Japan and Greater China Greg Austin,Stuart Harris,2001-11-30 This work is a comprehensive analysis of the political and strategic relationship between

Japan and China each of which in important respects aspires to a global status commensurate with its economic and military might. These two great powers have to come to terms with a history of antagonism each viewing the other as circumspectly as their small regional neighbors view them. Japan and Greater China reviews the domestic and international foundations of the foreign policies of the two countries notably the politics of national identity. The strategic and economic underpinnings of the relationship are assessed not exclusively by reference to bilateral concerns but within the global and regional position and interests of the two powers.

Beyond Hanoi Benedict J. Tria Kerkvliet, David G. Marr, 2004. This is the first book in English to examine local government and authority in Vietnam since the country's reunification in 1975. Six chapters emphasize particular villages and districts in different parts of the country: one examines a ward in Hanoi, another focuses on Ho Chi Minh City, and one compares leaders in several provinces. To contextualize conditions today, two chapters analyse local government in Vietnam's long history. The opening chapter synthesizes the findings in this book with those in other studies by researchers inside and outside Vietnam.

Business and Politics in Asia's Key Financial Centres J. J. Woo, 2015-12-14. This book provides unique insights into the politics of finance and the socio-political relations which drive financial policymaking in Hong Kong, Singapore, and Shanghai. While the existing literature in the field focuses mainly on economic explanations for financial centre development, this book fills a gap by focusing on the socio-political relations which underpin the financial policy-making process. Drawing on extensive interviews with senior policy makers and financial sector professionals, the book describes how state-industry relations drive financial policy-making in three major financial hubs. Insights and policy recommendations drawn from these interviews will be particularly useful for policy makers and financial sector professionals hoping to draw lessons from the successful development of the three leading Asian financial centres. *Business and Politics in Asia's Key Financial Centres* draws on public policy theoretical frameworks for its analytical basis. The three chapters focusing on the historical development of Hong Kong, Singapore, and Shanghai also provide a consolidated narrative with regard to the development of these three cities as leading financial centres while also serving as independent case studies. Scholars focusing on policy processes and political factors that underpin financial sector development, as well as instructors and students of public policy, international political economy, and financial sector policy, will find this book useful for their research.

Fantasy Islands Julie Sze, 2015-01-05. The rise of China and its status as a leading global factory are altering the way people live and consume. At the same time, the world appears wary of the real costs involved. *Fantasy Islands* probes Chinese, European, and American eco-desire and eco-technological dreams and examines the solutions they offer to environmental degradation in this age of global economic change. Uncovering the stories of sites in China including the plan for a new eco-city called Dongtan on the island of Chongming, mega-suburbs, and the Shanghai World Expo, Julie Sze explores the flows, fears, and fantasies of Pacific Rim politics that shaped them. She charts how climate change discussions align with US fears of China's ascendancy and the related demise of the American Century, and she considers the motives of financial
