Selling Places The Marketing And Promotion Of Towns And Cities 1850 :

Selling Places Stephen Victor Ward,1998 Extensively illustrated this book describes the way places have been promoted to make themselves attractive locations as holiday resorts residential areas or business centres American Chinatowns Chuo Li,2025-05-30 American Chinatowns Race Identity and Postwar Urban Redevelopment offers a captivating exploration of the vibrant yet contested landscapes of Chinatowns across the United States Through a critical and nuanced lens Li examines how postwar urban redevelopment racial dynamics and identity politics have profoundly transformed these iconic neighborhoods Blending rich historical research with sharp analysis this book uncovers the interplay of race urban planning ideologies and social equity shedding light on how Chinatowns navigate resilience and reinvention amid shifting urban paradigms Li s work highlights the tension between cultural preservation and modernization exploring the built environment alongside community driven spatial activism to reveal how these urban spaces persist as sites of resistance identity and transformation American Chinatowns is a compelling study of cultural landscape urban justice and the politics of city making This book is essential reading for scholars urbanists and anyone intrigued by the intersection of race identity and the evolving narratives of America s cities This book invites readers to rethink the meaning of place heritage and equity in the urban fabric

Place Marketing and Temporality Gary Warnaby,2024-06-26 Much city marketing and branding activity is future oriented aimed at achieving a forward looking vision for places The aim of this activity is to attract visitors residents and or inward investment and focus on communicating attractive place attributes to create a differentiated spatial product that will appeal to particular target audiences In seeking to achieve this place marketing campaigns have been criticized for emphasizing generic attributes such as accessibility infrastructure and a skilled workforce which can serve to homogenize places which in reality are very different However a city s distinctive character is a consequence of its history and development over time and this book analyses the role of these temporal dimensions in place marketing and branding The book analyses how the past both material i e the historic built environment and intangible i e routines practices and the character of the populace is appropriated in order to sell the city into the future It acknowledges the inherent selectivity involved and discusses the factors influencing what is remembered from the past and equally importantly what is forgotten Adopting a range of theoretical approaches to understanding temporality in this context the book will appeal to advanced students academic researchers and reflexive place branding practitioners by introducing a temporal paradox incorporating both fixity the material and immaterial elements of the city s past and fluidity relating to the creation of the place product as a dynamic assemblage of individual elements and attributes aimed at particular target audiences Contemporary Tourism Chris Cooper,Colin Michael Hall,2008 Now in its second edition Contemporary Tourism an international approach presents a new and refreshing approach to the study of tourism considering issues such as the changing world order destination marketing tourism ethics pro poor tourism and implications for the patterns and flow of tourism in the future Strategic

Innovative Marketing and Tourism Androniki Kavoura, Efstathios Kefallonitis, Prokopios Theodoridis, 2020-03-09 This book covers a very broad range of topics in marketing communication and tourism focusing especially on new perspectives and technologies that promise to influence the future direction of marketing research and practice in a digital and innovational era. Among the areas covered are product and brand management, strategic marketing, B2B marketing and sales management, international marketing, business communication and advertising, digital and social marketing, tourism and hospitality marketing and management, destination branding and cultural management and event marketing. The book comprises the proceedings of the International Conference on Strategic Innovative Marketing and Tourism ICSIMAT 2019 where researchers, academics and government and industry practitioners from around the world came together to discuss best practices, the latest research, new paradigms and advances in theory. It will be of interest to a wide audience including members of the academic community, MSc and PhD students and marketing and tourism professionals. **Globalizing Seoul** Jieheerah Yun, 2017-02-17 Cover Title Copyright Contents Acknowledgements List of Illustrations Introduction The Production of Korean Global Space Chapter 1 A Brief Urban History of Seoul Chapter 2 Rediscovered Traditions Remodelled Hanoks in Bukchon Chapter 3 From Mary's Alley to a Culture Street Contested Traditions in Insadong Chapter 4 Rediscoveries and Redesigns Dongdaemun History and Culture Park Chapter 5 A Foreign Country in Seoul Itaewon's Multicultural Streets Conclusion Going Beyond the Cultural City References Index **Urban Regeneration in the UK** Andrew Tallon, 2020-11-24 This textbook provides an accessible and critical synthesis of urban regeneration in the UK incorporating key policies, approaches, issues, debates and case studies. The central objective of the textbook is to place the historical and contemporary regeneration agenda in context. Section I sets up the conceptual and policy framework for urban regeneration in the UK. Section II traces policies that have been adopted by central government to influence the social, economic and physical development of cities including early town and country and housing initiatives, community focused urban policies of the late 1960s, entrepreneurial property led regeneration of the 1980s, competition for urban funds in the 1990s, urban renaissance and neighbourhood renewal policies of the late 1990s and 2000s and new approaches in the age of austerity during the 2010s. Section III illustrates the key thematic policies and strategies that have been pursued by cities themselves focusing particularly on improving economic competitiveness and tackling social disadvantage. Section IV summarises key issues and debates facing urban regeneration upon entering the 2020s and speculates over future directions in an era of continued economic uncertainty. The Third Edition of Urban Regeneration in the UK combines the approaches taken by central government and cities themselves to regenerate urban areas. The latest ideas and examples from across disciplines and across the UK's urban areas are illustrated. This textbook provides a comprehensive and up to date synthesis that will be of interest to students as well as a seminal read for practitioners and researchers. Service and Service Systems Steve Baron, 2013-12-03 This text is designed for use in a course in an applied international corporate finance for

managers and executives Instead of the encyclopedic approach the text focuses on the two main issues of interest to managers who deal with overseas operations The first main issue is how uncertain foreign exchange FX rate changes affect a firm s ongoing cash flows and equity value and what can be done about that risk The second main issue is the estimation of the cost of capital for international operations and the evaluation of overseas investment proposals Numerous examples of real world companies are used

Greening Post-Industrial Cities Corina McKendry, 2017-09-22 City greening has been heralded for contributing to environmental governance and critiqued for exacerbating displacement and inequality Bringing these two disparate analyses into conversation this book offers a comparative understanding of how tensions between growth environmental protection and social equity are playing out in practice Examining Chicago USA Birmingham UK and Vancouver Canada McKendry argues that city greening efforts were closely connected to processes of post industrial branding in the neoliberal economy While this brought some benefits concerns about the unequal distribution of these benefits and greening s limited environmental impact challenged its legitimacy In response city leaders have moved toward initiatives that strive to better address environmental effectiveness and social equity while still spurring growth Through an analysis that highlights how different varieties of liberal environmentalism are manifested in each case this book illustrates that cities though constrained by inconsistent political will and broader political and economic contexts are making contributions to more effective socially just environmental governance Both critical and hopeful McKendry s work will interest scholars of city greening environmental governance and comparative urban politics

Bloomberg's New York Julian Brash, 2011 New York mayor Michael Bloomberg claims to run the city like a business In Bloomberg's New York Julian Brash applies methods from anthropology geography and other social science disciplines to examine what that means He describes the mayor's attitude toward governance as the Bloomberg Way a philosophy that holds up the mayor as CEO government as a private corporation desirable residents and businesses as customers and clients and the city itself as a product to be branded and marketed as a luxury good Commonly represented as pragmatic and nonideological the Bloomberg Way Brash argues is in fact an ambitious reformulation of neoliberal governance that advances specific class interests He considers the implications of this in a blow by blow account of the debate over the Hudson Yards plan which aimed to transform Manhattan's far west side into the city's next great high end district Bringing this plan to fruition proved surprisingly difficult as activists and entrenched interests pushed back against the Bloomberg administration suggesting that despite Bloomberg's success in redrawing the rules of urban governance older political arrangements and opportunities for social justice remain

Sociable Cities Peter Hall, Colin Ward, 2014-06-05 Peter Hall and Colin Ward wrote Sociable Cities to celebrate the centenary of publication of Ebenezer Howard's To-morrow A Peaceful Path to Real Reform in 1998 an event they then marked by co editing with Dennis Hardy the magnificent annotated facsimile edition of Howard's original long lost and very scarce in 2003 In this revised edition of Sociable Cities sadly now without Colin Ward Peter Hall writes the sixteen years separating the two editions of this book seem almost like geological time Revisiting the 1998 edition is like going back deep into ancient history The glad confident morning following Tony Blair's election has been followed by political disillusionment the fiscal crash widespread austerity and a marked anti planning stance on the part of the Coalition government But closely following the argument of Good Cities Better Lives How Europe discovered the Lost Art of Urbanism Routledge 2013 to which this book is designed as a companion Hall argues that the central message is now even stronger we need more planning not less And this planning needs to be driven by broad high level strategic visions national regional of the kind of country we want to see Above all Hall shows in the concluding chapters Britain's escalating housing crisis can be resolved only by a massive programme of planned decentralization from London at least equal in scale to the great Abercrombie plan seventy years ago He sets out a picture of great new city clusters at the periphery of South East England sustainably self sufficient in their daily patterns of living and working but linked to the capital by new high speed rail services This is a book that every planner and every serious student of policy making will want to read Published at a time when the political parties are preparing their policy manifestos it is

designed to make a major contribution to a major national debate *City Status in the British Isles, 1830–2002* John Beckett, 2017-07-05 Based on a wide variety of government and civic records this book traces the evolution of the changing nature of city status particularly through the nineteenth and twentieth centuries Beginning with an explanation of how city status first became connected to cathedrals in the medieval period the book explores how during the nineteenth century links evolved between Anglican diocesan sub divisions and city creation It then shows how in a few years between 1888 and 1907 the traditional interpretation of a city was overturned as the most major British industrial and commercial towns received city status and lord mayoralties The second half of the book concentrates on city status during the twentieth century and particularly the politicisation of the process and the linking of grants to royal occasions The study concludes by looking at the city status competitions of 2000 and 2002 in relation to the previous two hundred years of city history **Small Cities**

David Bell, Mark Jayne, 2006-09-27 Until now much research in the field of urban planning and change has focused on the economic political social cultural and spatial transformations of global cities and larger metropolitan areas In this topical new volume David Bell and Mark Jayne redress this balance focusing on urban change within small cities around the world Drawing together research from a strong international team of contributors this four part book is the first systematic overview of small cities A comprehensive and integrated primer with coverage of all key topics it takes a multi disciplinary approach to an important contemporary urban phenomenon The book addresses political and economic decision making urban economic development and competitive advantage cultural infrastructure and planning in the regeneration of small cities identities lifestyles and ways in which different groups interact in small cities Centering on urban change as opposed to pure ethnographic description the book s focus on informed empirical research raises many important issues Its blend of conceptual chapters and theoretically directed case studies provides an excellent resource for a broad spectrum of undergraduate and postgraduate students as well as providing a rich resource for academics and researchers

Modernization, Urbanization and Development in Latin America, 1900s - 2000s Arturo Almandoz, 2014-10-10 In this book Arturo Almandoz places the major episodes of Latin America s twentieth and early twenty first century urban history within the changing relationship between industrialization and urbanization modernization and development This relationship began in the early twentieth century when industrialization and urbanization became significant in the region and ends at the beginning of the twenty first century when new tensions between liberal globalization and populist nationalism challenge development in the subcontinent much of which is still poverty stricken Latin America s twentieth century modernization and development are closely related to nineteenth century ideals of progress and civilization and for this reason Almandoz opens with a brief review of that legacy for the different countries that are the focus of his book Mexico Chile Brazil Argentina and Venezuela but with references to others He then explores the regional distortions which resulted from the interaction between industrialization and urbanization and how the imbalance between urbanization and the

productive system helps to explain why take off was not followed by the drive to maturity in Latin American countries. He suggests that the close yet troublesome relationship with the United States, the recurrence of dictatorships and autocratic regimes, and Marxist influences in many domains are all factors that explain Latin America's stagnation and underdevelopment up to the so-called lost decade of the 1980s. He shows how Latin America's fate changed in the late twentieth and early twenty-first century when neoliberal programmes, political compromise, and constitutional reform dismantled the traditional model of the corporate state and centralized planning. He reveals how economic growth and social improvements have been attained by politically left-wing yet economically open market countries, while others have resumed populism and state intervention. All these trends make up the complex scenario for the new century, especially when considered against the background of vibrant metropolises that are the main actors in the book.

Homeland Yael Allweil, 2016-09-19. As Yael Allweil reveals in her fascinating book, housing has played a pivotal role in the history of nationalism and nation building in Israel and Palestine. She adopts the concept of homeland to highlight how land and housing are central to both Zionism and Palestinian nationalism, and how the history of Zionist and Palestinian national housing have been inseparably intertwined from the introduction of the Ottoman Land Code in 1858 to the present day.

Of Planting and Planning Robert Home, 2013-01-17. At the centre of the world economy, one always finds an exceptional state: strong, aggressive, and privileged, dynamic, simultaneously feared and admired. Fernand Braudel, *Civilization and Capitalism 15th-18th Centuries*. This surely is an apt description of the British Empire at its zenith. *Of Planting and Planning* explores how Britain used the formation of towns and cities as an instrument of colonial expansion and control throughout the Empire. Beginning with the seventeenth-century plantation of Ulster and ending with decolonization after the Second World War, Robert Home reveals how the British Empire gave rise to many of the biggest cities in the world and how colonial policy and planning had a profound impact on the form and functioning of those cities. This second edition retains the thematic, chronological, and interdisciplinary approach of the first, each chapter identifying a key element of colonial town planning. New material and illustrations have been added, incorporating the author's further research since the first edition. Most importantly, *Of Planting and Planning* remains the only book to cover the whole sweep of British colonial urbanism.
