from proven medical treatments by persuading them that they can cure themselves through sheer application of will As Salerno shows to describe self help as a waste of time and money vastly understates its collateral damage And with SHAM the self help industry has finally been called to account for the damage it has done Also available as an eBook *D.H.*

*Lawrence's The Rainbow and Women in Love* Doo-Sun Ryu,2005 Focusing on D H Lawrence s concept of essential criticism which was introduced in his posthumously published Study of Thomas Hardy and his statement that every work of art adheres to some system of morality But it must contain the essential criticism on the morality to which it adheres this book examines the ways in which Lawrence presents his ideas in his major novels The Rainbow and Women in Love It explores how this concept plays a crucial role in his fiction as an other to the implied author s messages functioning differently as equivocation and creative strife respectively in The Rainbow and Women in Love the concept helps to make these novels more dynamic than commonly realized *Dr. Phil* Mary Main,2007-07-01 Presents a biography of the psychologist and television personality known for his blunt practical advice

*The Making of the Self* Richard Valantasis,2008-09-28 A leading scholar of ascetical studies Richard Valantasis explores a variety of ascetical traditions ranging from the Greco Roman philosophy of Musonius Rufus the asceticism found in the Nag Hammadi Library and in certain Gnostic texts the Gospel of Thomas and other early Christian texts This collection gathers historical and theoretical essays develop a theory of asceticism that informs the analysis of historical texts and opens the way for postmodern ascetical studies Wide ranging in historical scope and in developing theory these essays address asceticism for scholar and student alike The theory will be of particular interest to those interested in cultural theory and analysis while the historical essays provide the researcher with easy access to a significant corpus of academic writing on asceticism **The Structure and Development of**

**Self-Consciousness** Dan Zahavi,Thor Grünbaum,Josef Parnas,2004-09-23 Self consciousness is a topic of considerable importance to a variety of empirical and theoretical disciplines such as developmental and social psychology cognitive neuroscience psychiatry and philosophy This volume presents essays on self consciousness by prominent psychologists cognitive neurologists and philosophers Some of the topics included are the infants sense of self and others theory of mind phenomenology of embodiment neural mechanisms of action attribution and hermeneutics of the self A number of these

essays argue in turn that empirical findings in developmental psychology phenomenological analyses of embodiment or studies of pathological self experiences point to the existence of a type of self consciousness that does not require any explicit I thought or self observation but is more adequately described as a pre reflective embodied form of self familiarity The different contributions in the volume amply demonstrate that self consciousness is a complex multifaceted phenomenon that calls for an integration of different complementary interdisciplinary perspectives Series B Self-Help Books Sandra K. Dolby,2010-10-01 Understanding instead of lamenting the popularity of self help books Based on a reading of more than three hundred self help books Sandra K Dolby examines this remarkably popular genre to define self help in a way that is compelling to academics and lay readers alike Self Help Books also offers an interpretation of why these books are so popular arguing that they continue the well established American penchant for self education they articulate problems of daily life and their supposed solutions and that they present their content in a form and style that is accessible rather than arcane Using tools associated with folklore studies Dolby then examines how the genre makes use of stories aphorisms and a worldview that is at once traditional and contemporary The overarching premise of the study is that self help books much like fairy tales take traditional materials especially stories and ideas and recast them into extended essays that people happily read think about try to apply and then set aside when a new embodiment of the genre comes along Surrounding Self-Control Alfred R. Mele,2020-06-01 Self control has gained enormous attention in recent years both in philosophy and the mind sciences for it has profound implications on so many aspects of human life Overcoming temptation improving cognitive functioning making life altering decisions and numerous other challenges all depend upon self control But recent developments in the philosophy of mind and in action theory as well as in psychology are now testing some of the assumptions about the nature of self control previously held on purely a priori grounds New essays in this volume offer fresh insights from a variety of angles neuroscience social cognitive and developmental psychology decision theory and philosophy While much of the literature on self control is spread across distinct disciplines and journals this volume presents for the first time a thorough and truly interdisciplinary exploration of the topic The essays address four central topics what self control is and how it works temptation and goal pursuit self control morality and law and extending self control They take up an array of complex and important questions What is self control How is self control related to willpower How does inhibitory control work What are the cultural and developmental origins of beliefs about self control How are attempts at self control hindered or helped by emotions How do our beliefs about our own ability to deal with temptation influence our behavior What does the ability to avoid temptation depend on How should juvenile responsibility be understood and how should the juvenile justice system be reformed Can an account of self control help us understand free will Combining the most recent scientific research with new frontiers in the philosophy of mind this volume offers the most definitive guide to self control to date **Self and Affect** Stefan Lang, Maik Niemeck,2025-01-11 The self self awareness and emotions are central subjects within contemporary

philosophy of mind but comparatively little attention has been paid to the relationships between them This volume brings together philosophers from different specialisms to explore these relationships from three different angles First whether a theory of self awareness can contribute to a theory of emotion including how different aspects and kinds of self awareness are related to different emotions Second from the opposite direction whether research into emotions can help achieve a better understanding of self consciousness Finally the book considers how emotions are involved in the nature and development of selves Self and Affect is essential reading for all scholars and researchers of the philosophy of mind especially those focussing on emotions and self awareness

**Identification and Character** Howard Kamler,1994-10-28 This book tells the reader all about psychological identification the single most important process for becoming maintaining or changing who we are as characters The book s emphasis though is decidedly on identification s role in our becoming who we are It is one thing for people to have an image of who they are or of who they would like to be it is quite another for them to actually become that image Through genuinely identifying with these sorts of things we turn what otherwise would be mere mental pictures of traits into character traits that we psychologically own Readable to laypersons as well as to academicians this book offers a new perspective for understanding the formation and nature of human character Kamler also discusses some important issues in psychoanalysis and philosophy He clarifies the current psychoanalytic debate about identification s place among the primitive processes of self development offers new ways of looking at the relationship between the infant self and the adult character and addresses topics such as personal identity and identity crisis In addition the book speaks to a current philosophical debate about the fundamental nature of self offering the author s own thesis and showing how all the protagonists in the discussion share a basically flawed position about the role that having values plays in our being persons **Rhetoric of the Protestant**

**Sermon in America** Jonathan J. Edwards,Eric C. Miller,2020-01-20 In Rhetoric of the Protestant Sermon in America Pulpit Discourse at the Turn of the Millennium ten scholars analyze notable sermons from the fifty year span between 1965 and 2015 during which the Protestant sermon has undergone significant change in the United States Contributors examine how this turbulent time period witnessed a variety of important shifts in the arguments evidences and rhetorical strategies employed by contemporary preachers Because religious practice is inextricably tangled in the culture politics and economy of its historical situation the public expression of a faith is certain to move with the times In their treatment of race sex gender class and citizenship sermons apply ancient texts to current events and controversies often to revealing effect This collection thoughtfully edited by Eric C Miller and Jonathan J Edwards demonstrates how the genre of the Protestant sermon has evolved or resisted evolution across the years Scholars of religion rhetoric communication sociology and cultural studies will find this book particularly useful
