Selling Of Contraception The Dalkon Shield Case Sexuality And Womens Autonomy:

The Selling of Contraception Nicole J. Grant, 1992 In this brutal indictment of the birth control industry Nicole J Grant documents the history of the Dalkon Shield case and places the controversy within a larger historical and social context examining the ways in which social conditions affect women's choices about contraception Drawing upon an analysis of thirty years worth of articles in medical journals and popular magazines family planning literature medical texts government documents and transcripts from interviews with women discussing procreative choices Grant examines the IUD's place in the history of contraception and the politics of bringing the Dalkon Shield to the market including the commercial bias of the device's inventor and chief medical consultant She discusses the dissemination of false and misleading advertising about the device the manufacturer's disregard of evidence suggesting that it was unsafe and the stake of various family planning agencies in promoting its use She goes on to examine the social conditions under which women chose to use the Dalkon Shield and considers the fact that many women wishing to exercise control over procreation freely selected it over alternative forms of contraception even though they knew there were associated risks According to Grant the Dalkon Shield case is not a historical anomaly Today advances in technology are making new methods of contraception available to women but these methods carry risks as serious as those associated with the Dalkon Shield Moreover the social context in which women are making decisions about contraception is much the same as it was during the time when the Dalkon Shield was widely used Grant concludes her study by proposing ways in which women can enhance their informed risk benefit analysis of all options while maintaining their autonomy

A People's Guide to Richmond and Central Virginia Melissa Dawn Ooten, 2023-11-07 An expansive guide for resistance and solidarity across this storied region Richmond and Central Virginia are a historic epicenter of America's racialized history This alternative guidebook foregrounds diverse communities in the region who are mobilizing to dismantle oppressive systems and fundamentally transforming the space to live and thrive Featuring personal reflections from activists artists and community leaders this book eschews colonial monuments and confederate memorials to instead highlight movements neighborhoods landmarks and gathering spaces that shape social justice struggles across the history of this rapidly growing area The sites stories and events featured here reveal how community resistance and resilience remain firmly embedded in the region's landscape *A People's Guide to Richmond and Central Virginia* counters the narrative that elites make history worth knowing and sites worth visiting by demonstrating how ordinary people come together to create more equitable futures

Dying to be Beautiful Gwen Kay, 2005 *Dying to Be Beautiful* tells the story of how cosmetics came to be regulated in early 20th century America In 1906

the Food and Drug Administration was given the power to control food and drugs Not until 1938 were other products that went into or onto the body including cosmetics similarly regulated The intervening years saw death by depilatory and blindness by mascara and a rise in consumer and grassroots political activism This book examines who fought for regulation of these inherently feminine products and why it took so long for their goals to be achieved Book jacket

Nurse-midwifery Laura Elizabeth Ettinger, 2006 In a unique and detailed historical study Nurse Midwifery The Birth of a New American Profession Laura E Ettinger fills a void with the first book length documentation of the emergence of American nurse midwifery This occupation developed in the 1920s involving nurses who took advanced training in midwifery In Nurse Midwifery Ettinger shows how nurse midwives in New York City eastern Kentucky Santa Fe New Mexico and other places both rebelled against and served as agents of a nationwide professionalization of doctors and medicalization of childbirth Nurse Midwifery reveals the limitations that nurses physicians and nurse midwives placed on the profession of nurse midwifery from the outset because of the professional interests of nursing and medicine The book argues that nurse midwives challenged what scholars have called the male medical model of childbirth but the cost of the compromises they made to survive was that nurse midwifery did not become the kind of independent autonomous profession it might have been

Bibliography of the History of Medicine ,1993 The Global Biopolitics of the IUD Chikako

Takeshita, 2023-05-09 The biography of a multifaceted technological object the IUD illuminates how political contexts shaped contraceptive development marketing use and users The intrauterine device IUD is used by 150 million women around the world It is the second most prevalent method of female fertility control in the global South and the third most prevalent in the global North Over its five decades of use the IUD has been viewed both as a means for women s reproductive autonomy and as coercive tool of state imposed population control as a convenient form of birth control on a par with the pill and as a threat to women s health In this book Chikako Takeshita investigates the development marketing and use of the IUD since the 1960s She offers a biography of a multifaceted technological object through a feminist science studies lens tracing the transformations of the scientific discourse around it over time and across different geographies Takeshita describes how developers of the IUD adapted to different social interests in their research and how changing assumptions about race class and female sexuality often guided scientific inquiries The IUD she argues became a politically versatile technology adaptable to both feminist and nonfeminist reproductive politics because of researchers attempts to maintain the device s suitability for women in both the developing and the developed world Takeshita traces the evolution of scientists concerns from contraceptive efficacy and product safety to the politics of abortion and describes the most recent hormone releasing menstruation suppressing iteration of the IUD Examining fifty years of IUD development and use Takeshita finds a microcosm of the global political economy of women s bodies health and sexuality in the history of this contraceptive device

And Sin No More Marian J. Morton, 1993 In this compelling study Marian Morton traces the development of public and

private health care policies for single mothers and identifies the ways in which attitudes about religion race and cultural definitions of womanhood affected their treatment Focusing on the history of the public hospital and four private maternity homes in Cleveland Morton considers the care of unwed mothers in the context of developing American social policy from the mid nineteenth century to today While social policy has taken on a growing responsibility for health care of dependent people the perception of unwed mothers as sinful by the Christian church and undeserving because their situation was brought about by moral failure has differentiated them from other dependent populations Government provides unmarried mothers with the least support and private maternity homes run mostly by churches have remained committed to the nineteenth century notion of spiritual reclamation As Morton shows regardless of the time period women pregnant out of wedlock have been the dependent population most easily disciplined by private agencies and the most resented and politically vulnerable recipients of public assistance This vital work sheds new light on the current controversies over public assistance and legalized abortion and offers a powerful appraisal of the uncertainties and inequities of American social policy as it applies to women who fail to conform to social definitions of womanhood

Pregnancy and Power, Revised Edition Rickie Solinger, 2019-07-16 A sweeping chronicle of women s battles for reproductive freedom Reproductive politics in the United States has always been about who has the power to decide lawmakers the courts clergy physicians or the woman herself Authorities have rarely put women s needs and interests at the center of these debates Instead they have created reproductive laws and policies to solve a variety of social and political problems with outcomes that affect the lives of different groups of women differently Reproductive politics were at play when slaveholders devised breeding schemes when the US government took indigenous children from their families in the nineteenth century and when doctors pressured Latina women to be sterilized in the 1970s Tracing the main plot lines of women s reproductive lives the leading historian Rickie Solinger redefines the idea of reproductive freedom putting race and class at the center of the effort to control sex and pregnancy in America over time Revisiting these issues after more than a decade this revised edition of *Pregnancy and Power* reveals how far the reproductive justice movement has come and the renewed struggles it faces in the present moment Even after nearly a half century of reproductive rights a cascade of new laws and policies limits access and prescribes punishments for many people trying to make their own reproductive decisions In this edition Solinger traces the contemporary rise of reproductive consumerism and the politics of free market health care as economic inequality continues to expand in the US revealing the profound limits of choice and the continued need for the reproductive justice framework
