Shamanism Manvir Singh, 2025-05-20 From a brilliant young Harvard trained anthropologist and contributor to The New Yorker comes a fascinating investigation into the spiritual practice of shamanism from its beginnings to the present moment for readers disaffected with organized religion who seek a more personal approach to spirituality What are the origins of shamanism and what is its future Do shamans believe in their powers What exactly is trance What can we learn from indigenous healing practices Traveling from Indonesia to the Colombian Amazon living with shamans and observing music drug use and indigenous curing ceremonies anthropologist Manvir Singh journeys into one of the most mysterious religious traditions Fundamentally shamans are specialists who use altered states to engage with unseen realms and provide services like healing and divination As Singh shows shamanism's appeal stems from its psychological resonance Its essence is spiritual transformation a specialist uses initiations deprivation and non ordinary states to seemingly become a different kind of human one possessed of powers to cure prophesy and otherwise tame life's uncertainties Following a fascinating cast of characters Singh reveals the complexities and vicissitudes of a timeless always relevant and ubiquitous phenomenon He argues that biomedicine can learn from shamanic practices and that psychedelic enthusiasts completely misrepresent history He also shows that shamanic traditions will forever re emerge and that by contemplating humanity's oldest spiritual practice we come to better understand ourselves our history and our future

Shamanism and the Ancient Mind James L. Pearson, 2002-02-18 Pearson brings a cogent well argued case for the understanding of much prehistoric art as shamanistic practice Using the theoretical premises of cognitive archaeology and a careful examination of rock art worldwide Pearson is able to dismiss other theories of why ancient peoples produced art_totemism art for art's sake structuralism hunting magic Then examining both ethnographic and neuropsychological evidence he makes a strong case for the use of shamanistic ritual and hallucinogenic substances as the genesis of much prehistoric art Bolstered with examples from contemporary cultures and archaeological sites around the world Pearson's thesis should be of interest not only to archaeologists but art historians psychologists cultural anthropologist and the general public **Shamanism** Mircea Eliade, 2004-02-08 Surveys the practice of Shamanism over two and a half millennia of human history moving from the Shamanic traditions of Siberia and Central Asia where Shamanism was first observed to North and South America Indonesia Tibet China and beyond Eliade illuminates the magico religious life of societies that give primacy of place to the figure of the Shaman at once magician and medicine man healer and miracle doer priest mystic and poet

Shamanism Mariko Namba Walter, Eva Jane Neumann Fridman, 2004-12-15 A guide to worldwide shamanism and shamanistic practices emphasizing historical and current cultural adaptations This two volume reference is the first international survey of shamanistic beliefs from prehistory to the present day In nearly 200 detailed readable entries leading ethnographers psychologists archaeologists historians and scholars of religion and folk literature explain the general

principles of shamanism as well as the details of widely varied practices What is it like to be a shaman Entries describe region by region the traits such as sicknesses and dreams that mark a person as a shaman as well as the training undertaken by initiates They detail the costumes music rituals artifacts and drugs that shamans use to achieve altered states of consciousness communicate with spirits travel in the spirit world and retrieve souls Unlike most Western books on shamanism which focus narrowly on the individual s experience of healing and trance Shamanism also examines the function of shamanism in society from social political and historical perspectives and identifies the ancient continuous thread that connects shamanistic beliefs and rituals across cultures and millennia Shamanism Merete Demant Jakobsen†,1999-03-01 Shamanism has always been of great interest to anthropologists More recently it has been discovered by westerners especially New Age followers This book breaks new ground by examining pristine shamanism in Greenland among people contacted late by Western missionaries and settlers On the basis of material only available in Danish and presented herein English for the first time the author questions Mircea Eliade s well known definition of the shaman as the master of ecstasy and suggests that his role has to be seen as that of a master of spirits The ambivalent nature of the shaman and the spirit world in the tough Arctic environment is then contrasted with the more benign attitude to shamanism in the New Age movement After presenting descriptions of their organizations and accounts by participants the author critically analyses the role of neo shamanic courses and concludes that it is doubtful to consider what is offered as shamanism

The Decline and Fall of Practically Everyone Victor G. Novander Jr.,2006-03-07 The Decline and Fall of Practically Everyone is a concise history of humanity It is written from the point of view of someone whose outlook on life has been transformed by primal therapy and who has become a lifelong primal person No other history has been written from this unique perspective The Decline and Fall of Practically Everyone offers to each one who is ready for it a fresh glimpse into his own history and into a sound understanding of the course all human history has taken toward the devolution of original human consciousness into unconscious self awareness In Part I the author defines consciousness unconscious self awareness primal pain primaling and what living a primal life involves He pictures the primal life as putting ones feet on the path toward greater consciousness The authors stated purpose is to wake us up to our condition of unconscious self awareness He feels that unless we are awakened humanity will continue to careen toward destroying itself and the life sustaining nurture of Earth The authors approach to the necessary awakening is historical If one can see history through primal eyes one will not only see the devolution of consciousness into unconscious self awareness down through the millennia one will sense it in ones own life and do something about it Then in Part II he explores various attributes of unconscious self awareness that are relevant to a primal understanding of history These subjects include the basic split the point at which unconscious self awareness completely suppresses consciousness the location and upward movement of unconscious self awareness in the body the experience of time and space the changing nature of the supreme deity and the four motifs of religion In Part III the author

begins to explore the historical devolution of original consciousness into unconscious self awareness Subjects revealing the devolution include beliefs regarding the origin of the cosmos and of humanity the destiny of the dead shamanism the several millennia long invasions by Warrior God societies of Mother Goddess cultures and the revolutionary religions of Buddhism and Christianity In the authors view everything that has happened since the 1st millennium B C E is but a footnote to it and he therefore skips to the Americas in the 15th century In Part IV the author concentrates on greed and lust for power as the chief characteristics of unconscious self awareness in the modern period He begins with Columbus and the euphemistically named Age of Exploration to illustrate how greed and the lust for power dominated the Western European Colonial powers Next he shows how the Age of Enlightenment and its major philosophers and economists provided the basis for our Founding Fathers to craft a constitution that enshrined themselves as a rich and powerful elite ruling class To illustrate the greed and lust for power of unconscious self awareness in the rest of U S history he discusses economics individualism class and class struggle differences among people and between men and women in the degree of unconscious self awareness family parenting models unilateralism as the national expression of individualism and the U S as a nation dominated by greed by a lust for power by a quest for world domination and by the willingness to use violence and terror to achieve these ends In the final chapter the author reiterates his purpose of awakening his readers from the state of unconscious self awareness In contrast to a strictly psychological approach to fulfill his purpose the author has adopted in addition a perspective that encompasses the whole sweep of human history He ends by offering a cautious optimism for the future *Explore*
