method acupuncture herbal medicine food therapies is the ultimate goal Greater intellectual understanding may support greater practical ability but it is valuable to the extent that it serves to promote that enterprise If not it may provide some interesting conversations but it won't tangentially improve your health and life A second central idea is Mastery means mastery or basic Basic principles are the reason for theory and practice A broad solid foundation provides stability for quality construction and growth Even if you choose to build only one base that will be your base in any time of difficulty PART 1 Teorias Fundamentais da Medicina Chinesa presents the theoretical foundations of all Chinese medical science and philosophy Embora is not as detailed as a medical book it is quite extensive for two reasons It provides the intellectual core necessary to understand and realize and deeply familiarize the Western reader with a different way of seeing the world from a Chinese perspective The concepts and practices taught throughout this book arise from a cultural perspective and if we want to learn to apply those practices in our daily lives it will be necessary to make some effort to abandon our own cultural preconceptions and see things with new eyes The details in Part 1 are intended to facilitate that change in perception A majority of PART 2 Holistic Self Care with Chinese Medicine carefully teaches the practical foundations of two Chinese holistic self care methods using the principles learned in Part 1 and offers plenty of room to grow as you become more adept at each Doing practices regularly is the most important thing and in the final analysis leads to the domain giving you the simple most valuable and effective options to assume or control your health in a variety of natural and holistic ways These are methods that you can use forever and that greatly reduce the likelihood of needing to see any doctor whether Chinese or Western
