Influence, Comparison, and Transposition. Joe Andrew, Robert Reid, 2013-12-23 One of the most famous quotations in the history of Russian literature is Fedor Dostoevskii's alleged assertion that We have all come out from underneath Gogol's Overcoat Even if Dostoevskii never said this there is a great deal of truth in the comment Gogol certainly was a profound influence on his work as were many others Part of this book's project is to locate Dostoevskii in relationship to his predecessors and contemporaries However the primary aim is to turn the oft quoted apocryphal comment on its head to see the profound influence Dostoevskii had on the lives work and thought of his contemporaries and successors This influence extends far beyond Russia and beyond literature Dostoevskii may be seen as the single greatest influence on the sensibilities of the twentieth and twenty first centuries To a greater or lesser extent those concerned with the creative arts in the

twentieth and twenty first centuries have all come out from under Dostoevskii's Overcoat *Components of emotional meaning* Johnny J. R. Fontaine, Klaus R. Scherer, Cristina Soriano, 2013-08-01 Publications on emotion and the affective sciences in general have exploded in the last decade Numerous research teams and individual scholars from many different disciplines have published research papers or books about many different aspects of emotions and their role in behaviour and society However One aspect of emotional research that has been somewhat neglected is the way in which emotional terms translate into other languages When using terms like anger sadness fear disgust and joy for so called basic emotions as well as terms like shame guilt pride regret and contempt for more complex emotions it is naturally assumed that the emotion terms used for research in the native language of the researchers and translated into English are completely equivalent in meaning However this is not generally the case In many cases there is no direct one to one relationship between an English term and a term in an alternative language In fact there can be significant differences in the way that these seemingly similar emotional terms can be applied across various languages with important implications for how we review and appraise this work This book presents an extensive cross cultural and cross linguistic review of the meaning of emotion words adopting a novel methodological approach Based on the Component Process Model the authors developed a new instrument to assess the meaning of emotion terms This instrument the GRID questionnaire consists of a grid of 24 emotion terms spanning the emotion domain and 142 emotion features that operationalize five emotion components Appraisals Bodily reactions Expressions Action tendencies and Feelings For the operationalization of these five emotion components very different emotion models from the Western and the cultural comparative emotion literature were taken into account Components of Emotional Meaning includes contributions from psychological cultural comparative and linguistic perspectives demonstrating how this new instrument can be used to empirically study very different research questions on the meaning of emotion terms The implications of the results for major theoretical debates on emotion are also discussed For all researchers in the affective sciences this book is an important new reference work *Practicality of Grace in Protestant Theology* Michael G. Maness, Kevaghnn Mattis, 2021-05-20 These 15 articles were chosen by Testamentum Imperium Founder Kevaghnn Mattis with Michael G Maness from among 163 articles published in the 2011 online journal Each author was chosen for their expertise and decades of experience in the practice of pastoral care in their unique fields How the practicality of grace applies in suicide sex addiction sexual assault shame hospital or prison chaplaincy even in eschatology and forgiveness is covered by these veterans in the field The articles touch a broad scope of affliction from physical to moral dilemmas And part of the choice was not to find from the 163 those who see eye to eye We desired to share the unique expertise Each author is a weathered captain who has ferried souls across tumultuous waves of grief confusion self control and internal torment to a port of healing and peaceful victory With contributions from Peter Lillback Glenn R Kreider Terry Ann Smith Timothy J Demy Patricia Cuyatti Chavez Leon Harris Christopher D Surber Keith A Evans Alan M Martin LaVerne Bell Tolliver John

DelHousaye Enrique Ramos Sabrina N Gilchrist D J Louw *The Rise of Consciousness and the Development of Emotional Life* Michael Lewis, 2013-10-16 Synthesizing decades of influential research and theory Michael Lewis demonstrates the centrality of consciousness for emotional development At first infants competencies constitute innate reactions to particular physical events in the child's world These action patterns are not learned but are readily influenced by temperament and social interactions With the rise of consciousness these early competencies become reflected feelings giving rise to the self-conscious emotions of empathy envy and embarrassment and later shame guilt and pride Focusing on typically developing children Lewis also explores problems of atypical emotional development Winner of William James Book Award Society for General Psychology APA Division 1 **Knowing Feeling: Affect, Script, and Psychotherapy** Donald L.

Nathanson, 1996-05-17 Nathanson and his colleagues explore contemporary affect studies focusing on the work of Silvan Tomkins and examine their impact on the theory and practice of psychotherapy *Encyclopedia of Life Writing* Margaretta Jolly, 2013-12-04 First published in 2001 Routledge is an imprint of Taylor Francis an informa company [Handbook of Cognition and Emotion](#) Tim Dalgleish, Mick Power, 2000-11-21 Edited by leading figures in the field this handbook gives an overview of the current status of cognition and emotion research by giving the historical background to the debate and the philosophical arguments before moving on to outline the general aspects of the various research traditions This handbook reflects the latest work being carried out by the key people in the field **Handbook of Restorative Justice , Passion and Reason** Richard S. Lazarus, Bernice N. Lazarus, 1994-11-03 When Oxford published *Emotion and Adaptation* the landmark 1991 book on the psychology of emotion by internationally acclaimed stress and coping expert Richard Lazarus Contemporary Psychology welcomed it as a brightly shining star in the galaxy of such volumes Psychiatrists psychologists and researchers hailed it as a masterpiece a major breakthrough in our understanding of the emotional process and its central role in our adaptation as individuals and as a species What was still needed however was a book for general readers and health care practitioners that would dispel the myths still surrounding cultural beliefs about emotion and systematically explain the relevance of the new research to the emotional dramas of our everyday lives Now in *Passion and Reason* Lazarus draws on his four decades of pioneering research to bring readers the first book to move beyond both clinical jargon and feel-good popular psychology to really explain in plain accessible language how emotions are aroused how they are managed and how they critically shape our views of ourselves and the world around us With his co-author writer Bernice Lazarus Dr Lazarus explores the latest findings on the short and long term causes and effects of various emotions including the often conflicting research on stress management and links between negative emotions and heart disease cancer and other aspects of physical and psychological health Lazarus makes a strong case that contrary to common assumption emotions are not irrational our emotions and our analytical thought processes are inextricably linked While not a how-to book *Passion and Reason* does describe how readers can interpret what lies behind their own emotions and those of their families friends and

co workers and how to manage them more effectively Exploring fifteen emotions in depth from love to jealousy the authors show how the personal meaning we give to the events and conditions of our lives trigger such emotions as anger anxiety guilt and pride They provide fascinating vignettes to frame a biography of each emotion Some are composite case histories drawn from Dr Lazarus s long career but most are stories of people the Lazaruses have known over the years people whose emotional fears conflicts and desires mirror readers own The Lazaruses also offer a special chapter on the diverse strategies of coping people use in managing their emotions and another When Coping Fails on psychotherapy and its approaches to emotional stress and dysfunction from traditional Freudian psychoanalysis to continuing research into relaxation techniques meditation hypnosis and biofeedback Packed with insight and compellingly readable Passion and Reason will enrich all readers fascinated by our emotional lives

The Maternal Lineage Paola Mariotti, 2012-09-10 Why do women want to have children How does one learn to be a mother Does having babies have anything to do with sex At a time when mothers are bombarded by prescriptive and contradicting advice on how to behave with their children *The Maternal Lineage* highlights various psychological aspects of the mothering experience International contributors provide clinical examples of frequent and challenging situations that have received scarce attention in psychoanalysis such as issues of neglect and psychical abuse The transgenerational repetition from mother to daughter of distressing mothering patterns is evident throughout the book and may seem inevitable However clinical examples and theoretical research indicate that when the support of partner and friends is not enough the cycle can be brought to an end if the mother receives psychoanalytic informed professional help *The Maternal Lineage* is divided into four parts An Introduction including a review of the literature focusing on the mother daughter relationship Pregnancy and very early issues Subfertility and its effects on a woman s psyche The psychological aspects of major mothering problems miscarriages post natal depression adolescent motherhood This timely book will be of value to psychoanalysts psychotherapists and health professionals obstetricians psychiatrists midwives and social workers

Space and Muslim

Urban Life Simon O'Meara, 2007-08-09 This book develops academic understanding of Muslim urban space by pursuing the structural logic of the premodern Arab Muslim city or medina With particular reference to The Book of Walls an historical discourse of Islamic law whose primary subject is the wall the book determines the meaning of a wall and then uses it to analyze the space of Fez One of a growing number of studies to address space as a category of critical analysis the book makes the following contributions to scholarship Methodologically it breaks with the tradition of viewing Islamic architecture as a well defined object observed by a specialist at an aesthetically directed distance rather it inhabits the logic of this architecture by rethinking it discursively from within the culture that produced it Hermeneutically it sheds new light on one of North Africa's oldest medinas and thereby illuminates a type of environment still common to much of the Arab Muslim world Empirically it brings to the attention of mainstream scholarship a legal discourse and aesthetic that contributed to the form and longevity of this type of environment and it exposes a preoccupation with walls and other limits in premodern urban Arab Muslim culture and a mythical paradigm informing the foundation narratives of a number of historic medinas Presenting a fresh perspective for the understanding of Muslim urban society and thought this innovative study will be of interest to students and researchers of Islamic studies architecture and sociology
