Multinationals in Canada: Theory, Performance and Economic Impact A.M. Rugman,2013-03-09 Multinational enterprises have become one of the distinctive institutions of our times Controversy over their economic and political effects and over appropriate public policy responses has become common in home and host countries and in international agencies Much of this debate is reminiscent of the role of large corporations generally particularly in their interregional and intergroup effects The multinational setting however would have raised distinctive issues even apart from the strong surges of nationalism and anti imperialism which have marked recent history Canada has a long and unusual experience with such enterprises Foreign control of capital in the nonfinancial industries manufacturing petroleum and gas other mining and smelting utilities merchandising was already 20 percent in 1930 and 25 percent in 1948 It rose to 36 percent by the late 1960s but has since receded to about 30 percent In 1975 fully 55 percent of the capital in manufacturing was controlled outside Canada as was 72 per cent of that in petroleum and gas and 58 percent in other mining These figures exceed those of other developed countries although there have been striking increases in recent decades About 80 percent of the direct investment capital in Canada is from the United States Recently Canadians have become aware of a surge of Canadian direct investment abroad which on a flow basis has exceeded inflows exclusive of retained earnings for most of the 1970s

Militant Minority Benjamin Isitt,2011-05-21 Militant Minority tells the compelling story of British Columbia workers who sustained a left tradition during the bleakest days of the Cold War Through their continuing activism on issues from the politics of timber licenses to global questions of war and peace these workers bridged the transition from an Old to a New Left In the late 1950s half of B C s workers belonged to unions but the promise of postwar collective bargaining spawned disillusionment tied to inflation and automation A new working class that was educated white collar and increasingly rebellious shifted the locus of activism from the Communist Party and Co operative Commonwealth Federation to the newly formed New Democratic Party which was elected in 1972 Grounded in archival research and oral history Militant Minority provides a valuable case study of one of the most organized and independent working classes in North America during a period of ideological tension and unprecedented material advance

For readers who intend to read this volume without reading the first some introductory remarks are in order about the scope of the work and the strategy used in all five volumes to measure the quality of life In the first chapter of Volume I I reviewed the relevant recent literature on social indicators and social reporting and explained all the general difficulties involved in such work It would be redundant to repeat that discussion here but there are some fundamental points that are worth mentioning Readers who find this account too brief should consult the longer discussion The basic question that will be answered in this work is this Is there a difference in the quality of life in Canada and the United States of America and if so in which country is it better Alternatively one could put the question thus If one individual were randomly selected out of Canada and another out of the United States would there be important qualitative differences and if so which one would probably be better off To simplify matters I often use the terms Canadian and American as abbreviations for a randomly selected resident of Canada or the United States respectively
