The Changing Role of Schools in Asian Societies John Chi-Kin Lee, 2007-12-05 Walk into a classroom in Tokyo New York London or Rotterdam and the similarities in structure activity purpose and style will outweigh differences in language dress and ethnic characteristics Learning is regulated and rationed teaching is a process or one way transmission of knowledge students need to be docile and conformist assessment needs to sift and sort the bright from the not so bright and rewards will be given to those who successfully negotiate this regime But are these the kinds of places that can meet the needs of the net generation The Changing Role of Schools in Asian Societies is concerned with the debate about the nature of modern schooling in Asia Traditionally schools are historical constructions reflecting the social economic and political needs of the societies that invest in them As Asia faces the challenges posed by the knowledge economy its schools have taken on a new and quite different importance This informative book outlines the broad policy

contexts in which these transformations are taking place and the practical strategies that are needed to meet this objective. The authors argue that the future of Asian societies depends on a transformation that requires a fundamental restructuring of schools as we know them while maintaining their long held cultural values. This valuable insight provides an overview of educational issues in Asian societies, establishes a broad theoretical framework in which these issues can be understood, contextualizes issues by providing country case studies, acknowledges the important role of culture influencing educational priorities. It should be of interest to all those working in education policy and comparative education. *How To Improve Your School* Jean Rudduck, Julia Flutter, 2004-02-28. This fascinating book focuses on those who are most affected by changes in education policy and systems: the pupils. It draws on empirical evidence from a number of research projects and distils this into a compelling account of contemporary schooling from the pupils' perspective. Jean Rudduck calls for a shift in the way we currently view young people at school and sets out a case for radically rethinking aspects of school organization, relationships and practice. Her research confirms that we need to see pupils differently to reassess their capabilities and reflect on what they are capable of being and doing. **School Leadership - Heads on the Block?** Pat Thomson, 2009-05-07. Most teachers become heads for idealistic reasons but heads are leaving work and there is a shortage of applicants for school leadership roles. Arguing that pressure needs to be lifted from heads if this is to be redressed, this book considers initial moves that could precipitate such change. **Reforming or Re-inventing Schools?** John MacBeath, Maurice Galton, John Bangs, 2019-12-05. What has changed and what will change in the next decade? *Reforming or Re-inventing Schools* revisits some of the key issues in school and system reform with a reflection on developments in the English education system and internationally. It offers an insightful review and critique of education principles and their relationship to school practice, exploring some of the myths as well as examining the potential value of comparative data. Drawing on new evidence and interviews with a group of policy makers and academics on the British and international stages, this book asks: What do parents, children and society want from a system of education? What motivates teachers to join the profession and why do such large numbers leave so soon? What are the roots of misunderstanding and mismanagement in provision, support and accountability? How do teachers communicate, support and exchange ideas with each other? How do we measure positive change? Examining the roots and conditions for growth and comparing and contrasting the situation in the United Kingdom with innovative development taking place elsewhere in the rest of the world, *Reforming or Re-inventing Schools* is an essential read for anyone interested in school and country performance at a national and international level. This book is a must for those who like me believe passionately both in the power of peer mediation and in the urgency of spreading good practice in a society like ours which is desperately searching for ways to be inclusive and at peace with itself. Tim Brighouse, former Commissioner for London Schools. As the challenges facing young people grow, so do the array of support mechanisms to help them. During my time as a Member of Parliament and as a

Minister I saw many of the ideas and initiatives which were tackling this issue I am attracted to the idea of peer mediation mainly because it goes beyond the question of how can we protect and help children when they have a difficulty and develops those increasingly important social and emotional skills in all children Estelle Morris Former Secretary of State DfES Why use peer mediation What are the factors that influence its failure or success Peer mediation as a form of conflict resolution is growing in popularity and usage particularly within education The number of schools using this method has increased with many schools in the UK now using mediation to settle disputes both in school and in the wider community Based on the author s extensive work on peer mediation the book provides a thorough account of theory and practice relating to an approach that can enable young people to resolve their own disputes and those of their peers The author shows how peer mediation can be embraced by schools to strengthen student voice behaviour management active citizenship and inclusion as well as how it can be neglected and fail to achieve these aims Drawing on case studies of peer mediation in schools the book offers an analysis of the work that has been carried out in this area It revisits key debates in education such as citizenship social inclusion student voice and behaviour management in order to begin to address the questions surrounding this method of conflict resolution Peer Mediation is key reading for primary and secondary school teachers educational professionals academics policy makers and those with an interest in practical peace making Educational Research and Innovation Leadership for 21st Century Learning OECD,2013-12-04 This book clarifies the concepts and the dimensions of learning leadership relating it to extensive international research and identifying promising strategies to promote it
